Put personal development tale, part adventure tale, Tribe of Millionaires teaches readers six timeless lessons about the power of those around us transform our lives.When Ethan Martinez receives a mysterious invitation after the death of his father, he embarks on an adventure not only to save his struggling business, but to discover his past. Traveling to a tropical island with the mysterious "Tribe of Millionaires," Ethan finds his whole approach to business and life shifting with each lesson. The more time Ethan spends with the enigmatic members of the tribe, the more he comes to realize that the answers he seeks are, as they are for all of us, hidden in plain sight.

Every day, we evaluate the people around us: It's one of the most important things we ever do. Making Sense of People provides the scientific frameworks and tools we need to improve our intuition, and assess people more consciously, systematically, and effectively. Leading neuroscientist Samuel H. Barondes explains the research behind each standard personality category: extraversion, agreeableness, conscientiousness, neuroticism, and openness. He shows readers how to use these traits and assessments to do a better job of deciding who they'll enjoy spending time with, whom to trust, and whom to keep at a distance. Barondes explains: "What neuroscience and psychological research can tell us about how personality types develop and cohere. The intertwined roles of genes, nurture, and education in personality development. How to recognize troublesome personality patterns such as narcissism, sociopathy, and paranoia. How much a child's behavior predicts their adult personality, and how personality stabilizes in young adulthood. How to assess integrity, fairness, wisdom, and other traits related to morality. What genetic testing may (or may not) teach us about personality in the future. General strategies for getting along with people, with specific tactics for special cases like Kris Jenner. A succinct look at personality psychology. As a psychiatrist and neuroscientist at the University of California, Barondes (Molecules and Mental illness, 2007, etc.) has spent years studying human behavior, and this book reflects his systematic, scientific approach for personality assessment. The average person isn't likely to have time to research a difficult boss or potential love interest, but the author supplements intuitively with a useful cornerstone for gauging human behavior: a table of the "Big Five" personality traits, among them Extraversion vs. Introversion and Agreeableness vs. Antagonism. To learn how to apply the Big Five, Barondes supplies a link for a professional online personality test, in addition to a basic introduction of troubling personality patterns—e.g. narcissism and compulsiveness. While genetics may play a heavy hand in influencing personality, Barondes writes, it's awareness of a person's background, character and life story that is paramount in unearthing reasons for adult behavior. Readers might like to see the author weave more everyday examples into the text—he includes one in fostering compassion by imagining an adult as a 10-year-old child is a gem—but there is plenty here to ponder. Those looking for traditional "self-help" advice won't find it here, but this book clearly lays the groundwork for deeper human interaction and better life relationships.

Offers techniques and strategies for increasing income while cutting work time in half, and includes advice for leading a more fulfilling life.

SUMMARY - Tribe Of Mentors: Short Life Advice From The Best In The World By Tim Ferriss

Tools of Titans

Decoding the Mysteries of Personality

*New York Times bestselling psychologist Dr. Meg Jay uses real stories from real lives to provide smart, compassionate, and constructive advice about the crucial (and difficult) years we cannot afford to miss. Our "thirty-is-the-new-twenty" culture tells us the twentysomething years don't matter. Some say they are a second adolescence. Others call them an emerging adulthood. Dr. Meg Jay, a clinical psychologist, argues that twentysomethings have been caught in a swirl of hype and misinformation, much of which has trivialized what is actually the most defining decade of adulthood. Drawing from almost two decades of work with hundreds of clients and students, The Defining Decade weaves the latest science of the twentysomething years with the behind-closed-doors stories from twentysomethings, themselves. The result is a provocative read that provides the tools necessary to make the most of your twenties, and shows us how work, relationships, personality, social networks, identity, and even the brain can change more during this decade than at any other time in adulthood—*if we use the time wisely. The Defining Decade is a smart, compassionate and constructive book about the years we cannot afford to miss.

*An eight-time national chess champion and world champion martial artist shares the lessons he has learned from two very different competitive arenas, identifying key principles about learning and performance that readers can apply to their life goals. Reprint. 35,000 first printing.*

*Who's pulling for you? Who's got your back? Who's putting your hat in the ring? Odds are this person is not a mentor but a sponsor. Mentors can build your self-esteem and provide a sounding board—but they're not your ticket to the top. If you're interested in fast-tracking your career, what you need is a sponsor—a senior-level champion who believes in your potential and is willing to advocate for you as you pursue that next raise or promotion. In this powerful yet practical book, economist and thought leader Sylvia Ann Hewlett—author of ten critically acclaimed books, including the groundbreaking Off-Ramps and On-Ramps—shows why sponsors are your proven link to success. Mixing solid data with vivid real-life narratives, Hewlett reveals the “two-way street” that makes sponsorship such a strong and mutually beneficial alliance. The seven-step map at the heart of this book allows you to chart your course toward your greatest goals. Whether you're looking to lead a company or drive a community campaign, Forget a Mentor. Find a Sponsor will help you forge the relationships that truly have the power to deliver you to your destination.*

Loonshots reveals a surprising new way of thinking about the mysteries of group behavior that challenges everything we thought we knew about nurturing radical breakthroughs. Ballcall, a physicist and entrepreneur, shows why teams, companies, or any group with a mission will suddenly change into brittle ice. Mountains of pride have been written about culture. Loonshots identifies the small shifts in structure that control this transition, the same way that temperature controls the change from water to ice. Using examples that range from the spread of fires in forests to the hunt for terrorists online, and stories of thieves and geniuses and kids, Ballcall shows how a new kind of science can help us become the initiators, rather than the victims, of innovative surprise. Over the past decade, researchers have been applying the tools and techniques of this new science—the science of phase transitions—to understand how birds flock, fish swim, brains work, people vote, diseases erupt, and ecosystems collapse. Loonshots is the first to apply this science to the spread of breakthrough ideas. Ballcall distills these insights into practical lessons creatives, entrepreneurs, and visionaries can use to change our world. Along the way, readers will learn how chickens saved millions of lives, what James Bond and Liptor have in common, what the movie Initiation Game got wrong about WWII, and what really killed Pan Am, Polaroid, and the Qing Dynasty. "If The Da Vinci Code and Freakonomics had a child together, it would be called Loonshots." —Senator Bob Kerrey*

*In 1939, hatred took root in South Africa, where the seeds of apartheid were newly sown. There a boy called Peekay was born. He spoke the wrong language—English. He was nursed by a woman of the wrong color—black. His childhood was marked by humiliation and abandonment. Yet he vowed to survive—he would become legendary champion of the world, he would dream heroic dreams. But his dreams were nothing compared to what awaited him. For he was about to enter an epic journey, where the world would be his enemy, his power would be his own, and the mystic power he possessed would appear that villainy would rule the world. The Power of One.*

*Bestselling author Sherman Alexie tells the story of Junior, a budding cartoonist growing up on the Spokane Indian Reservation. Determined to take his future into his own hands, Junior leaves his troubled school on the rez to attend an all-white farm town high school where the only other Indian is the school mascot. Heartbreaking, funny, and beautifully written, The Absolutely True Diary of a Part-Time Indian, which is based on the author's own experiences, coupled with poignant drawings by Ellen Forney that reflect the character's art, chronicles the contemporary adolescence of one Native American boy as he attempts to break away from the life he was destined to live. With a forward by Markus Zusak, interviews with Sherman Alexie and Ellen Forney, and four-color interior art throughout, this edition is perfect for fans and collectors alike. The entrepreneur, angel investor, and bestselling author of Choose Yourself busts the 10,000-hour rule of achieving mastery, offering a new mindset and dozens of techniques that will inspire any professional—no matter their age or managerial level—to pursue their passions and quickly acquire the skills they need to succeed and achieve their dreams. We live in a hierarchical world where experience has traditionally been the key to promotion. But that period is over! Straight, clear-cut career trajectories no longer exist. Industries disappear, job descriptions change, and people's interests and passions evolve. The key to riding this wave, entrepreneur James Altucher advises, is to constantly be curious about what's next, to be comfortable with uncertainty so you can keep navigating the rough waters ahead, and most important, to pursue the things that interest you. In Skip the Line, he reveals how he went from struggling and depressed to making his personal, financial, and creative dreams come true, despite—and perhaps due to—his many failures along the way. Altucher combines his personal story with concrete—and unorthodox—insights that work. But Skip the Line isn't about hacks and shortcuts—it's about transforming the way you think, work, and live, letting your interests guide your learning, time, and resources. It's about allowing yourself to do what comes naturally; the more you do what you love, the better you do it. While showing you how to approach change and crisis, Altucher gives you tools to help easily execute ideas, become an expert negotiator, attract the attention of those around you, scale promising ideas, and improve leadership—all of which will catapult you higher than you ever thought possible and at a speed that everyone will tell you is impossible.

We live in a hierarchical world where experience has traditionally been the key to promotion. But that period is over! Straight, clear-cut career trajectories no longer exist. Industries disappear, job descriptions change, and people's interests and passions evolve. The key to riding this wave, entrepreneur James Altucher advises, is to constantly be curious about what's next, to be comfortable with uncertainty so you can keep navigating the rough waters ahead, and most important, to pursue the things that interest you. In Skip the Line, he reveals how he went from struggling and depressed to making his personal, financial, and creative dreams come true, despite—and perhaps due to—his many failures along the way. Altucher combines his personal story with concrete—and unorthodox—insights that work. But Skip the Line isn't about hacks and shortcuts—it's about transforming the way you think, work, and live, letting your interests guide your learning, time, and resources. It's about allowing yourself to do what comes naturally; the more you do what you love, the better you do it. While showing you how to approach change and crisis, Altucher gives you tools to help easily execute ideas, become an expert negotiator, attract the attention of those around you, scale promising ideas, and improve leadership—all of which will catapult you higher than you ever thought possible and at a speed that everyone will tell you is impossible.

*NEW YORK TIMES BESTSELLER "The compassionate" (People), "startling" (Baltimore Sun), "moving" (Chicago Tribune) true story of two kids with the same name from the city: One went on to be a Rhodes Scholar, decorated combat veteran, White House Fellow, and business leader. The other is serving a life sentence in prison. In development as a feature film executive produced by Stephen Curry, who selected the book as his "Underrated" Book Club Pick with Literati The chilling truth is that his story could have been mine. The tragedy is that my story could have been his. In December 2000, the Baltimore Sun ran a small piece about Wes Moore, a local student who had just received a Rhodes Scholarship. The same paper also ran a series of articles about four young men who had allegedly killed a police officer in a particularly botched armed robbery. The police were still hunting for two of the suspects who had gone on the lam, a pair of brothers. One was named Wes Moore. Wes just couldn't shake off the unsettling coincidence, or the inkling that the two shared much more than space in the same newspaper. After following the story of the robbery, the manhunt, and the trial to its conclusion, he wrote a letter to the other Wes, now a convicted murderer serving a life sentence without the possibility of parole. His letter tentatively asked the questions that had been haunting him: Who are you? How did this happen? That letter led to a correspondence and relationship that have lasted for several years. Over dozens of letters and prison visits, Wes discovered that the other Wes had had a life not unlike his own: Both had had difficult childhoods, both were fatherless; they'd hung out on similar corners with similar crews, and both had run into trouble with the police. At each stage of their young lives they had come across similar moments of decision, yet their choices would lead them to astonishingly different destinies. Told in alternating dramatic narratives that take readers from heart-wrenching losses to moments of surprising redemption, The Other Wes Moore tells the story of a generation of boys trying to find their way in a hostile world. BONUS: This edition contains a new afterword and a The Other Wes Moore discussion guide.*

Most of us believe that we will finally feel satisfied and content with our lives when we get the good news we have been waiting for, find a healthy relationship, or achieve one of our personal goals. However, this rarely happens. Good fortune is often followed by negative emotions that overtake us and result in destructive behaviors. "I don't deserve this," "this is not what I truly want," and "I'm not ready" are common thoughts designed to prevent us from experiencing the joy and satisfaction we have earned. Sound familiar? This is what New York Times bestselling author Gay Hendricks calls the Upper Limit Problem, a negative emotional reaction that occurs when anything positive enters our lives. The Upper Limit Problem not only prevents happiness, but it actually stops us from achieving our goals. It is the ultimate life roadblock. In The Big Leap, Hendricks reveals a simple yet comprehensive program for overcoming this barrier to happiness and fulfillment, presented in a way that engages both the mind and heart. Working closely with more than one thousand extraordinary achievers in business and arts—from rock stars to Fortune 500 executives—whose stories are featured in these pages, the book describes the four hidden fears that are at the root of the Upper Limit Problem. The Big Leap delivers a proven method for first identifying which of these four fears prevents us from reaching our personal upper limit, and then breaking through that limitation to reach our true potential.
