The Vault of Hercules (Order of the Black Sun Book 16)

"The first half of the volume is devoted to the exposition of the ancient evidence, literary and iconographic, for the traditions of Heracles' life and deeds. After a chapter each on the hero's childhood and his madness, the canonical cause of his Twelve Labors, each of the Labors themselves receives detailed treatment in a dedicated chapter. The 'Parerga' or 'Side-Labors' are then treated in a similar level of detail in seven further chapters. In the second half of the book the Heracles tradition is analysed from a range of thematic perspectives. After consideration of the contrasting projections of the figure across the major literary genres, Epic, Tragedy, Comedy, Philosophy, and in the iconographic register, a number of his myth-cycle's diverse fils rouges are pursued: Heracles' fashioning as a folkloric quest-hero; his relationships with the two great goddesses, the Hera that persecutes him and the Athena that protects him; and the rationalisation and allegorisation of his cycle's constituent myths. The ways are investigated in which Greek communities and indeed Alexander the Great exploited the figure both in the fashioning of their own identities and for political advantage. The cult of Heracles is considered in its Greek manifestation, in its syncretism with that of the Phoenician Melqart, and in its presence at Rome, the last study leading into discussion of the use made of Heracles by the Roman emperors themselves and then by early Christian writers. A final chapter offers an authoritative perspective on the limitless subject of Heracles' reception in the western tradition"--

The redecoration of the exhibition spaces at the Borghese palace and villa, undertaken together with the reinstallation of the family's vast art collections, was one of the most important events in the cultural life of eighteenth-century Rome. In this comprehensive study, Carole Paul reconstructs the planning and execution of the project and explains its multifaceted significance: its place in the history of Italian art, architecture, and interior design at a complex moment of transition from baroque to neoclassical style, as well as its unrecognized but profound influence on the development of the modern art museum. The study shows how the installations and decorations worked together to evoke traditional themes in innovative ways. Addressed primarily to a new audience of tourists from abroad, the thematic content of the spaces celebrated the greatness of the Borghese family and of Roman tradition, while their stylistic diversity and sophistication made a case for the continued vitality - even modernity - of Roman art and culture. Designed for the exercise of a highly refined social performance, these sites helped to model the experience of art as a form of enlightened modern civility. As archetypes of human virtue and vice, the gods and heroes of ancient Greece and Rome have figured prominently in Western culture. In art, they have been portrayed time and time again, especially during the Renaissance, Baroque, and Neoclassical periods. *Gods and Heroes in Art* aims to help museum patrons and art lovers recognize the legendary characters of classical antiquity in art. The characters are each described in entries summarizing their distinctive stories, their special attributes, and the ways in which artists have depicted them. Each entry is richly illustrated with reproductions of works of art in which the god or hero is pictured, giving readers a chance to examine images of the character and to understand the work of art better. The informative guide first surveys the pantheon of the Greco-Roman world, then focuses on characters from the Trojan War and *The Odyssey*. The next sections describe kings, philosophers, warriors, and other historical figures. The book concludes with useful indexes, including a list of iconographic symbols associated with the subjects, and a bibliography of essential resources.

Autobiographies from beyond the grave are rare things, for obvious reasons. One cannot demonstrate a spiritual and mortal coexistence outside the human mind. It's the logical conclusion, eternal life can only exist in an individual's psyche but logic doesn't explain why we are here, the enigma of time and space and people's belief in God. Soul Man gives a view that breaks many of these self-imposed barriers, opening the mind to possibilities that could exist outside our known universe, a new existence, a new world leading to experiences the likes of which I doubt you will have ever read before. Optimistic people will tell you anything may be possible, imaginative people will say anything is possible.

Living in Rome under Caligula and later a tutor to Nero, Seneca witnessed the extremes of human behaviour. His shocking and bloodthirsty plays not only reflect a brutal period of history but also show how guilt, sorrow, anger and desire lead individuals to violence. The hero of Hercules Insane saves his own family from slaughter, only to commit further atrocities when he goes mad. The horrifying death of Astyanax is recounted in Trojan Women, and Phaedra deals with forbidden love. In Oedipus a nervous man discovers himself, while Thyestes recounts the bitter family struggle for a crown. Of uncertain authorship, Octavia dramatizes Nero's divorce from his wife and her deportation. The only Latin tragedies to have survived complete, these plays are masterpieces of vibrant, muscular language and psychological insight.

Billionaire explorer David Purdue accidentally steals the wrong relic from under the nose of an old foe, archaeologist Prof. Rita Medley. What he doesn't know, however, is that her husband, who is always by her side, is part of the mafia family Cosa Nostra and harbors some secrets of his own. Meanwhile, investigative journalist Sam Cleave learns that the daughter of his best friend, MI6 agent Patrick Smith, has been abducted from her home. Patrick blames his involvement with Sam Cleave and Dave Purdue for his daughter's kidnapping. But Sam, investigating the kidnappings, realizes that the young girl is but one of seven girls taken from all over Europe. What they've been kidnapped for, is the awful question. When Prof. Medley and her unsavory husband track Purdue down for the relic he stole, Purdue cuts a deal with them to help locate the Vault of Hercules, an arcane legend known only to those who have possessed the stolen relic before. Historian Dr. Nina Gould accompanies Purdue, Cleave, and Prof. Medley's people on an expedition to Greece to find the vault, which reputedly alters regular children into proverbial demigods. But both Prof. Medley's husband and Sam have hidden agendas fueling their reasons for locating the chamber. Sam finds out that the abduction of the girls is linked to the search for the vault, but will he be able to save the children without exposing his mission? Time is running out for the kidnapped girls, while the expedition party barely functions in the midst of all the distrust and danger. Will they be able to make it to Greece on time to discover the Vault of Hercules before falling prey to forces on their

Chief Warrant Officer Craig Thompson, a United States Army Apache Helicopter pilot, is injured while serving in Afghanistan. Now, back home in Fort Campbell, Kentucky, and confined to a wheelchair, his nightmare continues. Luckily, with the help of a ranking officer, Craig managed to avoid being discharged and became an Apache flight instructor in the simulator. Out of the blue, Craig gets recruited into a program, under the guise that he will be helping other soldiers who have been injured while serving. He jumps at the opportunity and is suddenly immersed into a

world of real-life science-fiction and technology. A world where he is able to walk again. But it is also a world of extreme secrecy. So secret is this project that less than a handful of people outside the project know of its existence. The project experiments are conducted in a top-secret, underground facility. The departments within the facility do not know what the other departments are doing, and most of the personnel involved with the project do not know the true and full extent of the project. Soon Craig figures out the truth behind the project and its real intent. Yet he understands the reason for the project and is completely onboard. He continues to play his role in the project. Though the project is plagued by failures, progress is being made, and eventually the end is in sight. Distant, still, but within sight. Craig eventually learns that in a world of secrets, there are always more secrets. And some secrets could cost him everything.

Across the Roman Empire, ubiquitous archaeological, art historical, and literary evidence attests to the significance of bathing for Romans' routines and relationships. Public baths were popularly viewed as necessities of daily life and important social venues. Given the importance of bathing to the Roman style of living, by endowing eight magnificent baths (the so-called imperial thermae) in the city of Rome between 25 BCE - 315 CE, imperial patrons greatly enhanced their popular and political stature. *Decoration and Display in Rome's Imperial Thermae* presents a detailed analysis of the extensive decoration of the best preserved of these bathing complexes, the Baths of Caracalla (inaugurated 216 CE). Maryl B. Gensheimer takes an interdisciplinary approach to existing archaeological data, textual and visual sources, and anthropological theories in order to generate a new understanding of the visual experience of the Baths of Caracalla and show how the decoration played a critical role in advancing imperial agendas. This reassessment of one of the most ambitious and sophisticated examples of large-scale architectural patronage in Classical antiquity examines the specific mechanisms through which an imperial patron could use architectural decoration to emphasize his own unique sociopolitical position relative to the thousands of people who enjoyed his benefaction. The case studies addressed herein--ranging from architectural to freestanding sculpture and mosaic--demonstrate that sponsoring monumental baths was hardly an act of altruism. Rather, even while they provided recreation for elite and sub-altern Romans alike, such buildings were concerned primarily with dynastic legitimacy and imperial largess. Decorative programs articulated these themes by consistently drawing analogies between the subjects of the decoration and the emperor who had paid for it. The unified decorative program--and the messages of imperial power therein--adroitly honored the emperor and consolidated his reputation.

This is the first complete translation of the biographies of fifteen artists, including Annibale Carracci, Caravaggio, Rubens, Van Dyck, and Poussin, written by the seventeenth-century antiquarian Giovan Pietro Bellori. Originally conceived as a continuation of Vasari's famous *Lives*, it is a fundamental source for seventeenth-century Italian art and artistic theory, providing detailed descriptions of extant and lost works of art, while casting light on the cultural politics of contemporary Rome and the relations between Rome and France. The importance of Bellori's

Lives lies in the scrupulous documentation of artists, many of whom he knew personally; the author's detailed descriptions of their works; and his exposition of the classicist theory of art in the introductory lecture, the Idea. This volume contains the twelve Lives published in the original edition of 1672 and three Lives (Guido Reni, Andrea Sacchi, and Carlo Maratti) that survive in manuscript form and that were published for the first time in 1942.
