Stella and the gang travel to Witch Mountain to save Felix and what they find along the way could change the course of their adventures forever in this second novel in the whimsical Polar Bear Explorers' Club series. Stella Starflake Pearl has been eagerly awaiting her next adventure, ever since she and Felix returned from the Snowy

Iceland. She fears, however, that she might never be sent on another expedition, especially since the president of the Polar Bear Explorers' Club himself is afraid of her ice princess powers. But when disaster strikes and Felix is snatched by a fearsome witch, Stella and the rest of the junior explorers—including a reluctant new ally from the Jungle Cat Explorers' Club—must set off into the unknown on a forbidden journey to the top of Witch Mountain. What awaits them there is a mystery. The only thing they know is this: No one ever returns from Witch Mountain. In the second installment of Alex Bell's magical The Polar Bear Explorers' Club series, Stella and the gang face villainous vultures, terrifying witch wolves, flying sharks, and eerie picnicking teddy bears on their daring quest to save one of their own.

Ever noticed that women don't feature much in history books, and wondered why? Then this is the book for you. In *The Trouble with Women*, feminist artist Jacky Fleming illustrates how the opinions of supposed male geniuses, such as Charles Darwin (who believed that women have smaller brains than men) and John Ruskin (who believed that women's main function was to praise men), have shaped the fate of women through history, confining them to a life of domesticity and very little else. Get ready to laugh, wince, and rescue forgotten women from the "dustbin of history," while keeping a close eye out for tell-tale "genius hair."

impressive volume highlights over a decade of awe-inspiring oil paintings of the Canadian Arctic by renowned landscape artist, Cory Trépanier. With a backpack full of painting, filming and camping gear, Cory Trépanier traversed more than 40,000 kilometres through six Arctic national parks and 16 Arctic communities--and exploring many more places in between--in a biosphere so remote and untouched that most of its vast landscape had never been painted before. Into the Arctic represents the most ambitious body of artwork ever dedicated to the Canadian Arctic. Featuring vivid and unforgettable imagery together with engaging essays that will inspire and educate, this collection enables readers to experience Cory's evocative and authentic vision of a land that few have had the opportunity to even visit, let alone preserve on canvas. Animals of the Ice and Snow

From bestselling author James Raffan comes an enlightening and original story about a polar bear's precarious existence in the changing Arctic, reminiscent of John Vaillant's *The Golden Spruce*. Nanurjuk, "the bear-spirited one," is hunting for seals on Hudson Bay, where ice never lasts more than one season. For her and her young, everything is in flux. From the top of the world, Hudson Bay looks like an enormous paw print on the torso of the continent, and through a vast network of lakes and rivers, this bay connects to oceans across the globe. Here, at the heart of everything, walks Nanurjuk, or Nanu, one polar bear among the six thousand that traverse the 1.23 million square kilometers of ice and snow covering the bay. For millennia, Nanu's ancestors have roamed this great expanse, living, evolving, and surviving alongside human beings in one of the most challenging and unforgiving habitats on earth. But that world is changing. In the Arctic's lands and waters, oil has been extracted—and spilled. As global

temperatures have risen, the sea ice that Nanu and her young need to hunt seal and fish has melted, forcing them to wait on land where the delicate balance between them and their two-legged neighbors has now shifted. This is the icescape that author and geographer James Raffan invites us to inhabit in *Ice Walker*. In precise and provocative prose, he brings readers inside Nanu's world as she treks uncertainly around the heart of Hudson Bay, searching for nourishment for the children that grow inside her. She stops at nothing to protect her cubs from the dangers she can see—other bears, wolves, whales, human beings—and those she cannot. By focusing his lens on this bear family, Raffan closes the gap between humans and bears, showing us how, like the water of the Hudson Bay, our existence—and our future—is tied to Nanu's. He asks us to consider what might be done about this fragile world before it is gone for good. Masterful, vivid, and haunting, *Ice Walker* is an utterly unique piece of creative nonfiction and a deeply affecting call to action.

A quirky and original comic fantasy from talented Gollancz author Alex Bell Law student Lex Trent's world is inhabited by fearsome magicians, ageing crones and a

menagerie of Gods and Goddesses. And while Lex is seemingly dedicated to his legal studies he's always enjoyed a challenge - which is why he leads a double life as the notorious cat burglar 'The Shadowman' who has been (luckily) evading capture for years. But Lex's luck is about to run out because the Goddess of Fortune has selected him to be her player in the highly dangerous Games. Losing is not an option for Lex (particularly as it so often involves dying) but can he really win each of the perilous rounds? Given that the reward for doing so is money, fame and glory - all things that Lex is quite keen on - he's going to do whatever it takes to make sure he will... and he's certainly got good experience of cheating.

Sabira embarks on a dangerous pilgrimage to the top of her mountain home. When a huge avalanche traps her on the glacier and destroys the pass, she must face up to the merciless mountain - but there are dark and fiery secrets hiding in its depths ...

Raised underground by a robot, twelve-year-old Eva Nine finally finds all she ever wanted in the human colony of New Attica, but something very bad is going on there and unless Eva and her friends stop it, it could mean the end of life on Orbona.

In the bestselling tradition of Hampton Sides's In the Kingdom of Ice, a "gripping adventure tale" (The Boston Globe) recounting Dutch polar explorer William Barents' three harrowing Arctic expeditions—the last of which resulted in a relentlessly challenging year-long fight for survival. The human story has always been one of perseverance—often against remarkable odds. The most astonishing survival tale of all might be that of 16th-century Dutch explorer William Barents and his crew of sixteen, who ventured farther north than any Europeans before and, on their third polar exploration, lost their ship off the frozen coast of Nova Zembla to unforgiving ice. The men would spend the next year fighting off ravenous polar bears, gnawing hunger, and endless winter. In Icebound, Andrea Pitzer masterfully combines a gripping tale of survival with a sweeping history of the great Age of Exploration—a time of hope, adventure, and seemingly unlimited geographic frontiers. At the story's center is William Barents, one of the 16th century's greatest navigators whose larger-than-life ambitions and obsessive quest to chart a path through the deepest, most remote regions of the Arctic ended in both tragedy and glory. Journalist Pitzer did extensive research, learning how to use four-hundred-year-old navigation equipment, setting out on three Arctic expeditions to retrace Barents's steps, and visiting replicas of Barents's ship and cabin. "A resonant

meditation on human ingenuity, resilience, and hope” (The New Yorker), Pitzer’s reenactment of Barents’s ill-fated journey shows us how the human body can function at twenty degrees below, the history of mutiny, the art of celestial navigation, and the intricacies of building shelters. But above all, it gives us a firsthand glimpse into the true nature of courage.

Scientists agree that by the end of this century the polar bear will be the first mammal threatened with extinction due to climate change. "The Last Polar Bear" is the first book to fully document that story. The continued survival of these magnificent white bears in their warming, and melting, Arctic

world is uncertain, yet their fate is also a wake-up call compelling us to act now to stem global warming. Through Steven Kazlowski's unparalleled imagery, the most critical environmental issue of our time is brought to life. "The Last Polar Bear" places the reality of climate change in our hands. We see the plight of the polar bear, an animal already feeling the detrimental effects of our reliance on fossil fuels, as its icy habitat melts. Over the course of the last six years, wildlife photographer Steven Kazlowski has photographed the polar bear in its wild habitat, from Hershel Island in Canada to Point Hope in Alaska. "The Last Polar Bear" pairs his intimate images with anecdotes about his Arctic adventures, as well as authoritative essays about the polar bear in the context of climate change. Alaska based writers Richard Nelson, Charles Wohlforth, Nick Jans, and leading USGS polar bear biologist Steven C. Amstrup draw on decades of experience in the Arctic to cover the biological, cultural, and anthropological aspects of climate change. Dan Glick, long-time correspondent for "Newsweek", addresses the history of climate change while Frances Beinecke, president of the Natural Resources Defence Council, and Theodore Roosevelt IV offer perspectives on activism and politics.
