Psychopathology  
of Everyday Life  
is a work based  
on Freud's  
researches into  
slips and  
parapraxes from  
1897 onwards,  
one which became  
perhaps the best-  
known of all his  
writings.

Through its stress on what Freud called "switch words" and "verbal bridges", it is considered important for psychopathology.
