

Texas Wildflowers 2017 Square (Multilingual Edition)

Shortlisted for the 2020 North Somerset Children’s Book Award From the co-creator of the viral 'Tea Consent' video, this is the perfect introduction to consent for kids and families everywhere. Your body belongs to you and you get to set your own rules, so that you may have boundaries for different people and sometimes they might change. Like when you hi-five your friends and kiss your kitten, but not the other way round! But consent doesn't need to be confusing. From setting boundaries, to reflecting on your own behaviour and learning how to be an awesome bystander, this book will have you feeling confident, respected, and 100% in charge of yourself and your body Brought to life with funny and informative illustrations, this is the smart, playful and empowering book on consent that everyone has been waiting for.

This book includes the diverse personal histories of some of the founders, institutionalizers, and leaders of change in the filed of conflict resolution. The authors of the essays in this book play a variety of roles: mediator, facilitator, arbitrator, ombuds, academic, system designer, entrepreneur, leaders of public and private conflict resolution organizations, researcher, advocate for conflict resolution and critic of conflict resolution. The narratives of the contributors provide a way to understand the conflict resolution field and its principles.

Mobile Museums presents an argument for the importance of circulation in the study of museum collections, past and present. It brings together an impressive array of international scholars and curators from a wide variety of disciplines – including the history of science, museum anthropology and postcolonial history - to consider the mobility of collections. The book combines historical perspectives on the circulation of museum objects in the past with contemporary accounts of their re-mobilisation, notably in the context of Indigenous community engagement. Contributors seek to explore processes of circulation historically in order to re-examine, inform and unsettle common assumptions about the way museum collections have evolved over time and through space. By foregrounding questions of circulation, the chapters in Mobile Museums collectively represent a fundamental shift in the understanding of the history and future uses of museum collections. The book addresses a variety of different types of collection, including the botanical, the ethnographic, the economic and the archaeological. Its perspective is truly global, with case studies drawn from South America, West Africa, Oceania, Australia, the United States, Europe and the UK. Mobile Museums helps us to understand why the mobility of museum collections was a fundamental aspect of their history and why it continues to matter today. Praise for Mobile Museums "This book advances a paradigm shift in studies of museums and collections. A distinguished group of contributors reveal that collections are not dead assemblages. The nineteenth and twentieth centuries were marked by vigorous international traffic in ethnography and natural history specimens that tell us much about colonialism, travel and the history of knowledge – and have implications for the remobilisation of museums in the future.’ – Nicholas Thomas, University of Cambridge 'The first major work to examine the implications and consequences of the migration of materials from one scientific or cultural milieu to another, it highlights the need for a more nuanced understanding of collections and offers insights into their potential for future re-mobilisation.' – Arthur MacGregor

"In this wonderfully bold and speculative anthology of writings, artists and critics offer a highly persuasive set of argument and pleas for imaginative, socially responsible, and socially responsive public art...This book will prove as valuable to art and cultural historians and critics as it will be to public policy makers, students and a diverse public audience" --Moirá Roth, Mills College.

A revised new edition of the bestselling toolkit for creating, building, and maintaining a strong brand From research and analysis through brand strategy, design development through application design, and identity standards through launch and governance, *Designing Brand Identity, Fourth Edition* offers brand managers, marketers, and designers a proven, universal five-phase process for creating and implementing effective brand identity. Enriched by new case studies showcasing successful world-class brands, this Fourth Edition brings readers up to date with a detailed look at the latest trends in branding, including social networks, mobile devices, global markets, apps, video, and virtual brands. Features more than 30 all-new case studies showing best practices and world-class Updated to include more than 35 percent new material Offers a proven, universal five-phase process and methodology for creating and implementing effective brand identity

This must-have resource: Provides gifted educators with methods and strategies for successful coplanning, coteaching, coaching, and collaboration. Enables effective management of differentiation. Increases educators' understanding of gifted students' needs. Features the tools and "How-to" steps for facilitating and maintaining collaborative work in order to challenge and support gifted students all day, every day. Encourages professional learning and a focus on shared responsibility and reflection. The book also includes considerations for working with special populations, including twice-exceptional students, underachievers, and culturally, linguistically, and economically diverse learners, as well as meeting students' social-emotional needs, collaborating with families and communities, and advocating for gifted education.

This book explores multilingualism as an imaginative articulation of the experience of modernity in twentieth-century Spanish and American literature. It argues that while individual multilingual practices are highly singular, literary multilingualism exceeds the conventional bounds of modernism to become emblematic of the modern age. The book explores the confluence of multilingualism and modernity in the theme of barbarism, examining the significance of this theme to the relationship between language and modernity in the Spanish-speaking world, and the work of five authors in particular. These authors – Ramón del Valle-Inclán, Ernest Hemingway, José María Arguedas, Jorge Semprún and Juan Goytisolo – explore the stylistic and conceptual potential of the interaction between languages, including Spanish, French, English, Galician, Quechua and Arabic, their work reflecting the eclecticism of literary multilingualism while revealing its significance as a mode of response to modernity.

Green roofs—the ultimate in sustainable building practices—continue to generate enormous interest and enthusiasm among architects, landscape designers, and urban planners. Increasingly strict stormwater regulations and the appeal of LEED-related projects have also boosted the popularity and desirability of green roofs. Those who want to build green roofs, however, have few resources to guide them. Until now, no book has taken a comprehensive look at how to effectively adapt green-roof technology to the variable and extreme North American climate, and how to design projects that will function and endure as successfully as those in Germany, Switzerland, and other European countries. This book fills the gap by providing an overview of practices and techniques that have been effective in North America. The authors offer options regarding structure, function, horticulture, and logistics, as well as surveys of actual projects and analyses of why they have or haven't succeeded. Approachable and reader-friendly, the manual clearly explains how these complex systems function and how to plan and carry out projects successfully from concept through construction and maintenance. Ideally suited to professionals (including architects, landscape architects, engineers, and designers) and their clients, it brings together key lessons from leaders in the field. Numerous photographs highlight the range of design possibilities and show green roofs both during construction and at various stages of maturity. At last, those seeking basic information about how to design and build green roofs have a concise, authoritative guide to this exciting new technology.

If you haven't looked at *The Bedford Handbook* in a while, look again: This edition has everything your students need to become stronger writers—in a briefer book. This reimagined *Bedford Handbook* takes a fresh "essentials" approach to the familiar coverage of writing, research, style, and grammar that *The Bedford Handbook* has always had. The result is a handbook that's equal parts approachable and comprehensive. Students will quickly find answers in the book's direct explanations and step-by-step instruction. They'll get the practice and guidance they need with exercises, how-to guides, model papers, and class-tested examples. The advice you trust from Diana Hacker and Nancy Sommers is here. It all comes in a book that's easier to carry, easier to use, and more affordable than ever.

From an endangered species of prickly pear cactus to a daisy and even a snake, the name Lindheimer is tied to the nomenclature of Texas natives in nature. The name originally belonged to Ferdinand Lindheimer, one of the Southwest's first serious scientists, who came to be known as the "Father of Texas Botany." This immigrant from Frankfurt, Germany, spent more than a decade living on a shoestring budget as he searched the wilds of Central and Southeast Texas for new species. His correspondent, friend, fellow botanist, and fellow Frankfurt native was George Engelmann, who also served as Lindheimer's conduit to civilization and to botanic circles worldwide. Like Lindheimer in the tangled prairies, Minetta Altgelt Goyne spent more than a decade on a difficult task: deciphering and translating more than forty of Lindheimer's letters, contained in the Engelmann Papers at the Missouri Botanical Garden archives. Goyne's biographical research and annotations make Lindheimer's letters a fascinating window on his excitement in discovering new species and oddities and his frustrations with immigration politics and frontier life. His comments in his letters to Engelmann about the personalities and practices of the Texas German immigrants and their leaders are at times witty and biting. His wealth of experiences and pointed observations make this a story that will intrigue botanists, Germanists, historians, and Texans everywhere.

A linguist’s entertaining and highly informed guide to what languages are and how they function. Think you know language? Think again. There are languages that change when your mother-in-law is present. The language you speak could make you more prone to accidents. Swear words are produced in a special part of your brain. Over the past few decades, we have reached new frontiers of linguistic knowledge. Linguists can now explain how and why language changes, describe its structures, and map its activity in the brain. But despite these advances, much of what people believe about language is based on folklore, instinct, or hearsay. We imagine a word’s origin is it’s “true” meaning, that foreign languages are full of “untranslatable” words, or that grammatical mistakes undermine English. In *Don't Believe A Word*, linguist David Shariatmadari takes us on a mind-boggling journey through the science of language, urging us to abandon our prejudices in a bid to uncover the (far more interesting) truth about what we do with words. Exploding nine widely held myths about language while introducing us to some of the fundamental insights of modern linguistics, Shariatmadari is an energetic guide to the beauty and quiriness of humanity’s greatest achievement.

In *Culturize*, Jimmy Casas shares insights into what it takes to cultivate a community of learners who embody the innately human traits our world desperately needs, such as kindness, honesty, and compassion. His stories reveal how these "soft skills" can be honed while meeting and exceeding academic standards of twenty-first-century learning.

Texas A&M Forest Service Centennial Edition

Culturize

Although a number of important studies of American slavery have explored the formation of slave cultures in the English colonies, no book until now has undertaken a comprehensive assessment of the development of the distinctive Afro-Creole culture of colonial Louisiana. This culture, based upon a separate language community with its own folkloric, musical, religious, and historical traditions, was created by slaves brought directly from Africa to Louisiana before 1731. It still survives as the acknowledged cultural heritage of tens of thousands of people of all races in the southern part of the state. In this pathbreaking work, Gwendolyn Midlo Hall studies Louisiana's creole slave community during the eighteenth century, focusing on the slaves' African origins, the evolution of their own language and culture, and the role they played in the formation of the broader society, economy, and culture of the region. Hall bases her study on research in a wide range of archival sources in Louisiana, France, and Spain and employs several disciplines--history, anthropology, linguistics, and folklore--in her analysis. Among the topics she considers are the French slave trade from Africa to Louisiana, the ethnic origins of the slaves, and relations between African slaves and native Indians. She gives special consideration to race mixture between Africans, Indians, and whites; to the role of slaves in the Natchez Uprising of 1729; to slave unrest and conspiracies, including the Pointe Coupee conspiracies of 1791 and 1795; and to the development of communities of runaway slaves in the cypress swamps around New Orleans. Dallas has a reputation as a progressive city--always ready to build something new to replace the old. In the late 19th century, as Dallas became the transportation and commercial center for North Texas, brick and stone edifices supplanted the simple frame structures of the early days. By the 1920s, the city was the financial capital of the region and boasted the tallest building west of the Mississippi. In 1936, Dallas hosted the Texas Centennial Exposition in Fair Park, an ensemble of art deco buildings that is a National Historic Landmark. As business grew, so did the skyline. Today Dallas has a rich collection of historic buildings that chronicle the city's growth and progress.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright in the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant. Bursting with stories and informational text selections by award-winning authors and illustrators, the Wonders Literature Anthology lets students apply strategies and skills from the Reading/Writing Workshop to extended complex text. Famous Trees of Texas

In the past 30 years, the field of librarianship has increasingly recognized the importance of targeted programs for leadership development. The first of these were designed and offered by the Association of Research Libraries and evolved from their Management Skills Institutes. This book describes 18 programs that have been created to fulfill not only a need but also a growing demand for formal education and training programs. The chapters in this book discuss within a common framework the major programs that already exist. It also accomplishes another more important purpose: It effectively illuminates what needs to be done to ensure we will have the leaders needed for future success and sustainability.

Famous Trees of Texas was first published in 1970 by the Texas Forest Service (now Texas A&M Forest Service), an organization created in 1915 and charged with protecting and sustaining the forests, trees, and other related natural resources of Texas. For the 100-year anniversary of TFS, the agency presents a new edition of this classic book, telling the stories of 101 trees throughout the state. Some are old friends, featured in the first edition and still alive (27 of the original 81 trees described in the first edition have died); some are newly designated, discovered as people began to recognize their age and value. All of them remain “living links” to the state’s storied past.

What habits are common among good college writers? Good college writers are curious, engaged, reflective, and responsible. They read critically. They write with purpose. They tune into their audience.

They collaborate and seek feedback. They know credible evidence makes them credible researchers. They revise. The *Bedford Handbook*, based on surveys with more than 1,000 first-year college students, fosters these habits and offers more support than ever before for college reading and writing. New writing guides support students as they compose in an ever-wider variety of genres, including multimodal genres. New reading support encourages students to become active readers. Retooled research advice emphasizes inquiry and helps writers cite even the trickiest digital sources confidently and responsibly.

Best of all, the *Handbook* remains a trusted companion for students because it is accessible, comprehensive, and authoritative. Instructors benefit, too: A substantially revised Instructor’s Edition

includes Nancy Sommers’s personal mentoring—more than 100 new concrete tips for teaching with the handbook. Finally, integrated digital content is easily assignable and helps students practice and apply the handbook’s lessons.

A resource containing information on Texas. It covers: the natural environment; demographic data and road maps for each of Texas' counties; lists of parks and historic sites; an astronomical calendar;

details of the 2000 elections; names of officials; business statistics; agriculture; and more.

A Life Among the Texas Flora

First major work to deal solely with the Plaquemine societies. Plaquemine, Louisiana, about 10 miles south of Baton Rouge on the banks of the Mississippi River, seems an unassuming southern community for which to designate an entire culture. Archaeological research conducted in the region between 1938 and 1941, however, revealed distinctive cultural materials that provided the basis for distinguishing a unique cultural manifestation in the Lower Mississippi Valley. Plaquemine was first cited in the archaeological literature by James Ford and Gordon Willey in their 1941 synthesis of eastern U.S. prehistory. Lower Valley researchers have subsequently grappled with where to place this culture in the local chronology based on its ceramics, earthen mounds, and habitations. Plaquemine cultural materials share some characteristics with other local cultures but differ significantly from Coles Creek and Mississippian cultures of the Southeast. Plaquemine has consequently received the dubious distinction of being defined by the characteristics it lacks, rather than by those it possesses. The current volume brings together eleven leading scholars devoted to shedding new light on Plaquemine and providing a clearer understanding of its relationship to other Native American cultures. The authors provide a thorough yet focused review of previous research, recent revelations, and directions for future research. They present pertinent new data on cultural variability and connections in the Lower Mississippi Valley and interpret the implications for similar cultures and cultural relationships. This volume finally places Plaquemine on the map, incontrovertibly demonstrating the accomplishments and importance of Plaquemine peoples in the long history of native North America.

"Teaching is art-creation-and a curriculum map is only as good as the teacher who considers it, who questions it, and who revises it to meet the needs of each year's students." --Kelly Gallagher and Penny Kittle Two teachers. Two classrooms. One school year. 180 Days represents the collaboration of two master teachers-Kelly Gallagher and Penny Kittle-over an entire school year: planning, teaching, and reflecting within their own and each other's classrooms in California and New Hampshire. Inspired by a teacher's question, "How do you fit it all in?" they identified and prioritized the daily, essential, belief-based practices that are worth spending time on. They asked, "Who will these students be as readers and writers after a year under our care?" What we make time for matters: what we plan, how we revise our plans while teaching, and how we reflect and decide what's next. The decision-making in the moment is the most essential work of teaching, and it's the ongoing study of the adolescents in front of us that has the greatest impact on our thinking. With both the demands of time and the complexity of diverse students in mind, Kelly and Penny mapped out a year of engaging literacy practices aligned to their core beliefs about what matters most. They share their insights on managing time and tasks and offer teaching strategies for engaging students in both whole class and independent work. Video clips of Kelly and Penny teaching in each other's classrooms bring this year to life and show you what a steadfast commitment to belief-based instruction looks like in action. 180 Days. Make every moment matter. Teach fearlessly. Empower all students to live literate lives.

Sustainable Surface Water Management: a handbook for SUDS addresses issues as diverse as flooding, water quality, amenity and biodiversity but also mitigation of, and adaptation to, global climate change, human health benefits and reduction in energy use. Chapters are included to cover issues from around the world, but they also address particular designs associated with the implementation of SUDS in tropical areas, problems with retrofitting SUDS devices, SUDS modelling, water harvesting in drought-stricken countries using SUDS and the inclusion of SUDS in the climate change strategies of such cities as Tokyo, New York and Strasbourg.

Myra Wright takes ecocritical studies on an interdisciplinary turn toward the water with her new research monograph, The Poetics of Angling in Early Modern England. Identifying the lively presence of both literal and metaphorical images of sport fishing in all kinds of early modern writing, this book aims to instill deep sympathy between the art of angling and the art of writing, and for the centrality of fish in early modern conceptions of humanity.

This book explores what writing for pleasure means, and how it can be realised as a much-needed pedagogy whose aim is to develop children, young people, and their teachers as extraordinary and life-long writers. The approach described is grounded in what global research has long been telling us are the most effective ways of teaching writing and contains a description of the authors' own research project into what exceptional teachers of writing do that makes the difference. The authors describe ways of building communities of committed and successful writers who write with purpose, power, and pleasure, and they underline the importance of the affective aspects of writing teaching, including promoting in apprentice writers a sense of self-efficacy, agency, self-regulation, volition, motivation, and writer-identity. They define and discuss 14 research-informed principles which constitute a Writing for Pleasure pedagogy and show how they are applied by teachers in classroom practice. Case studies of outstanding teachers across the globe further illustrate what world-class writing teaching is. This ground-breaking text is essential reading for anyone who is concerned about the current status and nature of writing teaching in schools. The rich Writing for Pleasure pedagogy presented here is a radical new conception of what it means to teach young writers effectively today.

This volume constitutes the refereed proceedings of the 4th International Conference on Optimization and Learning, OLA 2021, held in Catania, Italy, in June 2021. Due to the COVID-19 pandemic the conference was held online. The 27 full papers were carefully reviewed and selected from 62 submissions. The papers presented in the volume are organized in topical sections on synergies between optimization and learning; learning for optimization; machine learning and deep learning; transportation and logistics; optimization; applications of learning and optimization methods.

Largely shut out of American theaters since the 1920s, foreign films such as *Open City*, *Bicycle Thief*, *Rashomon*, *The Seventh Seal*, *Breathless*, *La Dolce Vita* and *L'Avventura* played after World War II in a growing number of art houses around the country and created a small but influential art film market devoted to the acquisition, distribution, and exhibition of foreign-language and English-language films produced abroad. Nurtured by successive waves of imports from Italy, Great Britain, France, Sweden, Japan, and the Soviet Bloc, the renaissance was kick-started by independent distributors working out of New York; by the 1960s, however, the market had been subsumed by Hollywood. From Roberto Rossellini's *Open City* in 1946 to Bernardo Bertolucci's *Last Tango in Paris* in 1973, Tino Balio tracks the critical reception in the press of such filmmakers as François Truffaut, Jean-Luc Godard, Federico Fellini, Michelangelo Antonioni, Tony Richardson, Ingmar Bergman, Akira Kurosawa, Luis Buñuel, Satyajit Ray, and Milos Forman. Their releases paled in comparison to Hollywood fare at the box office, but their impact on American film culture was enormous. The reception accorded to art house cinema attacked motion picture censorship, promoted the director as auteur, and celebrated film as an international art. Championing the cause was the new "cinophile" generation, which was mostly made up of college students under thirty. The fashion for foreign films depended in part on their frankness about sex. When Hollywood abolished the Production Code in the late 1960s, American-made films began to treat adult themes with maturity and candor. In this new environment, foreign films lost their cachet and the art film market went into decline.

The Green City and Social Injustice examines the recent urban environmental trajectory of 21 cities in Europe and North America over a 20-year period. It analyses the circumstances under which greening interventions can create a new set of inequalities for socially vulnerable residents while also failing to eliminate other environmental risks and impacts. Based on fieldwork in ten countries and on the analysis of core planning, policy and activist documents and data, the book offers a critical view of the growing green planning orthodoxy in the Global North. It highlights the entanglements of this tenet with neoliberal municipal policies including budget cuts for community initiatives, long-term green spaces and housing for the most fragile residents; and the focus on large-scale urban redevelopment and high-end real estate investment. It also discusses hopeful experiences from cities where urban greening has long been accompanied by social equity policies or managed by community groups organizing around environmental justice goals and strategies. The book examines how displacement and gentrification in the context of greening are not only physical but also socio-cultural, creating new forms of social erasure and trauma for vulnerable residents. Its breadth and diversity allow students, scholars and researchers to debunk the often-depoliticized branding and selling of green cities and reinsert core equity and justice issues into green city planning—a much-needed perspective. Building from this critical view, the book also shows how cities that prioritize equity in green access, in secure housing and in bold social policies can achieve both environmental and social gains for all.

Classical and Contemporary Perspectives**A Teacher's Guide to Engaging Families for Student Success****Mapping the Terrain****Global Policy Studies****Respect****An Essential Guide for the Whole Branding Team****Dallas Landmarks**

Exploring the Philosophy of Death and Dying: Classical and Contemporary Perspectives is the first book to offer students the full breadth of philosophical issues that are raised by the end of life. Included are many of the essential voices that have contributed to the philosophy of death and dying throughout history and in contemporary research. The 38 chapters in its nine sections contain classic texts (by authors such as Epicurus, Hume, Nietzsche, and Schopenhauer) and new short argumentative essays, specially commissioned for this volume, by world-leading contemporary experts. *Exploring the Philosophy of Death and Dying* introduces students to both theoretical issues (whether we can survive death, whether death is truly bad for us, whether immortality would be desirable, etc.) and urgent practical issues (the ethics of suicide, the value of grief, the appropriate medical criteria for declaring death, etc.) raised by human mortality enabling instructors to adapt it to a wide array of institutions and student audiences. As a pedagogical benefit, PowerPoints, discussion questions, and test questions for each chapter are included as online ancillary materials.

This powerful, unforgettable and uplifting story is one part wrenching family memoir, and one part inspirational journey towards healing and forgiveness – but most of all, it's an unputdownable journey through one family's tragedy and how they refused to let it define them. On the day of Rebecca Poulson's 33rd birthday, her father, niece and nephew were murdered. The murderer had been part of her family: her brother-in-law, Neung, the father of the children. Killing Love is Rebecca's journey through homicide: grief, the police investigations, the media interest, the court cases, the moments of great despair – and the healing. It is a story of individual tragedy and a family's strength, but it is also a story of a community's attitude to family violence. As a reluctant warrior for those who cannot speak for themselves, Rebecca talked to the NSW State Premier and politicians, on multiple TV shows and to print journalists in the hope that the mistakes made by the police force, DOCS, the legal system and solicitors will never be made again. Rebecca's contact with policy makers has been nothing short of history-making, and her story has directly influenced domestic violence laws in the state. Neung left a note for Rebecca's family; he hoped that he would destroy them. This is the story of how he didn't.

Teachers and administrators will learn how to create the respectful, trusting relationships with families necessary to build the educational partnerships that best support children's learning. The book will cover the mindset and core beliefs required to bond with families, and will provide guidance on how to plan engagement opportunities and events throughout the school year that undergird effective partnerships between families and schools.

This book introduces the idea and experience of wandering, as reflected in cultural texts from popular songs to philosophical analysis, providing both a fascinating informal history and a necessary vantage point for understanding - in our era - the emergence of new wanderers. Wanderers offers a fast-paced, wide-ranging, and compelling introduction to this significant and recurrent theme in literary history. David Brown Morris argues that wandering, as a primal and recurrent human experience, is basic to the understanding of certain literary texts. In turn, certain prominent literary and cultural texts (from Paradise Lost to pop songs, from Wordsworth to the blues, from the Wandering Jew to the film Nomadland) demonstrate how representations of wandering have changed across cultures, times, and genres. Wanderers provides an initial overview necessary to grasp the importance of wandering both as a perennial human experience and as a changing historical event, including contemporary forms such as homelessness and climate migration that make urgent claims upon us. Wanderers takes you on a thoroughly enjoyable and informative stroll through a significant concept that will be of interest to those studying or researching literature, cultural studies, and philosophy.

"Making and Being draws on the lived experience of Susan Jahoda and Caroline Woolard, visual arts educators who have developed a framework for teaching art with the collective BFAMDAPhD that emphasizes contemplation, collaboration, and political economy. The authors share ideas and pedagogical strategies that they have adapted to spaces of learning which reange widely, from self-organized workshops for professional artists to Foundations BFA and MFA thesis classes. This hands-on guide includes activities, worksheets, and assignments and is a critical resource for artists and art educator's today"--Page 4 of cover.

The Voynich Codex is one the most fascinating and bizarre manuscripts in the world. The manuscript (potentially equivalent to 232 pages), or more properly a codex, consists of many foldout pages. It has been divided by previous researchers into sections known as Herbal/Botanical/Pharmacology; Balenological/Biological; Cosmology; one page known as The Rosette; and a final Recipe section. All the sections contain text in an unknown writing system, yet to be deciphered. Cryptological analyses by modern computer programs nevertheless have determined that the language is real and not a hoax, as has been suggested by some. Despite the fact that this codex is largely an herbal, the interpreters of this manuscript with two exceptions, have not been botanists. To this end, our recent research suggests that the Voynich is a 16th century codex associated with indigenous Indians of Nueva España educated in schools established by the Spanish. This is a breakthrough in Voynich studies. We are convinced that the Voynich codex is a document produced by Aztec descendants that has been unfiltered through Spanish editors. The flora of New Spain is vast, and the medicinal and culinary herbs used by the Aztecs were equally as copious. Even though it is our hypothesis that the Voynch Codex was written as a private herbal in 16th century New Spain, many of these herbs have relevance today because they or closely related species have been noted to be medicinal or have culinary value. The Voynich Codex has an estimated 359 illustration of plants (phytomorphs), 131 in the Herbal Section (large images) and 228 in the Pharmaceutical Section (small images of plant parts). In our book "Unraveling of the Voynich Codex", to be published by Springer this summer, Tucker and Janick have partially identified species in the Herbal Section. In this proposed work, all of the plants of the Herbal Section will be identified along with those plants of the Pharmacology Section where identification is feasible. Each plant identification will include subdivisions to include descriptors (formal botanical identification), names in English, Spanish, and Mesoamerican names where known, ecology and range, and properties (medicinal and culinary) of these and related species. Photographs of the phytomorphs and contemporary plants will be included. These identifications represent hard evidence that the Voynich Codex is a 16th Century Mexican manuscript. Exploring the herbs of the Aztecs through the Voynich Codex will be a seminal work for all Voynich researchers and also of interest to a wider audience in medicinal and culinary herbs, artists, and historians. In summary, our new book project Flora of the Voynich Codex will provide a photo-illustrated guide to complete the botanical evidence related to the Voynich Codex, one of the most valuable historic texts of the 16th century.
