

### Science Comics: Coral Reefs: Cities Of The Ocean

Furious floods, looming landslides, terrifying tornadoes, ferocious forest fires! Is Mother Nature trying to tell us something? As “ snowpocalypse ” descends once again, one temperamental weatherman is determined to set the record straight on the myths and misconceptions surrounding the elements. What is the difference between weather and climate? How do weather satellites predict the future? Can someone outrun a tornado? Does the rotation of the Earth affect wind currents? And does meteorology have anything to do with meteors? Stormin ’ Norman Weatherby is gearing up to answer all your wildest questions! Get ready to explore the depths of the ocean, the farthest reaches of space, and everything in between! These gorgeously illustrated graphic novels offer wildly entertaining views of their subjects. Whether you’re a fourth grader doing a natural science unit at school or a thirty-year-old with a secret passion for airplanes, Science Comics is for you!

"In an era of dirigibles and hot air balloons, the Wright brothers were among the first innovators of heavier-than-air flight. But in the hotly competitive international race toward flight, Orville and Wilbur were up against a lot more than bad weather. Mechanical failures, lack of information, and even other aviators complicated the Wright brothers' journey. But thanks to their carefully recorded experiments and a healthy dash of bravery, the Wright brothers' flying machines took off" -- Page [4] of cover.

Every volume of Science Comics offers a complete introduction to a particular topic--dinosaurs, coral reefs, the solar system, volcanoes, bats, flying machines, and more. These gorgeously illustrated graphic novels offer wildly entertaining views of their subjects. Whether you're a fourth grader doing a natural science unit at school or a thirty-year-old with a secret passion for airplanes, these books are for you! This volume: in Coral Reefs, we learn all about these tiny, adorable sea animals! This absorbing look at ocean science covers the biology of coral reefs as well as their ecological importance. Nonfiction comics genius Maris Wicks brings to bear her signature combination of hardcore cuteness and in-depth science.

Get ready to explore the depths of the ocean, the farthest reaches of space, and everything in between! Volcanic eruptions, vampire bats, feathered velociraptors, and more await you in SCIENCE COMICS. In a not-so-distant future our world is as cold as a frozen burrito. But can humanity save itself by harnessing a power that dwells inside the Earth? Explode into the world of geology in Volcanoes: Fire and Life! A lot of magic happens under the Earth's crust. Thanks to magma vents, shifting continental plates, and volcanic eruptions, we know that our planet is alive and in motion. Alongside Aurora, a young explorer, you'll learn that volcanoes are just one of the massively powerful forces at work on our planet. From catastrophic destruction to the creation of new land masses, volcanoes have made their mark on our amazing Earth.

*Solve riddles with Squirrel as he travels to the walled city of bees, the fireless tea plantation of mice, and treacherous desert full of tricksters in this beautifully written and creative debut adventure. Squirrel never expected to be anything other than a slave: the last animal slave in Bimmau. That is, until he is invited to a high profile wedding and takes a sip of the forbidden ceremonial wine, unlocking a mysterious riddle. The riddle reveals that there is a key which has the power to grant Squirrel his freedom (and a name!), but also could enslave anyone in Bimmau. Disastrous if it falls into the wrong hands! Squirrel and his friends find themselves in a race to find Brittle's Key before the army of crows gets to him...and before the mysterious Colonel finds the key first.*

*A group of beetles discover that a whole world lies outside of their own small civilization.*

*In Science Comics: The Digestive System, visit the inside of your mouth, stomach, liver, intestines, and other organs that make up the gastrointestinal tract! Your guide to the gut is a friendly bacterium who will take you on a journey beyond imagination. Uncover how food is transformed into nutrients! Explore strange and dangerous glands! Behold the wonders of saliva, mucus, and vomit! Writer Jason Viola and illustrator Andy Ristaino provide a trip to the toilet you will never forget! Every volume of Science Comics offers a complete introduction to a particular topic—dinosaurs, the solar system, volcanoes, bats, robots, and more! Whether you're a fourth grader doing a natural science unit at school or a thirty-year-old with a secret passion for airplanes, these graphic novels are for you!*

*Written by service learning expert Cathryn Berger Kaye and celebrity ocean spokesperson Philippe Cousteau, Going Blue educates young people about the earth's water crisis and gives them tools and inspiration to transform their ideas into action. With lively photos and practical suggestions, the book helps teens plan and do a meaningful service project that benefits our planet's water system. Along the way, readers learn about issues such as clean water access, coral reef damage, runoff pollution, trash islands, factory fishing, bottled water, and much more. This combination of academic learning and community service is at the heart of the fast-growing teaching strategy known as service learning. Going Blue is divided into the five stages of service learning: investigation, preparation, action, reflection, and demonstration. Special sections include a history of ocean exploration with a profile of Jacques Cousteau; an interview with Philippe Cousteau; stories of young people around the world addressing water issues; book and Web resources; and an afterword for adults.*

Every volume of Science Comics offers a complete introduction to a particular topic—dinosaurs, coral reefs, the solar system, volcanoes, bats, flying machines, and more. These gorgeously illustrated graphic novels offer wildly entertaining views of their subjects. Whether you're a fourth grader doing a natural science unit at school or a thirty-year-old with a secret passion for airplanes, these books are for you! This volume: In PLAGUES, we get to know the critters behind history's worst diseases. We delve into the biology and mechanisms of infections, diseases, and immunity, and also the incredible effect that technology and medical science have had on humanity's ability to contain and treat disease.

Every volume of Science Comics offers a complete introduction to a particular topic—dinosaurs, coral reefs, the solar system, volcanoes, bats, flying machines, and many more. These gorgeously illustrated graphic novels offer wildly entertaining views of their subjects. Whether you're a fourth grader doing a natural science unit at school or a thirty-year-old with a secret passion for airplanes, these books are for you! In Trees: Kings of the Forest we follow an acorn as it learns about its future as Earth's largest, longest-living plant. Starting with the seed's germination, we learn about each stage until the tree's maturation, different types of trees, and the roles trees take on in our ecosystem.

Learning that his wise mentor, Takiza, may have been responsible for his father's death, Gray begins questioning everything he ever believed while preparing for an imminent war against dangerous prehistoric sea monsters.

A beautiful and engaging guide to global warming's impacts around the world "The direction in which our planet is headed isn't a good one, and most of us don't know how to change it. The bad news is that we will experience great loss. The good news is that we already have what we need to build a better future." —from the introduction Our planet is in peril. Sea levels are rising, oceans are acidifying, ice is melting, coasts are flooding, species are dying, and communities are faltering. Despite these dire circumstances, most of us don't have a clear sense of how the interconnected crises in our ocean are affecting the climate system, food webs, coastal cities, and biodiversity, and which solutions can help us co-create a better future.

Through a rich combination of place-based storytelling, clear explanations of climate science and policy, and beautifully rendered maps that use a unique ink-on-dried-seaweed technique, The Atlas of Disappearing Places depicts twenty locations across the globe, from Shanghai and Antarctica to Houston and the Cook Islands. The authors describe four climate change impacts—changing chemistry, warming waters, strengthening storms, and rising seas—using the metaphor of the ocean as a body to draw parallels between natural systems and human systems. Each chapter paints a portrait of an existential threat in a particular place, detailing what will be lost if we do not take bold action now. Weaving together contemporary science and speculative “future histories” for each place, this work considers both the serious consequences if we continue to pursue business as usual, and what we can do—from government policies to grassroots activism—to write a different, more hopeful story. A beautiful work of art and an indispensable resource to learn more about the devastating consequences of climate crisis—as well as possibilities for individual and collective action—The Atlas of Disappearing Places will engage and inspire readers on the most pressing issue of our time. Locations include: Houston, Texas Shanghai, China Hamburg, Germany San Juan, Puerto Rico New York City, New York Pisco, Peru Kisite, Kenya Kure Atoll, Hawaii Camden, Maine The Cook Islands San Francisco, California Norfolk, Virginia B?n Tre, Vietnam Ise, Japan Gravesend, United Kingdom

Science Comics: Cats

The story of the urgent fight to save coral reefs, and why it matters to us all Coral reefs are a microcosm of our planet: extraordinarily diverse, deeply interconnected, and full of wonders. When they’re thriving, these fairy gardens hidden beneath the ocean’s surface burst with color and life. They sustain bountiful ecosystems and protect vulnerable coasts.

Corals themselves are evolutionary marvels that build elaborate limestone formations from their collective skeletons, broker symbiotic relationships with algae, and manufacture their own fluorescent sunblock. But corals across the planet are in the middle of an unprecedented die-off, beset by warming oceans, pollution, damage by humans, and a devastating pandemic. Juli Berwald fell in love with coral reefs as a marine biology student, entranced by their beauty and complexity. Alarmed by their peril, she traveled the world to discover how to prevent their loss. She met scientists and activists operating in emergency mode, doing everything they can think of to prevent coral reefs from disappearing forever. She was so amazed by the ingenuity of these last-ditch efforts that she joined in rescue missions, unexpected partnerships, and risky experiments, and helped rebuild reefs with rebar and zip ties. Life on the Rocks is an inspiring, lucid, meditative ode to the reefs and the undaunted scientists working to save them against almost impossible odds. As she also attempts to help her daughter in her struggle with mental illness, Berwald explores what it means to keep fighting a battle whose outcome is uncertain. She contemplates the inevitable grief of climate change and the beauty of small victories.

Depicts " ... a host of marine creatures for whom the coral reef is home: seahorse, butterflyfish, hawksbill turtle, parrotfish, octopus, damselfish, moray eel, sea cucumber, dolphin, hydromedusa jellyfish, sea dragon, royal empress angelfish, triggerfish, moorish idol and many more. Detailed captions provide a fascinating overview of the great diversity of life on coral reefs"--Back cover.

Every volume of Science Comics offers a complete introduction to a particular topic--dinosaurs, coral reefs, the solar system, volcanoes, bats, flying machines, and more. These gorgeously illustrated graphic novels offer wildly entertaining views of their subjects.

With Science Comics, you can explore the depths of the ocean, the farthest reaches of space, and everything in between! These gorgeously illustrated graphic novels offer wildly entertaining views of their subjects. In this volume, Fahama has been kidnapped by a mad scientist and his zombie assistant, and they are intent on stealing her brain! She'll need to learn about the brain as fast as possible in order to plan her escape! How did the brain evolve? How do our senses work in relation to the brain? How do we remember things? What makes you, YOU? Get an inside look at the human brain, the most advanced operating system in the world . . . if you have the nerve!

What's a knight's greatest power? Stories, of course! From the beloved author/illustrator team behind The Snatchabookcomes the ultimate storytime book about castles, knights, dragons, and the power of stories! Even dragons love a good story... Leo was a gentle knight in thought and word and deed. While other knights liked fighting, Leo liked to sit and read... When Leo's mom and dad pack him off to fight a dragon, he takes a shield, a sword--and a pile of his favorite books. But can a story be as mighty as a sword? This delightful rhyming story about books and the joy of reading is also perfect for kids who love dragon books, adventures, brave knights, and books about castles! An Autumn 2016 Kids Indie Next Pick
A 2017-2018 SSYRA Jr. List Title
Praise for The Snatchabook: #1 Indie Next Pick "I dare you to try to read The Snatch-a-book silently to yourself. You can't do it. The book is so wonderful it demands to be read out loud. And besides, if you didn't read the book out loud, how would the Snatch-a-book hear it?"--Caldecott Medalist Brian Selznick "This ever-so-sweet story begs to be read out loud."--Booklist "The gorgeous illustrations are a perfect match for the lively text. This book is a fabulous fit for both storytime and one-on-one reading. Children will be begging for this book to be read to them every night-clever ones will claim they want to keep the Snatchabook happy."--School Library Journal "The husband-and-wife team of the Dochertys have a winner in this heartwarming tribute to the essential role of bedtime reading in the lives of families."--Publishers Weekly "The story is sweet and the illustrations darling."--Kirkus "This whodunit with an uplifting ending will appeal to fans of How the Grinch Stole Christmas! . . . [it] celebrates bedtime reading as a ritual to be revered, and features a thief who merely wants to share in the fun."--Shelf Awareness Pro

Every volume of Science Comics is a complete introduction to a particular topic--dinosaurs, coral reefs, the solar system, volcanoes, bats, flying machines, and more. These gorgeously illustrated graphic novels offer wildly entertaining views of their subjects. Whether you're a fourth grader doing a natural science unit at school or a thirty-year-old with a secret passion for airplanes, these books are for you!This volume: In Sharks, we explore one of the most unfairly villainized and Hollywood-famous underwater predators. With their 400-million year history, their vital role in maintaining the ecosystem, their incredible specialized adaptations, and their various unique species, there is a lot more to sharks than just their ferocious jaws.

Coral reefs are beautiful underwater cities that bustle with excitement and activity. From clown fish to spiny lobsters, hundreds of plants and animals live on coral reefs, making them one of nature's greatest treasures. What happens during a typical day in these marine metropolises? Read and find out!

With Science Comics, you can explore the depths of the ocean, the farthest reaches of space, and everything in between! These gorgeously illustrated graphic novels offer wildly entertaining views of their subjects. In this voume, get up close and personal with Earth's nearest neighbors—Venus with its acid rainstorms, Saturn and its rings of ice, and the heart of it all, the Sun. Humans have always been fascinated by outer space and we’re learning more about our solar system every day. Did you know that our Solar System was born from a cloud of cosmic dust? That Jupiter’s red spot is really a raging storm? Join Sara, Jill, and their space-faring pets on a quest to learn more about the wonders of our Solar System—and beyond!

In Bats, we follow a little brown bat whose wing is injured by humans on a nature hike. He is taken to a bat rehabilitation center where he meets many different species of bats. They teach him how they fly, what they eat, and where they like to live --

In factories! In the sky! In your cars and phones! In your own home! Robots are everywhere! And they have been for a lot longer than you might realize. From tea-serving robots in feudal Japan to modern rovers exploring Mars, robots have been humanity's partners, helpers, and protectors for centuries! Join one of the world's earliest robots, a mechanical bird named Pouli, as he explores where robots came from, how they work, and where they're going in this informative and hilarious new book! Ever dreamt of building your own best friend? It might be easier than you think! Every volume of Science Comics offers a complete introduction to a particular topic—dinosaurs, coral reefs, the solar system, volcanoes, bats, flying machines, and more. These gorgeously illustrated graphic novels offer wildly entertaining views of their subjects. Whether you're a fourth grader doing a natural science unit at school or a thirty year old with a secret passion for airplanes, these books are for you!

From the creator of the worldwide bestsellers Secret Garden and Lost Ocean, a beautiful new adult coloring book, printed on ivory paper and featuring delicate tangles of holly and ivy, bauble-laden Christmas trees, and mountains of exquisitely wrapped gifts. From flurries of delicate snowflakes to deliciously decorated gingerbread houses and reindeer-led sleighs, Johanna's Christmas is a celebration of this wonderful holiday season that invites you to pick up your pens and pencils to color, complete, or embellish each of the festive artworks. Each of the 37 images in this book is printed single-sided on perforated paper, so you can color and remove the images—the perfect frameable holiday gift! Now printed on specially selected ivory paper. This paper has been specifically created for Johanna Basford's coloring books. It has a medium tooth which is perfect for creating beautiful colored pencil effects or chalk pastel backgrounds but also wonderful for pens, which will glide effortlessly over its surface.

These beautifully drawn, educational comics combine fun science facts about marine life, kid-friendly wit, and a strong environmental message. From whale vomit to bone-eating worms, narwhals to sea dragons, Squidtoons presents real ocean science in a series of entertaining, easy-to-understand comics. Venture from the seashore to the deep sea, and learn about the ocean's diverse life forms straight from the experts.

Scales, tails, flippers and fins—let's dive into the ocean! Touch And Explore™ is Twirl's multisensory series for children who want to do more than just listen! Already bestsellers in their original French editions, these well-crafted interactive titles encourage hands-on engagement, learning, and knowledge retention. What's rough, scaly, smooth, or bumpy? What crawls or dives? In this splashy treat for visual learners and pre-readers kids can discover the facts, feel, and functions of over two dozen marine animals. They'll touch shiny scales and bumpy barnacles, turn a flap to find a clownfish hiding among the anemone, touch a shark's sandpapery skin, and discover who can squirt ink and change color! This sea-feast for eyes and hands will encourage kids to immerse themselves in a fascinating beyond-the-bathtub habitat. It's a trip to an underwater world that's just a touch away!

In the graphic novel Astronauts: Women on the Final Frontier, Jim Ottaviani and illustrator Maris Wicks capture the great humor and incredible drive of Mary Cleave, Valentina Tereshkova, and the first women in space. The U.S. may have put the first man on the moon, but it was the Soviet space program that made Valentina Tereshkova the first woman in space. It took years to catch up, but soon NASA's first female astronauts were racing past milestones of their own. The trail-blazing women of Group 9, NASA's first mixed gender class, had the challenging task of convincing the powers that be that a woman's place is in space, but they discovered that NASA had plenty to learn about how to make space travel possible for everyone.

Leave no brick unturned in John Kerschbaum's Science Comics: Skyscrapers, the latest volume in First Second's action-packed nonfiction graphic novel series for middle-grade readers! Every volume of Science Comics offers a complete introduction to a particular topic—dinosaurs, the solar system, volcanoes, bats, robots, and more. These gorgeously illustrated graphic novels offer wildly entertaining views of their subjects.

Whether you're a fourth grader doing a natural science unit at school or a thirty-year-old with a secret passion for airplanes, these books are for you! In this volume, join a pair of superheroes as they uncover the secrets of skyscrapers, from the great Egyptians pyramids to the world's tallest building. Read along and learn how skyscrapers are a bold combination of applied physics, ingenuity, and a lot of hard work!

Spread your wings with Science Comics: Birds of Prey, a new and exciting volume of First Second's nonfiction graphic novel series! Every volume of Science Comics offers a complete introduction to a particular topic—dinosaurs, the solar system, volcanoes, bats, robots, and more. Whether you're a fourth grader doing a natural science unit at school or a thirty-year-old with a secret passion for airplanes, these graphic novels are for you! In this volume, you'll get up-close and personal with some of the world's most skilled hunters, from the majestic eagle to the oft-maligned scavenger vulture! Armed with razor-sharp claws, keen eyesight, powerful wings, and killer instincts, these stealthy predators can make a meal of rodents, fish, snakes, lizards, monkeys, and even kangaroos! Discover how these amazing birds who are often at the top of the food chain, play an integral role in many different ecosystems around the world.

Our Coasts and Oceans in the Climate Crisis

"Surf the web" with this volume of Science Comics, First Second's action-packed nonfiction graphic novel series! When a sister and brother agree to help a talking spider find her missing child, they don't realize that it will take them on a journey across the globe! Along the way they'll meet spiders who live in every environment imaginable, from their own backyard to the Australian Outback. Although they seem scary at first, once you learn why spiders have gotten such a bad reputation you'll see that they are actually here to help!

Earle takes children on an undersea journey to explore an amazing "underwater city." She explains the formation of coral reefs and provides information about the conditions needed for survival. In addition, the author introduces other animals that live in and near the reef and stresses the importance of protecting corals from pollution. Matthews's ink-and-gouache paintings bring the colors and variety of this habitat to life. The book also includes a simple experiment that demonstrates how "filter feeders" strain food from the water.

Welcome to the Human Body Theater, where your master of ceremonies is going to lead you through a theatrical revue of each and every biological system of the human body! Starting out as a skeleton, the MC puts on a new layer of her costume (her body) with each "act." By turns goofy and intensely informative, the Human Body Theater is always accessible and always entertaining. Maris Wicks is a biology nerd, and by the time you've read this book, you will be too! Harnessing her passion for science (and her background as a science educator for elementary and middle-school students), she has created a comics-format introduction to the human body that will make an expert of any reader -- young or old!

"This absorbing look at ocean science covers the biology of coral reefs as well as their ecological importance."--Amazon.com.

That's something to crow about! Learn all about these genius birds in Kyla Vanderklug's Science Comics: Crows, the latest volume in First Second's action-packed nonfiction graphic novel series for middle-grade readers! Every volume of Science Comics offers a complete introduction to a particular topic—dinosaurs, the solar system, volcanoes, bats, robots, and more. These gorgeously illustrated graphic novels offer wildly entertaining views of their subjects. Whether you're a fourth grader doing a natural science unit at school or a thirty-year-old with a secret passion for airplanes, these books are for you! Did you know that crows make their own tools, lead complex social lives, and never forget a human face? Scientists are just beginning to unlock the secrets of the crow's brain to discover how these avian Einsteins can be as smart as some primates, and even perform some of the same cognitive feats as human children! Crows have problem-solving skills that will make you you rethink what it means to be a bird brain!

Dive deep with Science Comics: Whales, a new and exciting volume of First Second's nonfiction graphic novel series! Every volume of Science Comics offers a complete introduction to a particular topic—dinosaurs, the solar system, volcanoes, bats, robots, and more. Whether you're a fourth grader doing a natural science unit at school or a thirty-year-old with a secret passion for airplanes, these books are for you! In this volume, Zip, an enthusiastic beaked whale, is eager to share everything he can about whale pods by broadcasting his very own undersea podcast! He will travel across the global ocean interviewing a diverse assortment of whales and dolphins about their amazing behaviors and habitats, as well as their interactions with the human world. Can this one small whale tell the story of the whole ocean and the interconnectivity that affects us all?

In Dan Zettwoch's Science Comics: Cars, you'll learn where cars came from and how they work. When you pop the hood, what are you looking at? How does gasoline—or electric batteries, or even steam—make a car move? Rev up your motor and take look at the combustible history of the automobile and its explosive effects on our modern lives. Every volume of Science Comics offers a complete introduction to a particular topic—dinosaurs, the solar system, robots, and more. Whether you're a fourth grader doing a natural science unit at school or a thirty year old with a secret passion for airplanes, these books are for you!

This format is designed to be read on color devices and cannot be read on black-and-white e-readers. In Andy Hirsch's Science Comics: Cats, we meet feline friends from the tiniest kodkod to the biggest tiger, and find out what makes your neighborhood domestic cats so special. Equipped with teeth, claws, and camouflage to survive everywhere from deserts to mountaintops, how did these ferocious felines make the leap from predators to playmates... and are they even done leaping? Every volume of Science Comics offers a complete introduction to a particular topic—dinosaurs, the solar system, robots, and more. Whether you're a fourth grader doing a natural science unit at school or a thirty year old with a secret passion for airplanes, these books are for you!
