Protect yourself from identity theft! Nearly 17 million Americans were victimized by identity theft in 2012 alone: for 13 straight years, it has been America's #1 consumer crime. No one is immune: children, the elderly and even the dead have been victimized. Identity theft can be high-tech, low-tech, or even no tech, via "dumpster diving." You're vulnerable, and you need to act. Fortunately, you can take practical steps to safeguard your identity right now. In *Identity Theft Alert*, award-winning author and attorney Steve Weisman shows you exactly what to do, and how to do it. Equally important, he also tells you what to stop doing: the common, inadvertent behaviors that could be setting you up as a victim. Weisman starts with a clear-eyed assessment of the problem, helping you understand just how much risk you face. Next, he helps you understand, anticipate, and prevent all these frightening forms of identity theft: Identity theft via Facebook and other social media Identity theft via your iPhone or Android smartphone Theft of your credit or debit cards, and other access to your finances Crime sprees performed in your name Medical identity theft that could lead to you getting the wrong treatment – and could even kill you The fast-growing scourge of income tax identity theft, including stolen refunds Don't be

**No one wants to think about getting older. It's true. At any age, when things are moving along normally day to day and everyone seems fit and well, there seems no reason to think about future problems that your friends and relatives might (and probably will) come across as they age. In fact, it might even seem a little morbid to think such thoughts, or possibly even tempting fate? Yet there will come a time when you must raise these issues and, ideally, this should be before any problems arise. The Essential Family Guide to Caring for Older People is the ultimate source of information and help for families with care responsibilities. Deborah Stone draws on her extensive experience working in elder care to offer practical advice on every aspect of the field indepth. Topics range from how to get help immediately, legal information, care funding options, a guide to useful technology and advice on the main physical and mental health issues that affect older people. Plus guidance is given on dealing with social services and ensuring you choose the right care for your situations.**

**Stop Telemarketing Calls & Get Paid was written to address the current epidemic of robo-calls in the US. In 2018 alone, there were more than 47 billion robo-calls placed to US consumer cell phones. This is staggering, considering the amount of robo-calls placed just 5-10 years prior. In my book, I will show you a tested and proven, step-by-step process to stop the calls permanently but also how to force these telemarketers to pay you from \$500 to \$1,500 per call that they placed to your cell phone (without your permission). My book shows you how to leverage a small provision that was included in a little-known Federal Law that was passed by the US Congress in 1991. This law is known as the Telephone Consumer Protection Act and it is very long and confusing. My book extracts the only parts of this law that you need to know and none of what you don't need to know. Plus, as an added bonus, my book includes a sample demand letter that can be tailored to fit your specific circumstances. Telemarketers hate**

Over the past decade, 24/7 connectivity has given us not only convenience and fun but worries about privacy, interruptions while working or trying to enjoy family or other downtime, and new compulsions — from shopping to tweeting and cute-cat watching. Anne Katherine, one of the authors who brought boundary setting to a mass audience, has now written a book on how to set healthy boundaries with technology. The first of its kind, this resource doesn't suggest anyone go "cold turkey." Instead, it helps people make social media, smart phones, and other innovations work for, rather than against, them. Readers learn to protect themselves online in every way — from predators and data mining as well as time-devouring friends and acquaintances — with an emphasis on preserving and optimizing meaningful personal connections. Anyone who has ever wondered if their cute little gadget was actually an enemy invader will welcome Katherine's strategies for ensuring "that your life is truly your own."

The Nigerian prince eager to fork over his inheritance, the family friend stranded unexpectedly in Norway, the lonely Russian bear looking for love . . . they spam our inboxes with their hapless pleas for help, money, and your social security number. In Dot Con, Veitch finally answers the question: what would happen if you replied? Suspicious emails pop up in our inboxes and our first instinct is to delete unopened. But what if you responded to the deposed princess begging for money in your Gmail? Veitch dives into the underbelly of our absurd email scam culture, playing the scammers at their own game, and these are the surprising, bizarre, and hilarious results.
