

Ryan (Council Enforcers Book 14)

Rule Breaker Penguin

The unscrupulous new Council chair has charged Jace, Marc and me with trespassing, kidnapping, murder and treason. Yeah, we've been busy. But now it's time to take justice into our own hands. We must avenge my brother's death and carve out the rot at the heart of the Council. It's not going to be easy, and loss seems unavoidable, but I have promised to protect my Pride, no matter what. With a target on my back and Marc at my side, I'm heading for a final showdown that can—that will—change everything forever. A showdown I'm not sure I'm ready for. But life never waits until you're ready.

Edinburgh, 1844. Beautiful Aileana Kameron only looks the part of an aristocratic young lady. In fact, she's spent the year since her mother died developing her ability to sense the presence of Sithichean, a faery race bent on slaughtering humans. She has a secret mission: to destroy the faery who murdered her mother. But when she learns she's a Falconer, the last in a line of female warriors and the sole hope of preventing a powerful faery population from massacring all of humanity, her quest for revenge gets a whole lot more complicated. The first volume of a trilogy from an exciting new voice in young adult fantasy, this electrifying thriller blends romance and action with steampunk technology and Scottish lore in a deliciously addictive read.

Alli-Kar, a white-hole portal from another universe, rains meteoroids onto the surface of the planet Kelanni. But the so-called "lodestones" behave according to different physical laws, transforming Kelanni's society. With the aid of the fearsome Keltar in their flying cloaks, the Kelanni are being put to forced labor to mine the lodestones. Shann, an orphan with a fiery disposition, witnesses a battle between a Keltar and a stranger bearing a similar flying cloak. She tracks down the stranger, learning of the technology behind the Keltars' power and joining him on a mission to free the slaves and cut off their supply of lodestones. Meanwhile Keris, a Keltar, is sent on a mission to track down the rebels. She is attacked by a flying creature and saved by the enigmatic Chandara. At their Great Tree, she learns that a mysterious "Prophet" is out to destroy the Kelanni people. Their only hope is a powerful instrument hidden in the distant past. Pursued by Keltar, the party will encounter bizarre creatures, ancient technologies and terrifying dangers. Finally, they must seek to cross a massive storm barrier in order to reach the other side of their world, where a world-shaking revelation awaits.

A History of the Internet and the Digital Future

The Future of the Internet--And How to Stop It

A Developmental Approach

Principle and Practice

Charlie Crist, the former Republican governor of Florida, spent years in the party ' s inner circle. In this no-holds-barred memoir, he shows why he switched sides and became a Democrat. After serving as a Republican governor—one who was on the short list for the vice presidency in 2008—Charlie Crist made headlines when he decided to run for the U.S. Senate as an Independent. He was on the front page again when he endorsed President Obama in 2012 and spoke at the Democratic National Convention—and yet again when he officially joined the Democratic Party later that year. In *The Party ' s Over*, he ' ll make even more news when he reveals: The inside story of his 2010 Senate primary campaign against Marco Rubio, where he learned exactly how vicious the Republican leadership can be. His journey from inner circle to persona non grata, thanks to his literal embrace of President Obama. His very frank opinions on Marco Rubio, Jeb Bush, Mitt Romney, Sarah Palin, and other top-tier Republicans. Why he believes that Democrats have the right vision for Florida and the nation. • What he ' s learned as a member of both parties and why he remains convinced that the two-party system can still work—with the right leadership. Rather than just rehashing his career, in this book Crist offers a focused indictment of the failings of the Republican Party, naming names and identifying where things went wrong. *The Party ' s Over* is as far from “ politics as usual ” as you can get.

The meat of wild species, referred to in this report as ‘ wild meat ’ , is an essential source of protein and a generator of income for millions of forest-living communities in tropical and subtropical regions. However, unsustainable harvest rates currently

This extraordinary book explains the engine that has catapulted the Internet from backwater to ubiquity—and reveals that it is sputtering precisely because of its runaway success. With the unwitting help of its users, the generative Internet is on a path to a lockdown, ending its cycle of innovation—and facilitating unsettling new kinds of control. iPods, iPhones, Xboxes, and TiVos represent the first wave of Internet-centered products that can't be easily modified by anyone except their vendors or selected partners. These “ tethered appliances ” have already been used in remarkable but little-known ways: car GPS systems have been reconfigured at the demand of law enforcement to eavesdrop on the occupants at all times, and digital video recorders have been ordered to self-destruct thanks to a lawsuit against the manufacturer thousands of miles away. New Web 2.0 platforms like Google mash-ups and Facebook are rightly touted—but their applications can be similarly monitored and eliminated from a central source. As tethered appliances and applications eclipse the PC, the very nature of the Internet—its “ generativity, ” or innovative character—is at risk. The Internet's current trajectory is one of lost opportunity. Its salvation, Zittrain argues, lies in the hands of its millions of users. Drawing on generative technologies like Wikipedia that have so far survived their own successes, this book shows how to develop new technologies and social structures that allow users to work creatively and collaboratively, participate in solutions, and become true “ netizens. ”

Adolescence is a distinct, yet transient, period of development between childhood and adulthood characterized by increased experimentation and risk-taking, a tendency to discount long-term consequences, and heightened sensitivity to peers and other social influences. A key function of adolescence is developing an integrated sense of self, including individualization, separation from parents, and personal identity. Experimentation and novelty-seeking behavior, such as alcohol and drug use, unsafe sex, and reckless driving, are thought to serve a number of adaptive functions despite their risks.

Research indicates that for most youth, the period of risky experimentation does not extend beyond adolescence, ceasing as identity becomes settled with maturity. Much adolescent involvement in criminal activity is part of the normal developmental process of identity formation and most adolescents will mature out of these tendencies. Evidence of significant changes in brain structure and function during adolescence strongly suggests that these cognitive tendencies characteristic of adolescents are associated with biological immaturity of the brain and with an imbalance among developing brain systems. This imbalance model implies dual systems: one involved in cognitive and behavioral control and one involved in socio-emotional processes. Accordingly adolescents lack mature capacity for self-regulations because the brain system that influences pleasure-seeking and emotional reactivity develops more rapidly than the brain system that supports self-control. This knowledge of adolescent development has underscored important differences between adults and adolescents with direct bearing on the design and operation of the justice system, raising doubts about the core assumptions driving the criminalization of juvenile justice policy in the late decades of the 20th century. It was in this context that the Office of Juvenile Justice and Delinquency Prevention (OJJDP) asked the National Research Council to convene a committee to conduct a study of juvenile justice reform. The goal of Reforming Juvenile Justice: A Developmental Approach was to review recent advances in behavioral and neuroscience research and draw out the implications of this knowledge for juvenile justice reform, to assess the new generation of reform activities occurring in the United States, and to assess the performance of OJJDP in carrying out its statutory mission as well as its potential role in supporting scientifically based reform efforts.

Sometimes trusting is the hardest thing to do.

The most important book on antitrust ever written. It shows how antitrust suits adversely affect the consumer by encouraging a costly form of protection for inefficient and uncompetitive small businesses.

The essays in this book, written by researchers from both humanities and science, describe various theoretical and experimental approaches to adding medical ethics to a machine, what design features are necessary in order to achieve this, philosophical and practical questions concerning justice, rights, decision-making and responsibility in medical contexts, and accurately modeling essential physician-machine-patient relationships. In medical settings, machines are in close proximity with human beings: with patients who are in vulnerable states of health, who have disabilities of various kinds, with the very young or very old and with medical professionals. Machines in these contexts are undertaking important medical tasks that require emotional sensitivity, knowledge of medical codes, human dignity and privacy. As machine technology advances, ethical concerns become more urgent: should medical machines be programmed to follow a code of medical ethics? What theory or theories should constrain medical machine conduct? What design features are required? Should machines share responsibility with humans for the ethical consequences of medical actions? How ought clinical relationships involving machines to be modeled? Is a capacity for empathy and emotion detection necessary? What about consciousness? This collection is the first book that addresses these 21st-century concerns.

"This report lays out a decision-making framework for creating an ECT [environmental court and tribunal] that can be useful in different legal cultures and political situations. It provides the tools and support necessary to enhance access to environmental justice in countries around the world that, in turn, will advance the principles of environmental protection, sustainable development, and intergenerational equity through the institutions responsible for delivering environmental justice"--Introd.

Mating Instinct

A History of Political Thought - From Herodotus to the Present

From the New York Times bestselling author of Little Brother, Cory Doctorow, comes Pirate Cinema, a new tale of a brilliant hacker runaway who finds himself standing up to tyranny. Trent McCauley is sixteen, brilliant, and obsessed with one thing: making movies on his computer by reassembling footage from popular films he downloads from the net. In the dystopian near-future Britain where Trent is growing up, this is more illegal than ever; the punishment for being caught three times is that your entire household's access to the internet is cut off for a year, with no appeal. Trent's too clever for that to happen. Except it does, and it nearly destroys his family. Shamed and shattered, Trent runs away to London, where he slowly learns the ways of staying alive on the streets. This brings him in touch with a demimonde of artists and activists who are trying to fight a new bill that will criminalize even more harmless internet creativity, making felons of millions of British citizens at a stroke. Things look bad. Parliament is in power of a few wealthy media conglomerates. But the powers-that-be haven't entirely reckoned with the power of a gripping movie to change people's minds.... At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Eventyrroman.

They want the crown. She wants revenge. In a feudal land, a Kingdom is at risk. With no heir to the fragile throne, its future rests with the powerful members of the dying king's Council, including Minori, a nightblade warrior, and Kiyoshi, a dayblade healer. The two men are bound by the sword but divided by two opposing principles: rule the land, or serve it. In their challenge for supremacy, a spark has been lit. Her name is Asa. Her creed is revenge. A fierce nightblade warrior, she's spent a decade in pursuit of the enigmatic general who killed her father in a violent revolt--then mysteriously vanished from all records. Now, her desire for reckoning has led her to the village of Two Falls--and straight into the heart of an impending civil war. Minori and Kiyoshi are vying for her loyalty. And Asa must choose sides. As fresh betrayals unfold and a new uprising looms, Asa knows that chasing a ghost is no longer just a personal quest for retribution. It's going to alter the fate of the entire Kingdom.

A History of the Internet and the Digital Future tells the story of the development of the Internet from the 1950s to the present and examines how the balance of power has shifted between the individual and the state in the areas of censorship, copyright infringement, intellectual freedom, and terrorism and warfare. Johnny Ryan explains how the Internet has revolutionized political campaigns; how the development of the World Wide Web enfranchised a new online population of assertive, niche consumers; and how the dot-com bust taught smarter firms to capitalize on the power of digital artisans. From the government-controlled systems of the Cold War to today's move towards cloud computing, user-driven content, and the new global commons, this book reveals the trends that are shaping the businesses, politics, and media of the digital future.

Constructing Allied Cooperation

How do states overcome problems of collective action in the face of human atrocities, terrorism and the threat of weapons of mass destruction? How does international burden-sharing in a context look like: between the rich and the poor; the big and the small? These are the questions Marina E. Henke addresses in her new book *Constructing Allied Cooperation*. Through qualitative and quantitative analysis of 80 multilateral military coalitions, Henke demonstrates that coalitions do not emerge naturally. Rather, pivotal states deliberately build them. They develop operational plans and bargain suitable third parties into the coalition, purposefully using their bilateral and multilateral diplomatic connections—what Henke terms diplomatic embeddedness—as a resource. As *Constructing Allied Cooperation* shows, these ties constitute an invaluable state capability to engage others in collective action: they are tools to facilitate cooperation. Pulling apart the strategy behind multilateral military coalition-building, Henke looks at the ramifications and side effects as well. As she notes, via these ties, pivotal states gain access to private information on the deployment preferences of potential coalition participants. Moreover, they facilitate issue-linkages and side-payments and allow states to overcome problems of credible commitments. Finally, pivotal states can use common institutional contacts (IO officials) as cooperation brokers, and they can convert common institutional venues into fora for negotiating coalitions. The theory and evidence presented by Henke force us to revisit the conventional wisdom on how cooperation in multilateral military operations come about. The author generates new insights with respect to who is most likely to join a given multilateral intervention, what factors influence the strength and capacity of individual coalitions, and what diplomacy and diplomatic ties are good for. Moreover, as the Trump administration promotes an "America First" policy and withdraws from international agreements and the United Kingdom completes Brexit, *Constructing Allied Cooperation* is an important reminder that international security cannot be delinked from more mundane forms of cooperation; multilateral military coalitions thrive or fail depending on the breadth and depth of existing social and diplomatic networks.

Teaching at Its Best This third edition of the best-selling handbook offers faculty at all levels an essential toolbox of hundreds of practical teaching techniques, formats, classroom activities, and exercises, all of which can be implemented immediately. This thoroughly revised edition includes the newest portrait of the Millennial student; current research from cognitive psychology; a focus on outcomes maps; the latest legal options on copyright issues; and how to best use new technology including wikis, blogs, podcasts, vodcasts, and clickers. Entirely new chapters include subjects such as matching teaching methods with learning outcomes, inquiry-guided learning, and using visuals to teach, and new sections address Felder and Silverman's Learning Styles, SCALE-UP classrooms, multiple true-false test items, and much more. Praise for the Third Edition of *Teaching at Its Best* Everyone—veterans as well as novices—will benefit from reading *Teaching at Its Best*, for it provides both theory and practical suggestions for handling all of the problems one encounters in teaching classes varying in size, ability, and motivation."—Wilbert McKeachie, Department of Psychology, University of Michigan, and coauthor, *McKeachie's Teaching Tips* This new edition of Dr. Nilson's book, with its completely revised material and several new topics, is an even more powerful collection of ideas and tools than the last. What a great resource, especially for beginning teachers but also for us veterans."—Fink, author, *Creating Significant Learning Experiences* This third edition of *Teaching at Its Best* is successful at weaving the latest research on teaching and learning into what was a thorough exploration of each topic. New information on how we learn, how students develop, and innovations in instructional strategies complement the solid foundation established in the two editions."—Marilla D. Svinicki, Department of Psychology, The University of Texas, Austin, and coauthor, *McKeachie's Teaching Tips*

Every day in the United States, children and adolescents are victims of commercial sexual exploitation and sex trafficking. Despite the serious and long-term consequences for victims and as their families, communities, and society, efforts to prevent, identify, and respond to these crimes are largely under supported, inefficient, uncoordinated, and unevaluated. *Confronting Commercial Sexual Exploitation and Sex Trafficking of Minors in the United States* examines commercial sexual exploitation and sex trafficking of U.S. citizens and lawful permanent residents of the United States under age 18. According to this report, efforts to prevent, identify, and respond to these crimes require better collaborative approaches that build upon the ca

people and entities from a range of sectors. In addition, such efforts need to confront demand and the individuals who commit and benefit from these crimes. The report recommends increased awareness and understanding, strengthening of the law's response, strengthening of research to advance understanding and to support the development of prevention and intervention strategies, support for multi-sector and interagency collaboration, and creation of a digital information-sharing platform. A nation that is unaware of these problems or from solutions unwittingly contributes to the ongoing abuse of minors. If acted upon in a coordinated and comprehensive manner, the recommendations of *Confronting Commercial Exploitation and Sex Trafficking of Minors in the United States* can help advance and strengthen the nation's emerging efforts to prevent, identify, and respond to commercial sexual exploitation and sex trafficking of minors in the United States.

Across an amazing sweep of the critical areas of business regulation - from contract, intellectual property and corporations law, to trade, telecommunications, labour standards, drug transport and environment - this book confronts the question of how the regulation of business has shifted from national to global institutions. Based on interviews with 500 international in business and government, this book examines the role played by global institutions such as the WTO, the OECD, IMF, Moody's and the World Bank, as well as various NGOs and significant individuals. The authors argue that effective and decent global regulation depends on the determination of individuals to engage with powerful agendas and decision-makers that would otherwise be dominated by concentrated economic interests. This book will become a standard reference for readers in business, law, politics and international relations.

The Falconer

Just this once . . . Please let me get away with it just this once . . . Tobey wants a better life - for him and his girlfriend Callie Rose. He wants nothing to do with the gangs that rule the world he lives in. But when he's offered the chance to earn some money just for making a few 'deliveries', just this once, would it hurt to say 'yes'? One small decision can change everything . . . The fourth novel in Malorie Blackman's powerful *Noughts & Crosses* sequence.

When the woman he loved but refused to make his bondmate is attacked and left for dead, powerful lupine shifter Jayce Kazan, regretting his decision, is determined to save the beautiful human seer and prove that he is the one she should be with--forever. Original.

The *Racial Contract* puts classic Western social contract theory, deadpan, to extraordinary radical use. With a sweeping look at the European expansionism and racism of the last five hundred years, Charles W. Mills demonstrates how this peculiar and unacknowledged "contract" has shaped a system of global European domination: how it brings into existence "whites" and "non-whites," full persons and sub-persons, how it influences white moral theory and moral psychology; and how this system is imposed on non-whites through ideological conditioning and violence. The *Racial Contract* argues that the society we live in is a continuing white supremacist state. As this 25th anniversary edition—featuring a foreword by Tommy Shelby and a new preface by the author—makes clear, the still-urgent *The Racial Contract* continues to inspire, provoke, and influence thinking about the intersection of the racist underpinnings of political philosophy.

Resolving to avoid relationships outside of his own breed, lion shapeshifter Rule Breaker resists his passions for a human woman he considers too fun-loving and fragile to protect herself. Reprint.

Book One of the Falconer Trilogy

Long-listed for the 2018 Man Booker Prize Short-listed for the 2018 Gordon Burn Prize Short-listed for the 2018 Goldsmiths Prize Inspired by the real-life murder of a British army soldier by religious fanatics, Guy Gunaratne's *In Our Mad and Furious City* is a snapshot of the diverse, frenzied edges of modern-day London. A crackling debut from a vital new voice, it pulses with the frantic energy of the city's homegrown grime music and is animated by the youthful rage of a dispossessed, overlooked, and often misrepresented generation. While Selvon, Ardan, and Yusuf organize their lives around soccer, girls, and grime, Caroline and Nelson struggle to overcome pasts that haunt them. Each voice is uniquely insightful, impassioned, and unforgettable, and when stitched together, they trace a brutal and vibrant tapestry of today's London. In a forty-eight-hour surge of extremism and violence, their lives are inexorably drawn together in the lead-up to an explosive, tragic climax. *In Our Mad and Furious City* documents the stark disparities and bubbling fury coursing beneath the prosperous surface of a city uniquely on the brink. Written in the distinctive vernaculars of contemporary London, the novel challenges the ways in which we coexist now—and, more important, the ways in which we often fail to do so.

Fate knows what they're doing, right? Warlock Cornelius is almost three hundred and is tired of being alone. When help is needed at a wolf pack out west, he's quick to go--hopeful he will find his One there. Matthew is in awe about being in the human realm. Things are so very different than the fae realm he's from. He was sent to Timber Valley, being told his mate was there, and he's excited to meet his own sexy shifter. Only his mate isn't a shifter... Warlocks and Fae don't mate with each other. They have an ongoing feud that dates back well over a millennium; to the original warlock and fae. Did fate mix things up? Cornelius is the first book in the Warlocks of Amherst series. Each book will focus on a different couple and can be read as standalones but previous couples will make appearances in future books. This book is intended for adults only as it contains a fated mate pair and plenty of magical sexy times that leads to male pregnancy as this is an MPREG story. She's a lone wolf with a cause. As a volunteer at a shelter for lone shifters--the same one that rescued her--Makenna Wray has dedicated her life to finding homes for its residents. And when she discovers that a teen in her care is related to Ryan Conner, the broody, handsome-as-sin enforcer of the Phoenix Pack, she's eager to help connect the two. She just wasn't prepared to feel a connection of her own. Lone wolves are loners for a reason--and most of them bad. Or so Ryan assumes until he meets the mysterious Makenna. Quirky and sensual, she seems to enjoy riling him, especially when she refuses to discuss her past. Although there is no mating bond, he's sure she's the one. All he has to do is be patient and wait. But when another pack's sinister Alpha comes sniffing around, threatening Makenna and her shelter, this enforcer is ready to let his wolf off the leash....

Not everything in life turns out how you expect it to. Sheriff's Deputy Gage has always felt as if he didn't quite belong where he was in life. After he lost his parents several years ago, he felt completely alone and often didn't involve himself with the rest of his den beyond what was absolutely needed. He did what he could to try to fit in, but it never seemed to work, and he constantly messed things up. Linus fled the only home he ever knew and traveled thousands of miles with his parents trying to escape the evil clutches of Alpha Hank, who was out to end all male omegas. On what should have been the worse day of Linus' life, he scents something truly wonderful. His mate. Only Gage has been seriously injured in the confrontation with Hank. Would fate be so cruel to give Linus his mate, only to immediately take him away? When everyone thinks Linus is too young and distraught to mate, Gage reluctantly agrees that he's not what Linus needs just then, even if his mate is going into heat after having spent a night in bed with him. Things go haywire and consequences are unlike any the den has experienced before. Through it all, Gage and Linus discover each other, and that they are a stronger couple than either of them could have ever imagined. They'll have to be to get through what fate has thrown at them. Gage's Serenity is book five in the Honey Creek Den Series. Each book contains a fated mate pair, Mpreg, lots of knotting during growly sexy times, and babies. Did I mention babies and pregnant omegas? So many pregnant omegas! These alphas will do anything for their mates, just read and see. The Honey Creek Den Series is meant to be read in order, and these books aren't necessarily considered standalones, even though each book focuses on a different couple. This book is intended for adults only as these shifters tend to get growly and don't watch their language. 42,000 words

Arrows of the Queen

Who do you think you are? Part of identity is how people experience their gender. Transphobia is intolerance of any part of the range of gender identity. This accessible, illustrated book offers information, quizzes, comics and true-to-life scenarios to help kids better understand gender identity and determine what they can do to identify and counter transphobia in their schools, homes and communities. Considered from the viewpoint of gender explorers, gender enforcers and witnesses, transphobic behaviour is identified, examined and put into a context that kids can use to understand and accept themselves and others for whatever gender they are -- even if that's no gender at all!

Ryuu is a boy orphaned by violence at a young age. Found by a wandering warrior, he learns he may have more strength than he ever imagined possible. A quiet child, Moriko is forced into a monastic system she despises. Torn from her family and the forest she grew up in, she must fight to learn the skills she'll need to survive her tutelage under the realm's most dangerous assassin. Young, beautiful, and broke, Takako is sold to pay for her father's debts. Thrust into a world she doesn't understand and battles she didn't ask for, she must decide where her loyalties lie. When their lives crash together in a Kingdom on the brink of war, the decisions they make will change both their lives and their Kingdom forever. If they can stay alive. Both a history and an examination of human thought and behavior spanning three thousand years, thrillingly traces the origins of political philosophy from the ancient Greeks to Machiavelli in Book I and from Hobbes to the present age in Book II. Whether examining Lord Acton's dictum that "absolute power corrupts absolutely" or explicating John Stuart Mill's contention that it is "better to be a human dissatisfied than a pig satisfied," Alan Ryan evokes the lives and minds of our greatest thinkers in a way that makes reading about them a transcendent experience. Whether writing about Plato or Augustine, de Toqueville or Thomas Jefferson, Ryan brings a wisdom to his text that illuminates John Dewey's belief that the role of philosophy is less

to see truth than to enhance experience. With this unparalleled tour de force, Ryan emerges in his own right as one of the most influential political philosophers of our time.

Marxism in a Lost Century retells the history of the radical left during the twentieth century through the words and deeds of Paul Mattick. Three biographical themes receive special attention -- the self-taught nature of left-wing activity, Mattick's publishing endeavors, and the nexus of men, politics, and friendship.
