Revisit Grace Valley, California, in book 1 of this fan-favorite trilogy by #1 New York Times bestselling author Robyn Carr. Unlocked doors, front porches, pies cooling in the windows—this is country life at its finest. But visitors don’t always see what lies at the heart of a community. Or just beyond… June Hudson grew up in Grace Valley, the daughter of the town doctor. Leaving only to get her medical training, she returned home and followed in her father’s footsteps. Some might say she chose the easy, comfortable route…but June knows better. For June, her emergency room is wherever she’s needed—or wherever a patient finds her. She is always on call, her work is her life and these people are her extended family. Which is a good thing, since this is a town where you should have picked your husband in the ninth grade. Grace Valley is not exactly the place to meet eligible men—until an undercover DEA agent suddenly starts appearing at all sorts of strange hours. Everybody has secrets down in the valley. Now June has one of her own. Originally published in 2008

The Tomb of Ramesses VI.

The Village in the Valley

Collects a novella and seven stories in a genre-spanning anthology that includes tales of a New England town ravaged by a humanity-threatening plague and an Egyptologist's obsessive quest for a tomb and the secrets to immortality.

HIstorical fiction

Starting with the discovery of King Tutankhamun's tomb and its glorious treasures, the authors explore Egypt's entire Valley of the Kings, discussing the various tombs and their occupants.

Nicholas Reeves’s radical interpretation of a revolutionary king—now available in paperback. One of the most compelling and controversial figures in ancient Egyptian history, Akhenaten has captured the imagination like no other Egyptian pharaoh. Much has been written about this strange, persecuted figure, whose depiction in effigies is totally at odds with the traditional depiction of the Egyptian ruler-hero. Akhenaten sought to impose upon Egypt and its people the worship of a single god—the sun god—and in so doing changed the country in every way. In Akhenaten, Nicholas Reeves presents an entirely new perspective on the turbulent events of Akhenaten’s seventeen-year reign. Reeves argues that, far from being the idealistic founder of a new faith, the Egyptian ruler cynically used religion for political gain in a calculated attempt to reassert the authority of the king and concentrate all power in his hands. Backed by abundant archaeological and documentary evidence, Reeves’s narrative also provides many new insights into questions that have baffled scholars for generations—the puzzle of the body in Tomb 55 in the Valley of the Kings; the fate of Nefertiti, Akhenaten’s beautiful wife; the identity of his mysterious successor, Smenkhkare; and the theory that Tutankhamun, Akhenaten’s son and heir to the throne, was murdered.

"The tomb of Tutankhamun, with its breathtaking treasures, remains the most sensational archaeological find of all time. This brilliantly illustrated volume takes the reader through Tutankhamun's tomb room-by-room in the order that it was discovered and excavated by Howard Carter in 1922. Dr Zahi Hawass imbues the text with his own inimitable flavor, imagining how the uncovering and opening of the tomb must have felt for carter, while Sandro Vannini's extraordinary photographs reproduce the objects in infinitesimal details. With stunning full-color spreads and foldouts throughout the book, this sumptuous volume is the definitive record of Tutankhamun's glittering legacy."--Back cover.

Architecture, Astronomy and Sacred Landscape in Ancient Egypt

This book examines the interplay between astronomy and dynastic power in the course of ancient Egyptian history, focusing on the fundamental role of astronomy in the creation of the pyramids and the monumental temple and burial complexes. Bringing to bear the analytical tools of archaeoastronomy, a set of techniques and methods that enable modern scholars to better understand the thought, religion and science of early civilizations, Giulio Magli provides in-depth analyses of the pyramid complexes at Giza, Abusir, Saqqara and Dahshur, as well as of the Early Dynastic necropolis at Abydos and the magnificent new Kingdom Theban temples. Using a variety of data retrieved from study of the sky and measurements of the buildings, he reconstructs the visual, symbolic and spiritual world of the ancient Egyptians and thereby establishes an intimate relationship among celestial cycles, topography and architecture. He also shows how they were deployed in the ideology of the pharaoh's power in the course of Egyptian history.

Sensationalized history can be credited with inspiring generations of truth-seeking experts and enthusiasts. The tragedy of the Johnstown Flood was an oft-exploited event as writers and publishers hawked hastily written articles in original form or pirated collections. Where many of the articles lacked fact, they were rife with exaggeration and imagination. James Herbert Walker published one of the very first of these books, The Johnstown Horror, a pamphlet of some 40 pages. Experts cite the book as being sold in New York within a week of the disaster. Though the structure suggests the stories were gathered at rail stations in an apparent journey to the site, there has been debate whether Walker ever traveled to Johnstown. Yet the collection features accounts that do not appear in other publications following the flood. Later, expanded editions swelled to over four hundred pages and included well-crafted woodcuts. As the flood occurred near the end of the nineteenth century, the engraved drawings are often generously labeled as remnants of Victorian art. It is not clear whether the inclusion of the cuts was an aesthetic or monetary decision, considering the period's developments in photography. The final, massive collection of individual stories makes the book memorable, ranging from the accusations levied against wealthy Pittsburgh industrialists to the emergence of the Red Cross. So many unique details and personal chronicles capture the frantic mentality of a town, state, and nation trying to make sense of natural and yet not-so-natural disaster.

Follows the lives of Eric Jeffers and Morgan Haskell, two African Americans who meet at the ages of seventeen and nineteen, respectively, become a couple, and spend the next sixty years together.

Nubia's remote setting has not only lent it an air of mystery, but also isolated it from exploration. This book attempts to document some of the recent discoveries about ancient Nubia, with its remarkable history, architecture, and culture. By doing so, the authors of the essays give us a picture of this rich, but unfamiliar, African legacy.
