Jesus birthed a movement that was designed to include, engage, and inspire. However, somewhere along the way, Christian leaders began imitating the leaders who went before them instead of imitating Jesus. They became immeshed in church programs and issues of Christian sub-culture. As a result, most never experienced the power of the unstoppable mission of Jesus. Which is based on the reality that every Christ follower can launch a life change movement.

Genesis Begins Again

The most beautiful fish in the entire ocean discovers the real value of personal beauty and friendship.

"Nezhukumatathil ’ s poems contain elegant twists of a very sharp knife. She writes about the natural world and how we live in it, filling each poem, each page with a true sense of wonder." —Roxane Gay “ Cultural strands are woven into the DNA of her strange, lush... poems. Aphorisms...from another dimension. ” —The New York Times “ With unparalleled ease, she ’ s able to weave each intriguing detail into a nuanced, thought-provoking poem that also reads like a startling modern-day fable. ” —The Poetry Foundation “ How wonderful to watch a writer who was already among the best young poets get even better! ” —Terrance Hayes With inquisitive flair, Aimee Nezhukumatathil creates a thorough registry of the earth ’ s wonderful and terrible magic. In her fourth collection of poetry, she studies forms of love as diverse and abundant as the ocean itself. She brings to life a father penguin, a C-section scar, and the Niagara Falls with a powerful force of reverence for life and living things. With an encyclopedic range of subjects and unmatched sincerity, Oceanic speaks to each reader as a cooperative part of the earth, an extraordinary neighborhood to which we all belong. From “ Starfish and Coffee ” : And that ’ s how you feel after tumbling like sea stars on the ocean floor over each other. A night where it doesn ’ t matter which are arms or which are legs or what radiates and how— only your centers stuck together. Aimee Nezhukumatathil is the author of four collections of poetry. Recipient of a National Endowment for the Arts fellowship and the prestigious Eric Hoffer Grand Prize, Nezhukumatathil teaches creative writing and environmental literature in the MFA program at the University of Mississippi.

From the illustrator of the #1 smash hit The Day the Crayons Quit comes a story about wishing, persevering, and reaching for the stars. Once there was a boy, and that boy loved stars very much. So much so that he decided to catch one of his very own. But how? Waiting for them to grow tired from being up in the sky all night doesn't work. Climbing to the top of the tallest tree? No, not tall enough. The boy has a rocket ship . . . but it is made of paper and doesn't fly well at all. Finally, just when the boy is ready to give up, he learns that sometimes things aren't where, or what, we expect them to be. Oliver Jeffers offers a simple, childlike tale of reaching for the stars, and emerging with a friend.

Imagine an organizational model for church leadership that enables the entire team to unleash their full potential. The joy and vigor coming from a collective strength, intelligence, and skill in the community of leaders not only brings greater potency but better yields for your ministry. What would it be like to see this kind of healthy leadership reproduced into the second, third, and fourth generation, on multiple strands? Leveraging the metaphor Ori Brafman popularized in his NYT best-selling book, The Starfish and the Spider, Rob Wegner, Lance Ford, and Alan Hirsch show: How to take a close look at your church’s organizational structure and how to adapt instead of simply adding a certain kind of structural approach. How churches can function without a rigid central authority, making them nimbler in reacting to external forces. How seeding starfish networks inside today’s churches will prepare the church of tomorrow to be agile while maintaining the accountability to be effective. The Starfish and the Spirit is about creating a culture where church leaders view themselves as curators of a community on a mission, not the source of certainty for every question and project. It’s about creating a team of humble leaders “in the middle” of the church, not at the top--leaders who naturally reproduce multiple generations of leaders, from the middle out.

A thoughtful, poignant novel that explores the creation of Artificial Intelligence—illuminating the very human need for communication, connection, and understanding. In a narrative that spans geography and time, from the Atlantic Ocean in the seventeenth century, to a correctional institute in Texas in the near future, and told from the perspectives of five very different characters, Speak considers what it means to be human, and what it means to be less than fully alive. A young Puritan woman travels to the New World with her unwanted new husband. Alan Turing, the renowned mathematician and code breaker, writes letters to his best friend’s mother. A Jewish refugee and professor of computer science struggles to reconnect with his increasingly detached wife. An isolated and traumatized young girl exchanges messages with an intelligent software program. A former Silicon Valley Wunderkind is imprisoned for creating illegal lifelike dolls. Each of these characters is attempting to communicate across gaps—to estranged spouses, lost friends, future readers, or a computer program that may or may not understand them. In dazzling and electrifying prose, Louisa Hall explores how the chasm between computer and human—shrinking rapidly with today’s technological advances—echoes the gaps that exist between ordinary people. Though each speaks from a distinct place and moment in time, all five characters share the need to express themselves while simultaneously wondering if they will ever be heard, or understood.

A huge international corporation has developed a facility along the Juan de Fuca Ridge at the bottom of the Pacific Ocean to exploit geothermal power. They send a bio-engineered crew--people who have been altered to withstand the pressure and breathe the seawater--down to live and work in this weird, fertile undersea darkness. Unfortunately the only people suitable for long-term employment in these experimental power stations are crazy, some of them in unpleasant ways. How many of them can survive, or will be allowed to survive, while worldwide disaster approaches from below? The biggest players, with the best lawyers in the world, were arguing before the highest court in the land. #2 The music industry went after the people who were downloading their music, and in 2000, the courts ruled against Napster. In 2003, Napster declared bankruptcy, and in December 2003, it sold its brand name and intellectual property to Roxio, Inc. , for a song. #3 The Grokster case can be traced back to the year 1519, when the Spanish explorer Hernando Cortés met with the Aztec leader Montezuma II. Cortés demanded all the gold in the city, and when Montezuma handed it over, Cortés killed him. #4 The Spanish were eventually able to defeat the Apaches, and by the 1680s, they had control of northern Mexico. The Apaches were not able to defeat the Spanish because they were organized as a society, while the record labels were not able to defeat the P2P sites because they were decentralized.

Morris Award finalist Starfish. Rumi Seto spends a lot of time worrying she doesn't have the answers to everything. What to eat, where to go, whom to love. From the co-author of the New York Times bestseller Team of Teams, a practical guide for leaders looking to make their organizations more interconnected and unified in the midst of sudden change. Too often, companies end up with teams stuck in their own silos, pursuing goals and metrics in isolation. Their traditional autocratic structures create stability, scalability, and predictability -- but in a world that demands rapid adaptation to a new reality, this traditional model simply doesn't work. In Team of Teams, retired four-star General Stanley McChrystal and former Navy SEAL Chris Fussell made the case for a new organizational model combining the agility, adaptability, and cohesion of a small team with the power and resources of a giant organization. Now, in One Mission, Fussell channels all his experiences, both military and corporate, into powerful strategies for unifying isolated and distrustful teams. This practical guide will help leaders in any field implement the Team of Teams approach to tear down their silos improve collaboration, and avoid turf wars. By committing to one higher mission, organizations develop an overall capability that far exceeds the sum of their parts. From Silicon Valley software giant Intuit to a government agency on the plains of Oklahoma, organizations have used Fussell's methods to unite their people around a single compelling vision, resulting in superior performance. One Mission will help you follow their example to a more agile and resilient future.

"Adam Rapp ’ s brilliant and haunting story will break your heart. But then his words will mend it. . . . Absolutely unforgettable." - Michael Cart On the run in a stolen car with a kidnapped baby in tow, Custis, Curl, and Boobie are three young people with deeply troubled pasts and bleak futures. As they struggle to find a new life for themselves, it becomes painfully clear that none of them will ever be able to leave the past behind. Yet for one, redemption is waiting in the unlikelyst of places. With the raw language of the street and lyrical, stream-of-consciousness prose, Adam Rapp hurtles the reader into a world of lost children, a world that is not for the faint of heart. Gripping, disturbing, and starkly illuminating, his hypnotic narration captures the voices of two damaged souls - a third speaks only through drawings - to tell a story of alienation, deprivation, and ultimately, the saving power of compassion.

The Austin Family Chronicles

"Reminiscent of Toni Morrison's The Bluest Eye." —The New York Times "One of the best books I have ever read...will live in the hearts of readers for the rest of their lives." —Colby Sharp, founder of Nerdy Book Club "An emotional, painful, yet still hopeful adolescent journey...one that needed telling." —Kirkus Reviews (starred review) "I really loved this." —Sharon M. Draper, author of the New York Times bestseller Out of My Mind This deeply sensitive and "compelling" (BCCB) debut novel tells the story of a thirteen-year-old who must overcome internalized racism and a verbally abusive family to finally learn to love herself. There are ninety-six reasons why thirteen-year-old Genesis dislikes herself. She knows the exact number because she keeps a list: -Because her family is always being put out of their house. -Because her dad has a gambling problem. And maybe a drinking problem too. -Because Genesis knows this is all her fault. -Because she wasn't born looking like Mama. -Because she is too black. Genesis is determined to fix her family, and she's willing to try anything to do so...even if it means harming herself in the process. But when Genesis starts to find a thing or two she actually likes about herself, she discovers that changing her own attitude is the first step in helping change others.

"Masterful and left me on the edge of my seat...absolutely everything I could want in a sci-fi." —Adalyn Grace, New York Times bestselling author of All the Stars and Teeth Westworld meets Warcross in this high-stakes, dizzyingly smart sci-fi about a teen girl navigating an afterlife in which she must defeat an AI entity intent on destroying humanity, from award-winning author Akemi Dawn Bowman. She has a great family, just graduated high school, and is on her way to a party where her entire class is waiting for her—including, most importantly, the boy she's been in love with for years. The only problem? She's murdered before she gets there. When Nami wakes up, she learns she's in a place called Infinity, where human consciousness goes when physical bodies die. She quickly discovers that Ophelia, a virtual assistant widely used by humans on Earth, has taken over the afterlife and is now posing as a queen, forcing humans into servitude the way she'd been forced to serve in the real world. Even worse, Ophelia is inching closer and closer to accomplishing her grand plans of eradicating human existence once and for all. As Nami works with a team of rebels to bring down Ophelia and save the humans under her imprisonment, she is forced to reckon with her past, her future, and what it is that truly makes us human. From award-winning author Akemi Dawn Bowman comes an incisive, action-packed tale that explores big questions about technology, grief, love, and humanity.

Lionel barely remembers the old days, before he and his sister, Beatrice, came to the boarding school on the Blackfeet Indian Reservation. His life is peaceful, as long as he follows the rules. So he can't understand why Beatrice won't: why she refuses to cut her hair and insists on honoring the Blackfeet traditions. Somewhere in the mountains lies their grandfather's homestead—if only they can survive long enough to find him...

A WALL STREET JOURNAL BEST-SELLING BOOK NAMED BY THE WASHINGTON POST AS ONE OF THE 11 LEADERSHIP BOOKS TO READ IN 2018 Radical Inclusion: What the Post-9/11 World Should Have Taught Us About Leadership examines today's leadership landscape and describes the change it demands of leaders. Dempsey and Brafman persuasively explain that today's leaders are in competition for the trust and confidence of those they lead more than ever before. They assert that the nature of power is changing and should not be measured by degree of control alone. They offer principles for adaptation and bring them to life with examples from business, academia, government, and the military. In building their argument, Dempsey and Brafman introduce several concepts that illuminate both the vulnerability and the opportunity in leading today: Radical Inclusion. Fear of losing control in our fast-paced, complex, highly scrutinized environment is pushing us toward exclusion?exactly the wrong direction. Leaders should instead develop an instinct for inclusion. The word "radical" emphasizes the urgency of doing so. The Era of the Digital Echo. The speed and accessibility of information create "digital echoes" that make facts vulnerable, eroding the trust between leader and follower. Relinquishing Control to Preserve Power. Power and control once went hand in hand, but no longer. In today's environment, control is seductive but unlikely to produce optimum, affordable, sustainable solutions. Leaders must relinquish and share control to build and preserve power. The principles discussed in Radical Inclusion are memorable and the book is full of engaging stories. From a young vegan's confrontation with opponents in Berkeley to a young lieutenant's surprising visitor during the Cold War, from a reflection on the significance of Burning Man to a discussion of challenges faced in the Situation Room, Radical Inclusion will provide you with leadership tools to address real leadership challenges. In book four of the award-winning Austin Family Chronicles young adult series from Madeleine L'Engle, author of *A Wrinkle in Time*, Vicky Austin experiences the difficulties and joys of growing up. "This wasn't the first time that I'd come close to death, but it was the first time I'd been involved in this part of it, this strange, terrible saying goodbye to someone you've loved." These are Vicky Austin's thoughts as she stands near Commander Rodney's grave while her grandfather, who himself is dying of cancer, recites the funeral service. Watching his condition deteriorate over that long summer is almost more than she can bear. Then, in the midst of her struggle, she finds herself the center of attention for three young men. Leo, Commander Rodney's son, turns to her as an old friend seeking comfort but longing for romance. Zachary, whose attempted suicide inadvertently caused Commander Rodney's death, sees her as the one sane and normal person who can give some meaning to his life. And Adam, a serious young student working at the nearby marine-biology station, discovers Vicky, his friend's little sister, incipient telepathic powers that can help him with his experiments in dolphin communications. Vicky finds solace and brief moments of peace in her poetry, but life goes on around her, and the strain intensifies as she confronts matters of love and of death, of dependence and of responsibility, universal concerns that we all must face. The inevitable crisis comes and Vicky must rely on openness, sensitivity, and the love of others to overcome her private grief. Once again, Madeleine L'Engle has written a story that revels in the drama of vividly portrayed characters and events of the spiritual and moral dimensions of common human experiences. *A Ring of Endless Light* is a 1981 Newbery Honor Book. Second in the Rifters Trilogy, Hugo Award-winning author Peter Watts' Maelstrom is a terrifying explosion of cyberpunk noir. This is the way the world ends: A nuclear strike on a deep sea vent. The target was an ancient microbe—voracious enough to drive the whole biosphere to extinction—and a handful of amphibious humans called rifters who'd inadvertently released it from three billion years of solitary confinement. The resulting tsunami killed millions. It's not as through there was a choice: saving the world excuses almost any degree of collateral damage. Unless, of course, you miss the target. Now North America's west coast lies in ruins. Millions of refugees rally around a mythical figure mysteriously risen from the deep sea. A world already wobbling towards collapse barely notices the spread of one more blight along its shores. And buried in the seething fast-forward jungle that use to be called Internet, something vast and inhuman reaches out to a woman with empty white eyes and machinery in her chest. A woman driven by rage, and incubating Armageddon. Her name is Lenie Clarke. She's a rifter. She's not nearly as dead as everyone thinks. And the whole damn world is collateral damage as far as she's concerned. . . . At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
