

Motorcycles On The Move (Lightning Bolt Books)

The BSA and Triumph motorcycles designed for the 1971 model year, including Ariel 3 and the 750cc Triumph Hurricane. A study of related promotional and racing events, the US organisation, and BSA's financial position prior to 1971's devastating trading loss announcement.

"Part travelogue, part ode to his bike and part literary criticism...a memoir infused with joie de vivre."—Publishers Weekly In this "joyful book" (Booklist), archive diver and Ducati enthusiast Ted Bishop takes readers on an epic trip from Edmonton to Austin, through the classic landscapes of the American West, and to some of America's and Europe's most famous cities as he considers what it means to be a road dog and a researcher. Whether describing how he came to own a Ducati, debating the merits of D. H. Lawrence's novels, relishing the outlaw thrill of cruising small American towns on his bike, or holding Virginia Woolf's suicide note in the British Library, Bishop "easily blends his love of books and archives with his love of motorcycles and riding...an unusual combination...but one that ultimately works" (Library Journal). A Playboy Best Book of 2006.

As al Qaeda terrorists prepare to launch an attack that will disrupt the presidential election, covert operatives Ed Storey and Lee Troy discover that the terrorists have a secret ally in the highest levels of the American government. Original.

Despite only nine years of production, Vincents continue to be ridden regularly in rallies, hard in racing, and certainly well beyond the normal lifespan of a motorcycle. This book tells the Vincent story from 1946 until the present day, including the stories of those significant individuals who helped to make Vincents such legendary machines.

In the modern era, mass-produced motorcycles tend to be Japanese or Italian, with the 'big four' oriental manufacturers dominating the market. However, this wasn't always the case. Until the 1950s, and even into the '60s, British makers such as Scott, Rudge, BSA, Norton and Vincent ruled the roost. These legendary companies sold their bikes around the world, winning racing championships and setting speed records as they went. They, and many smaller British firms like them, are motorcycling's founding companies. This is the story of those pioneering firms, whose engineers – many self-taught – were fired by racing ambition, commercial rivalry, patriotic duty and, above all, a passion for innovation. Superbly illustrated with over 150 colour pictures, many previously unpublished, Classic British Motorcycles is a captivating and highly informative account of the men, machines, race meetings and world events that shaped the development of the motorcycle from its bicycle origins.
