The ability to effectively communicate with data is no longer a luxury in today's economy; it is a necessity. Transforming data into visual communication is only one part of the picture. It is equally important to engage your audience with a narrative—to tell a story with the numbers. Effective Data Storytelling will teach you the essential skills necessary to communicate your insights through persuasive and memorable data stories. Narratives are more powerful than raw statistics, more enduring than pretty charts. When done correctly, data stories can influence decisions and drive change. Most other books focus only on data visualization while neglecting the powerful narrative and psychological aspects of telling stories with data. Author Brent Dykes shows you how to take the three central elements of data storytelling—data, narrative, and visuals—and combine them for maximum effectiveness. Taking a comprehensive look at all the elements of data storytelling, this unique book will enable you to: Transform your insights and data visualizations into appealing, impactful data stories Learn the fundamental elements of a data story and key audience drivers Understand the differences between how the brain processes facts and narrative Structure your findings as a data narrative, using a four-step storyboarding process Incorporate the seven essential principles of better visual storytelling into your work Avoid common data storytelling mistakes by learning from historical and modern examples Effective Data Storytelling: How to Drive Change with Data, Narrative and Visuals is a must-have resource for anyone who communicates regularly with data, including business

"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18

lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

"The modern human animal spends upwards of 11 hours out of every 24 in a state of constant consumption. Not eating, but gorging on information ceaselessly spewed from the screens and speakers we hold dear. Just as we have grown morbidly obese on sugar, fat, and flour--so, too, have we become gluttons for texts, instant messages, emails, RSS feeds, downloads, videos, status updates, and tweets. We're all battling a storm of distractions, buffeted with notifications and tempted by tasty tidbits of information. And just as too much junk food can lead to obesity, too much junk information can lead to cluelessness."--Publisher's blurb.

Whether you are a university professor, researcher at a think tank, graduate student, or analyst at a private firm, chances are that at some point you have presented your work in front of an audience. Most of us approach this task by converting a written document into slides, but the result is often a text-heavy presentation saddled with bullet points, stock images, and graphs too complex for an audience to decipher—much less understand. Presenting is fundamentally different from writing, and with only a little more time, a little more effort, and a little more planning, you can communicate your work with force and clarity. Designed for presenters of scholarly or data-intensive content, *Better Presentations* details essential strategies for developing clear, sophisticated, and visually captivating presentations. Following three core principles—visualize, unify, and focus—*Better Presentations* describes how to visualize data effectively, find and use images appropriately, choose sensible fonts and colors, edit text for powerful delivery, and restructure a written argument

may be a bad idea for teachers and learners alike. This accessible guide helps teachers integrate effective, research-backed strategies for learning into their classroom practice. The Allegory of the Cave, or Plato's Cave, was presented by the Greek philosopher Plato in his work Republic (514a–520a) to compare "the effect of education (???????) and the lack of it on our nature". It is written as a dialogue between Plato's brother Glaucon and his mentor Socrates, narrated by the latter. The allegory is presented after the analogy of the sun (508b–509c) and the analogy of the divided line (509d–511e). All three are characterized in relation to dialectic at the end of Books VII and VIII (531d–534e). Plato has Socrates describe a group of people who have lived chained to the wall of a cave all of their lives, facing a blank wall. The people watch shadows projected on the wall from objects passing in front of a fire behind them, and give names to these shadows. The shadows are the prisoners'

"If I tell you the truth, if I tell it with a story, and if I tell that story with pictures, I can keep you glued to your seat. Let me show you how." For the vast majority of us, giving a presentation is an extremely difficult and nerve-wracking process, whether we're in a one-on-one meeting, a conference room with a dozen strangers, or a lecture hall in front of thousands. But according to Dan Roam, the visual communications expert and acclaimed author of *The Back of the Napkin*, it doesn't have to be so hard. We struggle when we forget the basic steps we learned in kindergarten: show and tell. In this short but powerful book, Roam introduces a new set of tools for making extraordinary presentations in any setting. He also draws on ideas he's been honing for more than two decades, as an award-winning presenter who has brought his whiteboard everywhere from Fortune 500 companies to tiny startups to the White House. Even if you're already a good speaker, you'll learn more about understanding your audience, organizing your content, building a clear storyline, creating effective visuals, and channeling your fear into fun. And you'll master three fundamental rules: • When we tell the truth, we connect with our audience, we become passionate, and we find self-confidence. • When we tell a story, we make complex concepts clear, we make ideas unforgettable, and we include everyone. • When we use pictures, people see exactly what we mean, we captivate our audience's mind, and we banish boredom. From nailing the opening to leaving a lasting impression, you'll soon be able to give the performance of a lifetime . . . time after time. PLEASE NOTE: This eBook edition of *SHOW AND TELL* is carefully laid out to match the print book; this means it reads much better as designed pages, but you won't be able to use some features such as highlighting and annotating text.

The Business of Design debunks the myth that business sense and creative talent are mutually exclusive, showing design professionals that they can pursue their passion and turn a profit. For nearly thirty years, consultant Keith Granet has helped designers create successful businesses, from branding to billing and everything in between. Unlike other business books, The Business of Design is written and illustrated to speak to a visually thinking audience. The book covers all aspects of running a successful design business, including human resources, client management, product development, marketing, and licensing. This timely update on the tenth anniversary of the first edition includes new content on social media, working from home, and understanding and working with different generations, essential tools in today's ultracompetitive marketplace.

A lively, illustrated exploration of the 500-million-year history of bone, a touchstone for understanding vertebrate life and human culture. Human bone is versatile and entirely unique: it repairs itself without scarring, it's lightweight but responds to stresses, and it's durable enough to survive for millennia. In Bones, orthopedic surgeon Roy A. Meals explores and extols this amazing material that both supports and records vertebrate life. Inside the body, bone proves itself the world's best building material. Meals examines the biological makeup of bones; demystifies how they grow, break, and heal; and compares the particulars of human bone to variations throughout the animal kingdom. In engaging and clear prose, he debunks familiar myths—humans don't have exactly 206 bones—and illustrates common bone diseases, like osteoporosis and arthritis, and their treatments. Along the way, he highlights the medical innovations—from the first X-rays to advanced operative techniques—that enhance our lives and introduces the giants of orthopedic surgery who developed them. After it has supported vertebrate life, bone reveals itself in surprising ways—sometimes hundreds of millions of years later. With enthusiasm and humor, Meals investigates the diverse roles bone has played in human culture throughout history. He highlights allusions to bone in religion and literature, from Adam's rib to Hamlet's skull, and uncovers its enduring presence as fossils, technological tools, and musical instruments ranging from the Tibetan thighbone kangling horn to everyday drumsticks. From the dawn of civilization through to the present day, humankind has repurposed bone to serve and protect, and even to teach, amuse, and inspire. Approachable and entertaining, Bones richly illuminates our bodies' essential framework.

"THE PEOPLE WHO ARE CRAZY ENOUGH TO THINK THEY CAN CHANGE THE WORLD ARE THE ONES WHO DO." With these words, Apple Inc., and its leader, Steve Jobs, catalyzed a movement. Whenever Jobs took the stage to talk about new Apple products, the whole world seemed to stop and listen. That's because Jobs was offering a vision of the future. He wanted you to feel what the world might someday be like, and trust him to take you there. As a leader, you have the same potential to not only anticipate the future and invent creative initiatives, but to also inspire those around you to support and execute your vision. In Illuminate, acclaimed author Nancy Duarte and communications expert Patti Sanchez equip you with the same communication tools that great leaders like Jobs, Howard Schultz, and Dr. Martin Luther King Jr. used to move people. Duarte and Sanchez lay out a plan to help you lead people through the five stages of transformation using speeches, stories, ceremonies, and symbols. This visual and accessible communication guidebook will show you how Apple, Starbucks, IBM, charity: water, and others have mobilized people to embrace bold changes. To envision the future is one thing, getting others to go there with you is another. By harnessing the power of persuasive communication you, too, can turn your idea into a movement.
