The School for Good and Evil (The School for Good and Evil, Book 1)

This book offers a highly revealing and troubling view of today’s high school students and the ways they pursue high grades and success. Denise Pope, veteran teacher and curriculum expert, follows five motivated and successful students through a school year, closely shadowing them and engaging them in lengthy reflections on their school experiences. What emerges is a double-sided picture of school success. On the one hand, these students work hard in school, participate in extracurricular activities, serve their communities, earn awards and honours, and appear to uphold school values. But on the other hand, they feel that in order to get ahead they must compromise their values and manipulate the system by scheming, lying, and cheating. In short, they do school, that is, they are not really engaged with learning nor can they commit to such values as integrity and community. The words and actions of these five students – two boys and three girls from diverse ethnic and socioeconomic backgrounds – underscore the frustrations of being caught in a grade trap that pins future success to high grades and test scores. Their stories raise critical questions that are too important for parents, educators, and community leaders to ignore. Are schools cultivating an environment that promotes intellectual curiosity, cooperation, and integrity? Or are they fostering anxiety, deception, and hostility? Do today’s schools inadvertently impede the very values they claim to embrace? Is the success that current assessment practices measure the kind of success we want for our children?

After years of working in schools from within-testifying before Congress and addressing audiences around the world about how to make schools better places for children-John Holt founded Growing Without Schooling magazine in 1977 to support self-directed education and learning outside of school. Each issue is a lively exchange among readers and Holt, packed with useful advice, resource recommendations, and all sorts of legal, pedagogical, and parenting ideas from people who pioneered what we now call homeschooling. John Holt (1983-1985) is the author of How Children Learn and How Children Fail, which together have sold over a million and a half copies, and eight other books about children and learning. His work has been translated into more than 40 languages. Once a leading figure in school reform, John Holt became increasingly interested in how children learn outside of school. The magazine he founded, Growing Without Schooling (GWS), reflects his philosophy, which he called unschooling. GWS was published from 1977 to 2001 and is the first magazine devoted to homeschooling and self-directed education.

Age Level: 9 - 12 | Grade levels: 4th and up Phil Abrams wants what any sixth-grade boy wants: Fit in with classmates. Get along with teachers. Stay out of trouble. Play by the rules. In short, survive his first year of middle school. No such luck. Instead, from day one, Phil is plunged into a wacky whirlwind of wrestling matches, stuck zippers, exploding chili, errant spitballs, sagging gym shorts, barfing cheerleaders, worn sandwiches and belligerent bullies. He discovers survival calls for a new set of rules. The Rules of Never. Because sometimes a guy has to learn the hard way. The Rules of Never is a hilarious introduction to middle school life.

The first in a six-book series, We the Children follows Ben, his tech-savvy friend, Jill, and the class know-it-all, Robert, as they uncover a remarkable history and use it to protect the school. Sixth grader Benjamin Pratt loves history, which makes going to the historic Duncan Oakes School a pretty cool thing. But a wave of commercialization is hitting the area and his beloved school is slated to be torn down to make room for an entertainment park. This would be most kids’ dream—except there’s more to the developers than meets the eye... and more to the school. Because weeks before the wrecking ball is due to strike, Ben finds an old leather pouch that contains a parchment scroll with a note three students wrote in 1791. The students call themselves the Keepers of the School, and it turns out they’re not the only secret group to have existed at Duncan Oakes.

There’s something different about Freddy. And it might just be because he’s a super-powered robot—which is pretty cool. But when his school clamps down on his powers, Freddy will have to figure out a way to act human without caving from the peer pressure. He has three strikes until expulsion. But what’s so wrong with being himself? Freddy is a superhero robot . . . stuck in school. Most robots get to build cars and save the world. But Freddy’s mom says he has to go to school and learn stuff the human way. The only problem is that it’s really hard to be human. And when he breaks the rules too many times, Principal Javid is forced to create a ROBOTIC CODE OF CONDUCT: NO Super-Strength NO Lasers NO Rocket Boosters Now Freddy has three strikes until game over: expulsion. What will life be like with all of the pointing and whispering, but none of the fun? Will his friends even still like him? And who will be able to stop Henrik from terrorizing the other kids? The only good thing about school was that it’s where his friends are and now even that’s changed. But Freddy being a superhero robot might be the only thing that could save everybody . . .

In high school, everyone’s talking about college. What to do. Where to go. Why it’s important. Classes are given on it. Books are written about it. But details get left out. Every year, college graduates learn this the hard way as they step into adulthood. I was one of them. After earning a four-year degree, I went through two of the worst years of my life. Not that my situation is unique. I am a part of a generation that was told to go to college first and sort out the details later. Most of us did. We chased the promise of a big shiny future, and we ended up being chased by the mistakes of our past. That’s not to say we completely regretted going. This book isn’t a list of privileged millennial complaints. It’s a collection of wisdom gained in less than pleasant ways. It’s a story of hardship, failure, victory, and perseverance. It’s all of the things we wish someone had told us. And it takes place before college, in college, after college, and without college. This is the wild, painful, awkward, hilarious, depressing, & beautiful journey from youth to maturity. This is the college book that no one ever gave us.

Congressman John Lewis (GA-5) is an American icon, one of the key figures of the civil rights movement. His commitment to justice and nonviolence has taken him from an Alabama sharecropper's farm to the halls of Congress, from a segregated schoolroom to the 1963 March on Washington, and from receiving beatings from state troopers to receiving the Medal of Freedom from the first African-American president. Now, to share his remarkable story with new generations, Lewis presents March, a graphic novel trilogy, in collaboration with co-writer Andrew Aydin and New York Times best-selling artist Nate Powell (winner of the Eisner Award and LA Times Book Prize finalist for Swallow Me Whole). March is a vivid first-hand account of John Lewis' lifelong struggle for civil and human rights, meditating in the modern age on the distance traveled since the days of Jim Crow and segregation. Rooted in Lewis' personal story, it also reflects on the highs and lows of the broader civil rights movement. Book One spans John Lewis' youth in rural Alabama, his life-changing meeting with Martin Luther King, Jr., the birth of the Nashville Student Movement, and their battle to tear down segregation through nonviolent lunch counter sit-ins, leading to a stunning climax on the steps of City Hall. Many years ago, John Lewis and other student activists drew inspiration from the 1958 comic book Martin Luther King and the Montgomery Story. Now, his own comics bring those days to life for a new audience, testifying to a movement whose echoes will be heard for generations.
