"Anam Cara is a rare synthesis of philosophy, poetry, and spirituality. This work will have a powerful and life-transforming experience for those who read it." —Deepak Chopra John O'Donohue, poet, philosopher, and scholar, guides you through the spiritual landscape of the Irish imagination. In Anam Cara, Gaelic for "soul friend," the ancient teachings, stories, and blessings of Celtic wisdom provide such profound insights on the universal themes of friendship, solitude, love, and death as: Light is generous The human heart is never completely born Love as ancient recognition The body is the angel of the soul Solitude is luminous Beauty likes neglected places. The passionate heart never ages To be natural is to be holy Silence is the sister of the divine Death as an invitation to freedom.

After many decades of life experiences that include living in three continents, Dr. Ashley Ansara has come to the realization that humankind should always be willing to seek knowledge, expand ourselves, be receptive to change, and trust our souls to guide us through this life. In Soul Genetic Code, Dr. Ansara shares a new logical hypothesis created from Egyptian belief systems to explain the dynamics of God's relationship to humankind, the universal consciousness, and the humankind psychological consciousness (the mind, emotions, and free will to determine one's destiny) to lead students of life to reconnect to their living souls and become more peaceful, loving, wise, and joyful in the world. Through insights shared to prompt the mind to question, the heart to vibrate, and an energetic movement toward the living soul's truth, others will learn about energy and medicine; the concept of life essence and soul kinetics; the origin, biology, and DNA of the soul; the living soul in ancient Egypt, and much more. The hypothesis provides compelling evidence to accept the fact that genetic dictate our destiny. Environmental factors only put us where do we want to be but never determine where we end up with through life and the outcome of being alive on this earth. Soul Genetic Code offers an innovative, logical hypothesis derived from Egyptian belief systems to guide others on a journey of self-discovery to find their living soul's truth and formalize their destiny

The Oldest Story in the World is a brooding, daring, idiosyncratic exploration of the secret strength of storytelling, in which Phil Cousineau addresses the central theme that runs through all his work, the transportive power of words. Written as a mosaic of meditations, this lyrical book ranges from a twelve-thousand-year-old Aboriginal tale, to a mystical Viking story, a venerable myth from the Seneca, and a modern parable from the world of house painters in San Francisco. Wrapped around the marvels he has collected from around the world are Cousineau's own edgy ruminations, which illuminate the irrepressible impulse for storytelling.

Al-Balki explains symptoms and treatments giving advice on preventive measures and how to return the body and soul to their natural healthy state. An astonishing feat given that many of the conditions he discusses were left largely unknown and untreated for centuries before being clinically defined as such, only as relatively recently as the 20th century. A genius, his insights on human psychological ailments including stress, depression, fear and anxiety, phobic and obsessive-compulsive disorders, together with their treatment by cognitive behavior therapy, relate to us in every way and are in sync with modern psychology. Importantly, they also incorporate a greater dimension to include the soul and the worship of God.

In this timeless and profound inquiry, Aristotle presents a view of the psyche that avoids the simplifications both of the materialists and those who believe in the soul as something quite distinct from body. On the Soul also includes Aristotle's idiosyncratic and influential account of light and colors. On Memory and Recollection continues the investigation of some of the topics introduced in On the Soul. Sachs's fresh and jargon-free approach to the translation of Aristotle, his lively and insightful introduction, and his notes and glossaries, all bring out the continuing relevance of Aristotle's thought to biological and philosophical questions.

A riveting firsthand account of one man's mission to investigate and document some of the most astonishing phenomena of our time—children who speak of previous lives, beg to be taken "home," pine for mothers and husbands and mistresses from another life, and know things that there seems to be no normal way for them to know. From the moment these children can talk, they speak of people and events from the past—not vague stories of centuries ago, but details of specific, identifiable individuals who may have died just months, weeks, or even hours before the birth of the child in question. For thirty-seven years, Dr. Ian Stevenson has traveled the world from Lebanon to suburban Virginia investigating and documenting more than two thousand of these past life memory cases. Now, his essentially unknown work is being brought to the mainstream by Tom Shroder, the first journalist to have the privilege of accompanying Dr. Stevenson in his fieldwork. Shroder follows Stevenson into the lives of children and families touched by this phenomenon, changing from skeptic to believer as he comes face-to-face with concrete evidence he cannot discount in this spellbinding and true story.

"In his diaries, the American philosopher and psychologist William James, for whom the personal and the philosophical were never far apart, recounted how in his late twenties he was confronted with existential despair regarding the issue of free will: do humans have the capacity to act freely and meaningfully? James famously decided that his "first act of free will is to believe in free will," and declared that, "if you can change your mind, you can change your mind, you can change your life." This belief in the efficacy of ideas on our practical beliefs and actions would lead to James becoming one of the founders of the first truly distinctively American philosophy, Pragmatism. In this book philosophy and of pragmatism was first and foremost a philosophy geared towards saving a life; namely, James's own, but with important resources and lessons for saving ours as well. James believed that philosophy was meant to articulate, and help answer, a single existential question, one which lent itself to the title of one of his most famous essays: "Is life worth living?" Through examination of an array of existentially loaded topics covered in his works-truth, God, evil, suffering, death, and the meaning of life-James concluded that it is up to us to make life worth living. He said that our beliefs, the truths that guide our practical guide our practic

In this captivating new memoir, award-winning writer Jessica B. Harris recalls a lost era—the vibrant New York City of her youth, where her social circle included Maya Angelou, James Baldwin, and other members of the Black intelligentsia. In the Technicolor glow of the early seventies, Jessica B. Harris debated, celebrated, and danced her way from the jazz clubs of the Manhattan's West Side to the restaurants of the Village, living out her buoyant youth alongside the great minds of the day—luminaries like Maya Angelou, James Baldwin, and Toni Morrison. My Soul Looks Back is her paean to that fascinating social circle and the depth of their shared commitment to activism, intellectual engagement, and each other. Harris paints evocative portraits of her illustrious friends: Baldwin as he read aloud an early draft of If Beale Street Could Talk, Angelou cooking in her California kitchen, and Morrison relaxing at Baldwin's house in Provence, drinks at Mikell's, a hip West Side club; and the simple joy these

extraordinary people took in each other's company. The book is framed by Harris's relationship with Sam Floyd, a fellow professor at Queens College, who introduced her to Baldwin. More than a memoir of friendship and first love My Soul Looks Back is a carefully crafted, intimately understood homage to a bygone era and the people that made it so remarkable. An Episode

Soul Retrieval Requiem of the Soul

Who knew mapping the genome would lead to carbon dating the soul. And the oldest soul on earth, unbeknownst to her, is a seventeen-year-old girl named Evelyn O'Cleirigh, Eve, living in present day North Dakota. Just as scientists are on the brink of using our DNA to count the number of lifetimes a soul has lived, Eve meets and falls in love with Jude, the only brand new soul created in centuries, and must choose between him and Roman, her apparent love of lifetimes. Her initial choice will affect the course of history; paving the way for a world war of old souls verse new. This is a tale that spans the beginning of time till the end of days-and beyond... Imagine for a second if Milton and Dante collaborated, and everything from "Paradise Lost" to the final battle between God and Lucifer was encompassed within that text, along with all that is implied between the heights of redemption and the circles of Hell. It is a pictograph of human nature; where we came from, how we got here, and most importantly-why we are here. I am known as keeper of the stories of time, and have much to share with thee... Due to the fact that I am not a prevalent character in this tale-I have chosen to remain unknown. I am only the narrator of this story-and although I may show up from time to time within said compilation of this tale, I prefer to remain a mysterious stranger to this universe. It all begins in a time of the Christ; when a secret pact was made between Judas and Jesus forming a tidal wave of emotion and thunder during a climatic 'behind the scenes' knowledge of Lucifer's deception from God... How a new god was forged by the two who set the stage for an answer to end the war between Light and Darkness... His name is Möbius Kain, (the god of truth) and when this tale concludes an empire of balance must be forged to order the chaos that coexists within our world.
