

Sketchy Muma: What It Means To Be A Mother

A companion guide to the incredibly successful book *Baby Whispering*, which covered the first year of a baby's life. This new book covers the following four years, divided into two main age groups (1–2 1/2 and 2 1/2 –5) looking at commonly asked questions from parents, plus material on routines, significant changes during these times, sleeping, eating, toilet training, screen time, behaviour management, sibling adjustment, different personalities, child care options and more. All this is covered simply and in a very easy-to-read manner that the tiredest of parents will be able to understand.

Presents mature and scholarly retellings of fifty favorite and lesser-known fairy tales on the two hundredth anniversary of the Grimm brothers' "Children's and Household Tales," in a volume that includes such stories as "Cinderella," "Rapunzel," and "Briar-Rose."

A celebration of the revolutionary potential of women working with other women, and a powerful statement about myths like the "cool girl" or the "catty workplace" Covens. Girl Bands. Ballet troupes. Convents. In all times and places, girls and women have come together in communities of vocation, of necessity, of support. In *Witches*, Sam George-Allen explores how wherever women gather, magic happens. Female farmers change the way we grow our food. Online beauty communities democratize skin-care rituals. And more than any other demographic, it's teen girls that shape our culture. Patriarchal societies have long been content to champion boys' clubs, while viewing groups that exclude men as sites of rivalry and suspicion. This deeply personal investigation takes us from our workplaces to our social circles, surveying our heroes, our outcasts, and ourselves, in order to dismantle the persistent and pernicious cultural myth of female isolation and competition . . . once and for all.

In its comprehensive analysis of a wide range of primary and secondary sources in both Chinese and Western languages, this authoritative work stands as the definitive study of the theory, implementation and legacy of the Chinese Communist Party's thought-remolding campaign. This decades-long campaign involved the extraction of confessions from millions of Chinese citizens suspected of heterodoxy or disobedience to party dictates, along with their subjection to various forms of "re-education" and indoctrination. Hu Ping's carefully structured overview provides a valuable insider's perspective, and supersedes the previous landmark study on this vastly interesting topic.

Five Minute Mum: Give Me Five

The Honest Mum's Guide to Surviving and Thriving at Work and at Home

"The 1,165 entries of Handbooks and Anthologies for Officials in Imperial China by Pierre-Étienne Will and collaborators provide a descriptive list of extant manuscript and printed works-mainly from the Song, Ming, and Qing dynasties-created with the aim to instruct officials and other administrators of imperial China about the technical and ethical aspects of government, and to provide tools and guides to help with the relevant procedures. Both generalist and specialized texts are considered. Among the latter, such disciplines as the administration of justice, famine relief, and the military receive particular attention. Each entry includes the publishing history of the work considered (including modern editions), an analysis of contents, and a biographical sketch of the author."--

Lunarbaboon shares life's parenting moments from the perspective of a 30-something dad/husband/chaos survivor. Together with the savvy, laid back Mom, wild child Moishe, baby Matilda, and a former Julliard student (their cat), Lunarbaboon must navigate the family and social dynamics of everyday life. Ranging from the hilarious (defeating closet monsters with a "stun" blaster that offers surprising facts about bears, Mars, and cats) to the sweet (the gray scale-to color transition out of depression at the touch of a loved one), this collection explores the bonds within a family and all the characters who bring both order and chaos to life. Lunarbaboon's perfect meld of crabby humor and moments of impactful honesty give these comics a wide range and distinctive voice that's both comical and sincere.

'Anna's sketches never fail to put a smile on my face and make my heart a little warmer.' GIOVANNA FLETCHER *This gorgeous little book charts the various bewildering stages of becoming a mother, from those tell-tale blue lines in the pregnancy test, to labor, birth, coming home and venturing out. Breastfeeding nightmares, eating dinner with one hand, soft play hell and chronic sleep deprivation - but also the sheer beauty of falling in love again and the amazing discovery of what it's like to have a family - these are all captured in Sketchy Muma's glorious drawings. This is the perfect gift book for both young and experienced parents. Anna Lewis understands the light and shade that comes with motherhood, and it is those universal truths that will connect all those parents who delight in her sketches.*

These two works on life's fleeting pleasures are by Buddhist monks from medieval Japan, but each shows a different world-view. In the short memoir Hôjôki, Chômei recounts his decision to withdraw from worldly affairs and live as a hermit in a tiny hut in the mountains, contemplating the impermanence of human existence. Kenko, however, displays a fascination with more earthy matters in his collection of anecdotes, advice and observations. From ribald stories of drunken monks to aching nostalgia for the fading traditions of the Japanese court, Essays in Idleness is a constantly surprising work that ranges across the spectrum of human experience. Meredith McKinney's excellent new translation also includes notes and an introduction exploring the spiritual and historical background of the works. Chômei was born into a family of Shinto priests in around 1155, at a time when the stable world of the court was rapidly breaking up. He became an important though minor poet of his day, and at the age of fifty, withdrew from the world to become a tonsured monk. He died in around 1216. Kenkô was born around 1283 in Kyoto. He probably became a monk in his late twenties, and was also noted as a calligrapher. Today he is remembered for his wise and witty aphorisms, 'Essays in Idleness'. Meredith McKinney, who has also translated Sei Shonagon's The Pillow Book for Penguin Classics, is a translator of both contemporary and classical Japanese literature. She lived in Japan for twenty years and is currently a visiting fellow at the Australian National University in Canberra. [Essays in Idleness is] a most delightful book, and one that has served as a model of Japanese style and taste since the 17th century. These cameo-like vignettes reflect the importance of the little,

fleeting futile things, and each essay is Kenko himself' Asian Student

Anansesem: Telling Stories and Storytelling African Maternal Pedagogies is a composite story on African Canadian mothers' experiences of teaching and learning while mothering. It seeks to celebrate the African mother's everyday experiences and honor her embodied and cultural knowledge as important sites of meaning making and discovery for the African child. Through the Afro-indigenous art of Anansi storytelling, memoir, creative non-fiction and illustrations, the author takes you on an evocative narrative journey that focuses on how African descended women draw upon and are central to African childrens' cultural, social and identity development. In entering these stories, readers access their joys, sadness, strengths and weaknesses as they mother in the midst of marginalization. The book is a testament to the power of counter-storytelling for inspiring internal and external transformation.

A casebook approach to studying crisis communications means learning from the actions of those who have experienced crises. What did they expect? What actually happened? Were they prepared? What were their strategies? What were their challenges, pressures, and problems? Were the news media adversarial or supportive? If they had to do it again, what would they do differently? These and other questions are answered in the case studies of this second edition. Presenting organizational and individual problems that may become crises and the communication responses to these situations, this revision of Fearn-Banks' very successful text: * presents crisis communication theory, including a critique of the communications of White Star Lines after its Titanic sank on its maiden voyage; * describes ways of determining the most likely and most damaging crises that may strike an organization; * centers on causes of crisis--rumor, "gotcha" television news and the non-expert expert, and crises caused by the news media; * gets into the 21st century and cyberspace-caused crises, including mini-cases of rogue Web sites and e-mail rumors; * explains how to communicate with the news media, lawyers, internal publics or audiences, and external publics; and * includes narrated case studies illustrating how spokespersons and managers used communication in several kinds of crises. The text is supplemented by a workbook, enabling students to test their knowledge and develop their skills. Written as a primer for crisis communications, public relations, and communications management, *Crisis Communications* serves as an essential resource in the practice of public relations and corporate communications.

Japan's capital city of Kyoto was devastated by earthquake, storm, and fire in the late 12th century. Retreating from "this unkind world," the poet and Buddhist priest Kamo-no-Chomei left the capital for the forested mountains, where he eventually constructed his famous "ten-foot-square" hut. From this solitary vantage point Chomei produced *Hojoki*, an extraordinary literary work that describes all he has seen of human misery and his new life of simple chores, walks, and acts of kindness. Yet at the end he questions his own sanity and the integrity of his purpose. Has he perhaps grown too attached to his detachment?

Crisis Communications
Kimbanguism
Scuttle Flies: The Phoridae

Facing Mount Kenya, first published in 1938, is a monograph on the life and customs of the Gikuyu people of central Kenya prior to their contact with Europeans. It is unique in anthropological literature for it gives an account of the social institutions and religious rites of an African people, permeated by the emotions that give to customs and observances their meaning. It is characterised by both insight and a tinge of romanticism. The author, proud of his African blood and ways of thought, takes the reader through a thorough and clear picture of Gikuyu life and customs, painting an almost utopian picture of their social norms and the sophisticated codes by which all aspects of the society were governed. This book is one of a kind, capturing and documenting traditions fast disappearing. It is therefore a must-read for all who want to learn about African culture.

Überall auf der Welt haben Menschenrechte im Laufe der Jahre an Bedeutung gewonnen. Trotz dieser Errungenschaften zeigen zahlreiche Ereignisse, die vor allem politisch motiviert sind, dass die Achtung der Menschenrechte in der Praxis leider noch lange nicht überall verwirklicht ist. Bisherige Studien dazu weisen auf eine starke Kluft zwischen Menschenrechtsnormen und Praxis hin. Was bislang in der akademischen Forschung fehlt, sind Studien zu traditionellen Glaubenssystemen. Der vorliegende Band schließt diese Lücke. Mithilfe der Grounded Theory wird der theoretische Hintergrund der Praktiken der Hexenverfolgung in Ghana beleuchtet und die Verbindung zu internationalen Menschenrechten hergestellt.

In this volume, Aurélien Mokoko Gampiot, a sociologist and son of a Kimbanguist pastor, provides a fresh and insightful perspective on African Kimbanguism and its traditions. The largest of the African-initiated churches, Kimbanguism claims seventeen million followers worldwide. Like other such churches, it originated out of black African resistance to colonization in the early twentieth century and advocates reconstructing blackness by appropriating the parameters of Christian identity. Mokoko Gampiot provides a contextual history of the religion's origins and development, compares Kimbanguism with other African-initiated churches and with earlier movements of political and spiritual liberation, and explores the implicit and explicit racial dynamics of Christian identity that inform church leaders and lay practitioners. He explains how Kimbanguists understand their own blackness as both a curse and a mission and how that underlying belief continuously spurs them to reinterpret the Bible through their own prisms. Drawing from an unprecedented investigation into Kimbanguism's massive body of oral traditions—recorded sermons, participant observations of church services and healing sessions, and translations of hymns—and informed throughout by Mokoko Gampiot's intimate knowledge of the customs and language of Kimbanguism, this is an unparalleled theological and sociological analysis of a unique African Christian movement.

Phoridae are probably the insect family with the greatest diversity of larval habits, but the least studied of the large families of flies due to identification difficulties. This book collates what is known about the natural history of the Phoridae world. It reviews eggs and oviposition, larval habits (including saprophages, kleptoparasites, fungus breeders, plant feeders, predator, parasitoids, parasites and enemies), pupae and their enemies, development, adult habits (including feeding, special associations, courtship, mating, phoretic mites and enemies) and ecological aspects. There follows a new user-friendly and extensively illustrated key to world genera and a review of the identification literature for each of the 229 genera recognized. A review of methods and an extensive bibliography complete the work.

Why do people migrate from one country to another? What is the difference between an immigrant and an exile? What determines the psychological outcome of immigration? Can one ever mourn the loss of one's country? What are the defensive functions of nostalgia? Are there specific guidelines for psychotherapy and psychoanalysis for immigrant patients? How can the therapist disentangle the patient's cultural rationalizations from underlying intrapsychic conflicts? In this unique book, psychoanalyst and poet Salman Akhtar provides answers to such questions. He notes that migration from one country to another has lasting effects on an individual's identity. Such identity change involves the dimensions of drives and affects, psychic space, temporality, and social affiliation. Dr. Akhtar addresses the immigrant's idealization and devaluation, closeness and distance, hope and nostalgia, transitional area of the mind, superego change, and linguistic transformation. With poignant clinical vignettes, he illustrates the implications of these ideas for the therapeutic process where the therapist, the patient, or both, are immigrants. Immigration and Identity, replete with poetry and personal letters from immigrant colleagues from many nations, conveys its message with irony, wit, laughter, pain, sadness, empathy, and, above all, clinical and human wisdom.

When two small sisters go fishing to the magic pond, they find something much better than a frog or a newt. They find a bog baby. Small and blue with wings like a dragon, the girls decide to make him their secret. I won't tell if you won't. But the bog baby is a wild thing, and when he becomes poorly, the girls decide they must tell their mum. And she tells them the greatest lesson, if you really love something, you have to let it go. After visiting Russia in 1921, the journalist Lincoln Steffens famously declared, "I have seen the future, and it works." Steffens referred to the social experiment of technological utopianism he found in the Soviet Union, where subway cars and farm tractors would carry the worker and peasant -- figuratively and literally -- into the twentieth century. Believing that socialism and technology together created a brave new world, Boleslaw Bierut of Poland and Kim Il Sung of North Korea -- and other leaders -- joined Russia's Vladimir Lenin and Leon Trotsky in embracing big technology with a verve and conviction that rivaled the western world's. Paul R. Josephson here explores these utopian visions of technology -- and their unanticipated human and environmental costs. He examines the role of technology in communist plans and policies and the interplay between ideology and technological development. He shows that while technology was a symbol of regime legitimacy and an engine of progress, the changes it spurred were not unequivocally positive. Instead of achieving a worker's paradise, socialist technologies exposed the proletariat to dangerous machinery and deadly pollution; rather than freeing women from exploitation in family and labor, they paradoxically created for them the dual -- and exhausting -- burdens of mother and worker. The future did not work. The fall of the Soviet Union in 1991 marked the end of communism's self-proclaimed glorious quest to "reach and surpass" the West. Josephson's intriguing study of how technology both helped and hindered this effort asks new and important questions about the crucial issues inextricably linked with the development and diffusion of technology in any sociopolitical system.

The Delhi Sultanate ruled northern India for over three centuries. The era, marked by the

desecration of temples and construction of mosques from temple-rubble, is for many South Asians a lightning rod for debates on communalism, religious identity and inter-faith conflict. Using Persian and Arabic manuscripts, epigraphs and inscriptions, Fouzia Farooq Ahmad demystifies key aspects of governance and religion in this complex and controversial period. Why were small sets of foreign invaders and administrators able to dominate despite the cultural, linguistic and religious divides separating them from the ruled? And to what extent did people comply with the authority of sultans they knew very little about? By focusing for the first time on the relationship between the sultans, the bureaucracy and the ruled Muslim Rule in Medieval India outlines the practical dynamics of medieval Muslim political culture and its reception. This approach shows categorically that sultans did not possess meaningful political authority among the masses, and that their symbols of legitimacy were merely post hoc socio-cultural embellishments. Ahmad's thoroughly researched revisionist account is essential reading for all students and researchers working on the history of South Asia from the medieval period to the present day.
