tell me if it ever starts getting genuinely insane, right?"—Elon Musk, TED interview

Hamish McKenzie tells how a Silicon Valley start-up's wild dream came true. Tesla is a car company that stood up against not only the might of the government-backed Detroit car manufacturers but also the massive power of Big Oil and its benefactors, the infamous Koch brothers. The award-winning Tesla Model 3, a premium mass-market electric car that went on sale in 2018, has reconfigured the popular perception of Tesla and continues to transform the public's relationship with motor vehicles—much like Ford's Model T did

nearly a century ago. At the same time, company CEO Elon Musk courts controversy and spars with critics through his Twitter account, just as Tesla's ever-increasing debt teeters on junk bond status.... As McKenzie's rigorously reported account shows, Tesla has triggered frenzied competition from newcomers and traditional automakers alike, but it retains an edge because of its expansive infrastructure and the stupendous battery factory it built in the Nevada desert. The popularity of electric cars is growing around the world, especially in China, and McKenzie interviews little-known titans who have the

money and the market access to power a global electric car revolution quickly and decisively. Insane Mode started off as a feature on the dual-motor Tesla Model S, which gave the car Ferrari-like acceleration, but it's also the perfect description of the operating cycle of a company that has sworn it won't rest until every car on the road is electric. Here is a story about the very best kind of American ingenuity and its history-making potential. Buckle up!

Professor Howard J. Wiarda, a leading academic expert on foreign policy, comparative politics, and international

affairs, is the author of more than eighty books. Wiarda has traveled to many of the world's most troubled and exciting places. Now, in the more personal accounts of his global travels, he recalls his foreign research adventures, the countries visited, and the people he met and interviewed along the way. Wiarda's new four-volume set, Exploring the World: Adventures of a Global Traveler, details his travels and foreign adventures since 2006. In these travel books, he tells the stories that lie behind the research, offers his impressions of the countries and regions he has explored, and

considers how and why some have been successful and others not. Volume I in this new series tells the story of Wiarda's 2010 circumnavigation of the globe. Volume II focuses on Europe and the continued importance of European regionalism—despite the bumper stickers advertising "Europe Whole and Free." Volume III deals with Latin America and questions whether the region is really as democratic as we would like it to be. Volume IV provides Wiarda's analysis of Asia's economic miracles while also recounting his recent visits to the Persian Gulf and his assessment of modernization and

development in the Islamic world. Insightful and entertaining, Wiarda's travel narratives offer commentary on important and interesting sites all over the world.

money required yet potentially huge returns? A job where you can truly "work from home" and set your own schedule? Well look no further than an old business with some new ideas...Roadside Assistance! No, this is not the next "get rich quick" scheme. On the contrary, this is a real business with real work, real customers and very real income potential! Right this very minute, someone, somewhere has locked their keys in their car. It happens every day, all day long. And it's not just keys locked inside a car. Drivers in every city and state across the nation (including yours), are constantly in need of jump starts, tire changes, gas delivery and lockout service. The demand is

there and the skills required are minimal, so where are you? At a low paying 9-5? Suit and tie? In between jobs? Perhaps you're just getting out of the military, maybe even a disabled veteran (as I am), trying to transition back into the civilian world. If you've always wanted to be your own boss and you're not scared of a little hard work, maybe it's time to ditch the suit and tie, or put the job search on hold. Maybe this lockout service and roadside assistance (or what we like to call "Lock & Road Service") is the right choice for you! Did you ever wonder what the person who just unlocked your car actually makes for a living? He just charged you \$60, but surely he doesn't get to keep all of it,

Maybe...or just maybe he works from home, out of his car, with a few hundred dollars worth of tools and advertises online, pocketing \$200-\$300+ per day. Maybe he's knocking down six-figures a year, driving around town providing roadside services to other people who are trying to get to their "real" jobs (working for someone else). Meet Jon Taylor, aka MrQuickPick™, founder of Quick Pick Lockout Service and MrQuickPick™ Lock & Road Service. A spirited and incisive survey of economic geography, *A World Made for Money* begins with the author stopped at a red light in Norman, Oklahoma. Observing the landscape of drugstores and banks, and for that matter the stoplight and roads themselves, Bret Wallach observes, "Everything I see has been built to make money" or, at the

very least, to facilitate making money. This, he argues, is a global phenomenon that nonetheless has occurred only within the past hundred years or so. Although guidebooks and culture brokers often disparage these landscapes of commerce, Wallach—recipient of a MacArthur “genius grant”—argues that we would do well to pay them close attention. *A World Made for Money* provides a compelling, condensed tour of our world. From Silicon Valley to Sri Lanka, from post-Soviet Russia to post-apartheid South Africa, Wallach looks at how human beings are buying, manufacturing, working, growing and shipping food, and accessing the natural resources to fuel

it all. These essential facets of daily life, propelled by the profit motive, represent a transnational force shaping our surroundings and environment in ways that may not always be beautiful (or even healthy) but that are fundamental to understanding how the world works in the twenty-first century. Wallach examines the relationship between acquisitiveness and landscape, reveals surprising contradictions and nuances, and provides fresh perspective on politically charged topics such as sprawl, deindustrialization, and agribusiness.
