The Plains region that stretches from northern Colorado to southern Alberta and from the Rockies to the western Dakotas is the land of the Cheyenne and the Blackfeet, the Crow and the Sioux. Its rolling grasslands and river valleys have nurtured human cultures for thousands of years. On cave walls, glacial boulders, and riverside cliffs, native people recorded their ceremonies, vision quests, battles, and daily activities in the petroglyphs and pictographs they incised, pecked, or painted onto the stone surfaces. In this vast landscape, some rock art sites were clearly intended for communal use; others just as clearly mark the occurrence of a private spiritual encounter. Elders often used rock art, such as complex depictions of hunting, to teach traditional knowledge and skills to the young. Other sites document the medicine powers and brave deeds of famous warriors. Some Plains rock art goes back more than 5,000 years; some forms were made continuously over many centuries. Archaeologists James Keyser and Michael Klassen show us the origins, diversity, and

beauty of Plains rock art. The seemingly endless variety of images include humans, animals of all kinds, weapons, masks, mazes, handprints, finger lines, geometric and abstract forms, tally marks, hoofprints, and the wavy lines and starbursts that humans universally associate with trancelike states. Plains Indian Rock Art is the ultimate guide to the art form. It covers the natural and archaeological history of the northwestern Plains; explains rock art forms, techniques, styles, terminology, and dating; and offers interpretations of images and compositions. Master Minds: Creativity in Picasso's & Husain's Paintings The book, "Master Minds: Creativity in Picasso's and Husain's Paintings", is a projection of master minds in the field of art. It reveals about the creative works of art that are not just show pieces to adorn rich homes, museums and art galleries but to bring awareness about human attitude and cultural heritage. The projection of these works of art could lead to international integration and establish an amicable relationship between people of all communities and further form a peaceful global human society. This book Part 1 to Part 5 also serves the purpose of academic study for art scholars and art researchers all over

the world In the entire book, "Master Minds: Creativity in Picasso's and Husain's Paintings," light has been thrown on Picasso's and Husain's life and paintings. There is an analytical study of their works of art. The significant aspects dealt with in their paintings are creativity viewed through linear quality, forms, colors, pictorial composition, subject matter, styles, mediums, techniques, similarities and differences in their works of art. I consider myself to be fortunate to avail the opportunity to journey through a significant part of the life and works of these two great artists. Their contribution to the world of art is exemplary for many future generations. Picasso and Husain have proved that the aesthetic artistic trend of thought has no barriers and boundaries. The mind of an artist can reach any part of the universe and create wonders in the form of an art. Picasso's and Husain's immortalized paintings mesmerize the observer when their creative activity springs out in their paintings which speak in a silent language of forms and colors. An exposure to visual art in any form has proved to be a form of communication. Our global human society is divided by languages, customs, religions, economic developments and geographical locations, but the visual

language in the form of paintings of artists all over the world have united the global society by their creative activity. When an artist's aesthetic sense is highly developed and his ability to grasp and display is superb he ultimately becomes a pioneer of a unique technique or style. Picasso's cubism and Husain's allegorical series of paintings in Husainian style are the products of the vigorous experiments with different mediums and techniques. It has been noticed that their works have a glimpse of the existing styles and techniques mingled with an antiquarian approach where the result is absolutely unique and creative. Their works of art are deemed to immortalize their names as the ever shining prominent stars in the sky of the world of art. There are total 226 illustrations in Part 1 to Part 5 of the ebooks that include a unique analytical study of the paintings and the sketches of the artists, Pablo Picasso and Maqbool Fida Husain. Learn about the rich history of Mission San Miguel Arcángel: how it started, the people who ran it, the indigenous population, and its legacy today.

Along the Atlantic seaboard, from Scotland to Spain, are numerous rock carvings made four to five thousand years ago, whose interpretation poses a major challenge to the archaeologist. In the first full-length treatment of the subject, based largely on new fieldwork, Richard Bradley argues that these carvings should be interpreted as a series of symbolic messages that are shared between monuments, artefacts and natural places in the landscape. He discusses the cultural setting of the rock carvings and the ways in which they can be interpreted in relation to ancient land use, the creation of ritual monuments and the burial of the dead. Integrating this fascinating yet little-known material into the mainstream of prehistoric studies, Richard Bradley demonstrates that these carvings played a fundamental role in the organization of the prehistoric landscape.
