Opening with a brief informative essay, this book contains thousands of colored round stickers and a poster "canvas" of colored outlines - readers simply need to match the stickers to the outlines found on the poster to recreate the painting. A New York Times bestseller, Safari is a magical journey for the whole family. Readers, as if on African safari, encounter eight wild animals that come alive using never-before-seen Photoclear technology. Each full-color image is like a 3-D movie on the page, delivering a rich, fluid, immersive visual experience. The result is breathtaking. The cheetah bounds. The gazelle leaps. The African elephant snaps its ears. The gorilla munches the leaves off a branch. It's mesmerizing, as visually immediate as a National Geographic or Animal Planet special. Accompanying the images is Safari, the guide: It begins with an evocative journal of a safari along the Mara River in Kenya and interweaves the history of safaris. Then for each animal there is a lively, informative essay and an at-a-glance list of important facts. It's the romance of being on safari—and the thrill of seeing the animals in motion—in a book unlike any other.
