Successful trader and advisor Bill Kraft shows how to trade the financial markets in a way that limits risk and provides the potential for big profits. Kraft, who left a successful law practice to become an independent trader, explains his own educational process and how he arrived at a trading approach that primarily uses options to generate consistent income, limit risk, and participate in big market moves. In simple and down-to-earth language, Kraft explains a variety of strategies including buying and selling options; covered call writing; collars; using closed end mutual funds for income; debit spreads, volatility-based straddles; ratio backspreads; condors; and calendar spreads. Kraft emphasizes that traders need to first develop a sound and reasonable business plan ? in the same manner that any entrepreneur would plan a new business. Armed with the strategies explained in the book and a solid business plan, traders will have a blueprint for generating consistent profits in a relatively stress-free and efficient manner.

This book gives you an effective blueprint when trading the Forex Market, and one applicable to all markets. It focuses on the foundational aspects required of all successful traders and not on specific trading methods or strategies. Aspiring traders often put the cart before the horse, so to speak, and try to master techniques and strategies without having the foundations required to use these effectively. This is the equivalent of a beginner martial artist, a white belt, being provided black belt routines on their first day in the dojo. What are the chances that they'll be understood and that the

student will be able to apply them?The Consistent FOREX Trading Blueprint provided in this book gives you nine key steps or components that will enable you to have a firm foundation of solid bedrock, one that you can then build upon and add to. It is the first "belt" in your quest towards mastery of the Forex Market, and even mastery of self. Written by traders and addressed to traders, the steps in this book have been proven to work by the authors, as well as by many successful traders in different markets. At the same time, their lack can be seen as the main reason for failure among the unsuccessful traders.Things like not having a plan, not journaling your trades, not reviewing them constantly, and other missteps can be easily avoided and, in fact, converted into the strengths behind your success in the markets. Take advantage of this book to fast-track your trading career. Start living your life, your way, by your rules, and not by someone else's. Take control of your life and your future.By using this book, you can successfully start trading in the world's largest market, one that trades in excess of \$5 trillion dollars each and every day, 24 hours a day, 5 and a half days a week. Join a community of intelligent people who let their money work for them, instead of them working for money. Learn one of the best skills you can master during times of uncertainty, the ability to produce money without depending on anyone else except yourself.And never forget that life is a journey, so make sure you continue taking steps in the right direction all the time. This book is but one step, albeit an important one. The future is yours. Reach out and grasp it. See you on the inside!

The live market is no different. Day trading is difficult. The path is fraught with risk. But a pot of gold awaits those who learn their lessons well. After four decades in the markets as a trader, analyst, author, educator, and system developer, Jacob Bernstein sets down a comprehensive guide to the art of day trading. You will learn: New day trading methods Order entry strategies How to avoid costly errors when using electronic trading platforms Detailed strategies to maximize profits With this book, readers will have the complete guide they need to profit from this risky but exciting field. Trading profits are just a day away. Everyone is a great trader in hindsight. One of the greatest benefits of this book is that I am telling you all of the things not to do to begin with all in one place all at one time. It is clear it is concise. Should you desire to not listen to the advice I give you in this short book then what ever happens happens. The thought provoking ideas and advice in this book can save you a lot of learning curve time and also hopefully save you some of your hard earned money on lost positions if you just take the time to think what is being presented to you logically. The information in here is brutally honest and practical with pure and transparent content. Stock trading offers huge profit potential for traders if you have the right tools for success from the very start on day one. You need to find an edge and a way of trading that matches your personality and psychology and then then go in the market and get paid. What you can learn from this book takes most traders years to uncover themselves. You can know this information for the cost of this book that as I said can save you quite a large amount of learning curve time and perhaps a lot of money. You're welcome! There is no system in this book. This book contains the information you as a beginning trader must have to become successful and consistently profitable on a daily basis. I don't know about you, but I am in this business to make money. Anyone who tells you anything else is full of BS. It is a risk taking, money making business. If you are not prepared for that then stop reading now. Trading is easy however most brand new traders make it so complicated for themselves that they end up quitting before they have had a chance to make any real money. Don't be that trader. Don't become one of the sheeple of the herd and study what everyone else studies, do what everyone else does, and make the same mistakes everyone else does. Don't get me wrong you will make

some mistakes and perhaps lose some money however if you have done all of the right preparation and studied the right information from the very beginning your mistakes will be minimal and not repeated over and over and over because you'll know better from having read this entire book. I am not saying it is going to happen overnight. Most successful traders and investors I associate with have in the very high thousands of hours of screen time and have their own rules based plan for the type of specific trading and investing they do. They are only looking for the lowest risk highest reward positions with the highest probability of having a positive outcome. If you are looking for anything else or doing it any other way chances are your outcome from the market could be financially unfavorable.

As a brand new investor and trader with zero knowledge of the business you are at a loss as to what information you actually do and do not need and you tend to make the same mistakes as everyone else trying to do this business. Newbie stock traders tend to do what everyone else is doing and study what everyone else is studying thus they have the same results and failures as everyone else, don't be that trader! The market is not a big secret and all of the information you need to make a trading decision is right out in the open. If you know where to find the information and know what to look for you can and will make some money every day in the market provided you are looking at the right information and utilizing the best trading techniques. How to make Consistent Profits in the Stock Market can help you keep it simple and filter the huge amount of information out there down to only what you need to know right away and then can work towards adding more information and studies as you go. My philosophy is to start small and build on success have limited exposure while you hone your skills, then progress as you become more competent and build up your account. All traders who have made it and make money consistently in the market are making it from the beginner traders who have visions of grandeur and dollar signs rolling around in their eyes like some old cartoon. If you want to make it in this business, I would listen to the advice in How to make Consistent Profits in the Stock Market very carefully, I am going to share with you information that professional real money traders don't want you to know about.

Thoughts for Successful TradingThe vast majority of traders do not have a plan. They just buy and sell on gut. They have no concept of how much to buy or sell. They do not know when to get out with a profit or exit with a loss! This all leads to frustration, pain and failure!You have a choice in which you can trade for yourself or you can invest with money managers. If you want to trade for yourself, you will learn with Trendfollowingmentor.com how to develop your trading plan, which will match your personality and risk tolerances. More importantly we will work with you to develop your winning trader's

attitudes. If you decide, that you either do not have the time or fortitude to trade for yourself, you will learn how to have the proper attitude when investing with money managers. I actually do both in order to compound money. I have been trend following since 1994 and have been investing with money managers who approach risk as I do since 1994. I have compounded money over the years not because that I am a great trader but, because of my attitude and how I approach risk. Believe it or not attitude and goals are much more important than your trading methodology. Important aspects of being a successful trader is implementing winning thought patterns & following goals. The vast majority of traders are unwilling to even hear about the psychology of trading!!! Just give me that "Secret indicator", "Trading system" or worse... "Trading Robot"! Once you start learning and focusing on how to think as a successful trader, you are light years ahead of the vast majority. Learning and focusing on being a successful consistent trader means: Realizing that any trade does not have to work That any trade has a 50/50 chance of working That anything can happen. Because of these simple 3 points you realize you must trade with a complete trading plan with all potential outcomes pre planned. You realize you must trade with stops. You realize you must try to keep the inevitable losses small. You realize when a trade does work you must be patient and follow your exact trading plan. I am sure you realize at this point more than 90% of all traders fail. You really have to make a choice. Do you want to be part of the 90% who fail and who seek to be entertained by the "Fun" of the markets? Yes, I am very serious. I speak to many traders.
