Since the very beginnings of the digital humanities, Papyrology has been in the vanguard of the application of information technologies to its own scientific purposes, for both theoretical and practical reasons (the strong awareness towards the problems of human memory and the material ways of preserving it; the need to work with a multifarious and overwhelming amount of different data). After more than thirty years of development, we have now at our disposal the most

advanced tools to make papyrological studies more and more effective, and even to create a new conception of "papyrology" and a new model of "edition" of the ancient documents. At this turning point, it is important to build an epistemological framework including all the different expressions of Digital Papyrology, to trace a historical sketch setting the background of the contemporary tools, and to provide a clear overview of the current theoretical and technological trends, so that all the possibilities currently available can be exploited following uniform pathways. The volume represents an innovative attempt to deal with such topics, usually relegated into

The first monograph on the most important Byzantine redactor of saints' lives this book offers a detailed study of the life and working methods of Symeon Metaphrastes, who was active towards the end of the tenth century. The importance of the Metaphrastic redaction has

often been measured by the amount of damage it did to the late-antique hagiographical texts, but in the present study it is seen as the culmination of long-term developments within this field. The Metaphrastic collection is studied in the context of its predecessors and in the gradual changes that occurred in the production of hagiography, especially as to the social background of authors, commissioners, and even saints. Emphasis is laid on the gradual redistribution, centralisation and upgrading of hagiographical texts that took place in the Greek world. And in this process rewriting is seen as a vehicle for a canonisation which, even if never instituted in Byzantium, was the intention and, to some degree, the outcome of the Metaphrastic redaction.
