dell'umanità è la storia di come una scimmia insignificante divenne la signora della Terra, capace di scindere il nucleo di un atomo, volare sulla Luna e manipolare il codice genetico della vita. Una squadra di ricercatori – Prehistorik Bill, Dr. Fiction, la detective Lopez – capitanati da Yuval Noah Harari in persona guida il lettore a esplorare il lato selvaggio della storia. L'evoluzione umana viene reinventata come un reality show televisivo; il primo incontro tra Sapiens e Neanderthal è raffigurato attraverso i capolavori dell'arte moderna; l'estinzione dei mammut e delle tigri dai denti a sciabola è raccontata come un giallo. L'adattamento di Sapiens. Da animali a dèi in forma di graphic novel è una rivisitazione radicale e profondamente divertente della storia dell'umanità a partire dal longseller internazionale

Una aproximación a uno de los misterios más complejos de la humanidad: el nacimiento de la escritura. El libro de Ferrara es un ensayo de divulgación sobre una de las creaciones más importantes de la humanidad: la escritura, que ha surgido en distintos lugares, en distintas épocas, de forma independiente, a partir de cero. Desde los grabados de las tablillas cretenses hasta los signos de la Isla de Pascua, China, México o Mesopotamia, pero también desde los albores de la civilización hasta épocas recientes, asistimos a un apasionante viaje por los misterios de los signos, que

nacen del empeño por organizar las relaciones sociales o bien son esforzadas creaciones solitarias, incluso con carácter lúdico. Si la piedra Rosetta nos permitió comprender los jeroglíficos, existen sistemas aún no descifrados, como el manuscrito Voynich, el quipu de los incas o el disco de Festo. Este libro nos invita a pensar sobre nuestra capacidad comunicativa, que va desde las inscripciones rupestres hasta el imprevisible camino de una escritura del futuro: los emojis, que conectan directamente con los orígenes icónicos de la expresión escrita.

IL SECONDO VOLUME DELLA VERSIONE ILLUSTRATA DEL BESTSELLER INTERNAZIONALE SULLA STORIA DELL' UOMO. Quando Homo sapiens addomesticò alcuni animali e certe piante, poté abbandonare lo stile di vita nomade per adottarne uno sedentario. Vivere insieme agli altri stimolò la nascita di credenze e miti condivisi. Grazie a un immaginario comune i gruppi umani, nel frattempo accresciuti di numero, si lanciarono in progetti sempre più ambiziosi come la fondazione di città e regni, dando vita alle prime civiltà della storia. Questo secondo volume del graphic novel tratto dal bestseller Sapiens. Da animali a dèi continua la narrazione là dove Yuval Noah Harari l'aveva lasciata: Homo sapiens è l'unico a essere sopravvissuto all'estinzione delle altre specie umane e di gran parte dei

Come abbiamo fatto ad arrivare a questo punto? Noi, l'Homo sapiens, governiamo il mondo perché siamo gli unici animali che credono nel potere dell'immaginazione. Il libro del dott. Yuval Noah Harari sui sapiens è un capolavoro, unico nel suo genere. Mentre altri libri si concentrano sulla parte storica o su quella biologica del nostro essere umani, "Sapiens" si concentra sulle tre grandi rivoluzioni della storia dell'uomo: quella cognitiva, quella agricola e quella scientifica.

"Non c'è una sola cosa vera. Tutto è vero" – Yuval Noah Harari Il dott. Harari ora ci suggerisce di guardare avanti, perché le cose cambieranno. L'uomo ha rivoluzionato non solo il nostro mondo, ma anche noi stessi. Siamo cresciuti, siamo migliorati e ci siamo trasformati. E questa trasformazione non si fermerà. Dove ci porterà? Dove arriveremo, e cosa stiamo diventando? (Nota: Questo riassunto è stato completamente scritto e pubblicato da readtrepreneur.com e non è affiliato in alcun modo con l'autore originario)

This book aims to provide bases for reasoning on what challenges urban-architectural design for vulnerable communities will face in the coming years. Several issues, such as technological development, climate change, political crisis and economic uncertainties show as traditional strategies and methodologies are not sufficient to deeply solve the problems of these complex realities.

These new changes, which are studied in different fields of knowledge, highlight the fact that the development of effective solutions must be characterized by multidisciplinary approaches and must be based on strategies promoted by different disciplines. For this reason, this contributed volume collects contributions and considerations from experts in various fields of knowledge working in different parts of the world, such as the Americas, Europe and Asia. The goal is precisely to provide the reader with

In *Good to Eat*, best-selling author Marvin Harris leads readers on an informative detective adventure to solve the world's major food puzzles. He explains the diversity of the world's gastronomic customs, demonstrating that what appear at first glance to be irrational food tastes turn out really to have been shaped by practical, economic, or political necessity. In addition, his smart and spirited

treatment sheds wisdom on such topics as why there has been an explosion in fast food, why history indicates that its bad to eat people but good to kill them, and why children universally reject spinach. Good to Eat is more than an intellectual adventure in food for thought. It is a highly readable, scientifically accurate, and fascinating work that demystifies the causes of myriad human cultural differences.

**ADVERSARY** One morning, a man shaves off his long-worn moustache, hoping to amuse his wife and friends. But when nobody notices, or pretends not to have noticed, what started out as a simple trick turns to terror. As doubt and denial bristle, and every aspect of his life threatens to topple into madness - a disturbing solution comes into view, taking us on a dramatic flight across the world.

Yuval Noah Harari ' s #1 New York Times bestseller, focuses on the Agricultural Revolution—when humans fell into a trap we ' ve yet to escape: working harder and harder with diminishing returns. What if humanity ' s major woes—war, plague, famine and inequality—originated 12,000 years ago, when Homo sapiens converted from nomads to settlers, in pursuit of the fantasy of productivity and efficiency? What if by seeking to control plants and animals, humans ended up being controlled by kings, priests, and Kafkaesque bureaucracy? Volume 2 of Sapiens: A Graphic History—The Pillars of Civilization explores

a crucial chapter in human development: the Agricultural Revolution. This is the story of how wheat took over the world; how an unlikely marriage between a god and a bureaucrat created the first empires; and how war, plague, famine, and inequality became an intractable feature of the human condition. But it ' s not all doom and gloom with this book ' s cast of entertaining characters and colorful humorous scenes. Yuval, Zoe, Prof. Saraswati, Cindy and Bill (now farmers), Detective Lopez, and Dr. Fiction, all introduced in Volume 1, once again travel the length and breadth of human

into its nature and origin.

The history of European integration did not begin in the aftermath of the 20th century AD: only the epilogue of a very long political, religious and socio-cultural formation process that started with the great adventure of Alexander the Great and his impromptu universal empire. In the centuries that followed, Europe became a land of immigration of peoples of Asian origin and Indo-European matrix, who found themselves on a continent that had emerged from the ice and occupied their own 'living space'. People still essentially present today who recognise

themselves in Europe as an entity that retains its own characteristic identity in political, religious and historical-cultural terms. This book tells the story of the forces and ideas that enabled different 'gentes' to integrate and live together through facts, characters, thoughts, faiths, royal dynasties and power struggles. The text is conceived with a plural thematic structure that aims to reflect the various European 'souls' and offer each specific interpretation. The Introduction sets out principles, concepts, questions, but also the philosophical/cultural paths along which the overall

European culture was formed, even if not entirely homogeneous and for long periods dramatically conflicting, highlighting the turning milestones of the common continental thought thanks to an oriental and classical philosophical discourse. Part One, on the other hand, recounts the history of European events, personalities and evolutionary lines, with a Greek historical approach, relating them to the action and function of the Empire (especially the Christian one), which over the centuries 'attracted' the various peoples settled in Europe and trained them in a model of civilisation and socio-political organisation

still visible today in every corner of the continent: the formation of the European states and nations now included in the EU is thus the product of the 'budding' of the Empire over two thousand years. Part Two examines the evolution of European legal and political thought using the method of Roman jurist treatises, following the development of the function of auctoritas, from its first configuration in the ancient Res Publica of Rome through the medieval, renaissance and modern eras to demonstrate the continuity of its conceptual reworking in every political and legal form of power

Part Three is a synthesis of the history of Christianity, from the events of the first 'communities' formed in the imperial age and then spread to the whole of Europe thanks to the evangelical action of the missionary monks and the policy of Christianization of the peoples of Europe conducted by the Empire and the institutional Church, under the sign of the biblical eschatological vision of 'salvation for all believers in Christ' which has an evident Jewish matrix and draws strength
