A small town cop with an unexpected gift A shadowy government agency on the side of justice A call no good man could turn away When vampires attack David White's small town, only luck, firepower, and the intervention of an elite government task force save his life. The aftermath of the attack leaves him in the middle of the world's biggest secret: the existence of government agencies that regulate the supernatural. They insist that David's "luck" is actually a supernatural gift, and he's immediately recruited into ONSET, the most shadowy part of America's thin blue line of police protectors. Questioning both his gifts and the agency he now serves, David is drawn into an escalating battle that threatens all of humanity. If he isn't what ONSET thinks he is, the entire

Jan Petersen was vibrant, active, healthy, and just 55 when she was diagnosed with Alzheimer's. Barry was not even slightly prepared for what happened to her, and how it would impact his life when "forever" suddenly and terrifyingly has an expiration date. A ragged newcomer... With a secret even he doesn't know A backwater city... With a countdown to an explosion no one is expecting A secret Covenant... And a conspiracy to break it to pieces Jason Kilkeny is a new arrival in the Canadian city of Calgary.

Unlike most newcomers, Jason isn't looking for a job in oil and gas: he's a half-fae changeling that wants to get away from the politics of the inhuman races. He soon learns that despite being a supernatural backwater, the city is run by a near-godlike Wizard—and the shadows are full of unseen dangers. Jason's here to hide, but he finds himself called to service by Calgary's understaffed Fae Court. As supernatural politics collide in his new home, Jason's plan to keep his head down is shattered and he finds himself testing the limits of his meager gifts. He cannot run, he cannot hide...and if he loses, he loses everything.

This volume outlines what is meant by terms such as 'evidence based practice', 'systematic review', 'efficacy', 'effectiveness'. It summarises, in a systematic fashion, the current evidence on diabetes prevention and care to enable the reader to improve their professional practice. Furthermore, it promotes a critical attitude to the assessment of evidence and engenders enthusiasm for

'lifelong learning'. It also advises clinicians on what to do when there is little available evidence. Chapters consider the evidence base for the definition and classification of diabetes, as well as prevention, identification, treatment, education in IDDM and NIDDM. The final chapters look at the practical implications of translating this evidence into practice in different environments with different health care systems and different economic levels. This is the first book to present an evidence-based

throughout the Court's long history. Constitutional dialogue is one of the ways in which we as a people reinvent and reinvigorate our democratic society. The Supreme Court has interpreted the meaning of the Constitution, acknowledged that the Court's majority opinions have not always been right, and initiated a critical discourse about what a particular decision should mean before fashioning subsequent decisions--largely through the power of dissent. Urofsky shows how the practice grew slowly but steadily, beginning with the

infamous and now overturned case of Dred Scott v. Sandford (1857) during which Chief Justice Roger Taney's opinion upheld slavery and ending with the present age of incivility, in which reasoned dialogue seems less and less possible. Dissent on the court and off, Urofsky argues in this major work, has been a crucial ingredient in keeping the Constitution alive and must continue to be so.
