Featuring nearly three thousand film stills, production shots, and other illustrations, an authoritative history of the cinema traces the development of the medium, its filmmakers and stars, and the evolution of national cinemas around the world

Published in cooperation with the William P. Clements Center for Southwest Studies, Southern Methodist University. In *Land of Necessity*, historians and anthropologists unravel the interplay of the national and transnational and of scarcity and abundance in the region split by the 1,969-mile boundary line dividing Mexico and the United States. This richly illustrated volume, with more than 100 images including maps, photographs, and advertisements, explores the convergence of broad demographic, economic, political,

cultural, and transnational developments resulting in various forms of consumer culture in the borderlands. Though its importance is uncontested, the role of necessity in consumer culture has rarely been explored. Indeed, it has been argued that where necessity reigns, consumer culture is anemic. This volume demonstrates otherwise. In doing so, it sheds new light on the history of the U.S.-Mexico borderlands, while also opening up similar terrain for scholarly inquiry into consumer culture. The volume opens with two chapters that detail the historical trajectories of consumer culture and the borderlands. In the subsequent chapters, contributors take up subjects including smuggling, tourist districts and resorts, purchasing power, and living standards. Others address home décor, housing, urban development, and commercial real estate, while still others consider the circulation of cinematic images, contraband, used cars, and clothing. Several contributors discuss the movement of people across borders, within cities, and in retail spaces. In

the two afterwords, scholars reflect on the U.S.-Mexico borderlands as a particular site of trade in labor, land, leisure, and commodities, while also musing about consumer culture as a place of complex political and economic negotiations. Through its focus on the borderlands, this volume provides valuable insight into the historical and contemporary aspects of the big "isms" shaping modern life: capitalism, nationalism, transnationalism, globalism, and, without a doubt, consumerism. Contributors. Josef Barton, Peter S. Cahn, Howard Campbell, Lawrence Culver, Amy S. Greenberg, Josiah McC. Heyman, Sarah Hill, Alexis McCrossen, Robert Perez, Laura Isabel Serna, Rachel St. John, Mauricio Tenorio-Trillo, Evan R. Ward

The inspirational success story of the

first 100 years of Hutchinson Builders. What started out as a one-man band in 1912, when an English immigrant builder arrived with his family to start a new life in Australia, has grown into the country's largest privately owned construction company. The Hutchies' story straddles a century that witnessed two world wars, the great depression and tumultuous cycles of financial crises against the back drop of the rough and tumble world of construction. As well as tracking the survival and eventual growth of Hutchies into the dynamic and well respected company of today, the book outlines its evolution through successive generations of Jack Hutchinsons at the helm with a fifth generation poised to take on that role. That story is told by way of a historical account as well as captured through the republication and inclusion of every back issue of "Hutchies' Truth", the company's colourful, tabloid-style newsletter covering those years.

A James Patterson Presents Novel From the #1 New York Times and USA Today bestselling author of the Stalking Jack the Ripper series comes a new blockbuster series... Two sisters. One brutal murder. A quest for vengeance that will unleash Hell itself... And an intoxicating romance. Emilia and her twin sister Vittoria are streghe -- witches who live secretly among humans, avoiding notice and persecution. One night, Vittoria misses dinner service at the family's renowned Sicilian restaurant. Emilia soon finds the body of her beloved twin...desecrated beyond belief. Devastated, Emilia sets out to find her sister's killer and to seek vengeance at any cost-even if it means using dark magic that's been long forbidden. Then Emilia meets Wrath, one of the Wicked-princes of Hell she has been warned against in tales since she was a child. Wrath claims to be on Emilia's side, tasked by his master with solving the series of women's murders on the island. But when it comes to the Wicked, nothing is as it seems...

Women have been pivotal in the country music scene since its inception, as Charles K. Wolfe and James E. Akenson make clear in *The Women of Country Music*. Their groundbreaking volume presents the best current scholarship and writing on female country musicians. Beginning with the 1920s career of teenage guitar picker Roba Stanley, the contributors go on to discuss Polly Jenkins and Her Musical Plowboys, 50s honky-tonker Rose Lee Maphis, superstar Faith Hill, the relationship between Emmylou Harris and poet Bronwen Wallace, the Louisiana Hayride's Margaret Lewis Warwick, and more.

Film companies flocked to Nigeria in the years following independence, beginning a long history of interventions by Hollywood and corporate America. The 1980s and 1990s saw a shuttering of cinemas, which were almost entirely replaced by television and direct-to-video movies. However, after 1999, the exhibition sector was revitalized with the construction of multiplexes. *Cinematic Independence* is about the periods that straddle this disappearing act: the immediate decades bracketing independence in 1960, and the years after 1999. At stake is the Nigerian

postcolony's role in global debates about the future of the movie theater. That it was eventually resurrected in the flashy form of the multiplex is not simply an achievement of commercial real estate, but also a testament to cinema's persistence—its capacity to stave off annihilation or, in this case, come back from the dead.

Messages, Signs, and Meanings can be used directly in introductory courses in semiotics, communications, media, or culture studies. Additionally, it can be used as a complementary or supplementary text in courses dealing with cognate areas of investigation (psychology, mythology, education, literary studies, anthropology, linguistics). The text builds upon what readers already know intuitively about signs, and then leads them to think critically about the world in which they live - a world saturated with images of all kinds that a basic knowledge of semiotics can help filter and deconstruct. The text also provides opportunities for readers to do "hands-on" semiotics through the exercises and questions for discussion that accompany each chapter. Biographical sketches of the major figures in the field are also included, as is a convenient glossary of technical terms. The overall plan of the book is to illustrate how message-making and meaning-making can be studied from the specific vantage point of the discipline of semiotics. This third edition also includes updated discussions of information technology throughout, focusing especially on how meanings are now negotiated through such channels as websites, chat rooms, and instant messages.

E. M. Delafield's largely autobiographical novel takes the form of a journal written by an upper-middle-class lady living in a Devonshire village. Written with humour, this charming novel is full of the peculiarities of daily life. The Provincial Lady of the title attempts to avoid disaster and prevent chaos from descending upon her household. But with a husband reluctant to do anything but doze behind The Times, mischievous children and trying servants, it's a challenge keeping up appearances on an inadequate income, particularly in front of the infuriating and haughty Lady Boxe. As witty and delightful today as when it was first published in 1930, Diary of a Provincial Lady is a brilliantly observed comic novel and an acknowledged classic. This beautiful Macmillan Collector's Library edition features an introduction by author and journalist Christina Hardyment. Designed to appeal to the book lover, the Macmillan Collector's Library is a series of beautiful gift-editions of much loved classic titles. If we lived in a liquid world, the concept of a "machine" would make no sense. Liquid life is metaphor and apparatus that discusses the consequences of thinking, working, and living through liquids. It is an irreducible, paradoxical, parallel, planetary-scale material condition, unevenly distributed spatially, but temporally continuous. It is what remains when logical explanations can no longer account for the experiences that we recognize as part of "being alive." Liquid life references a third-millennial understanding of matter that seeks to restore the agency of the liquid soul for

an ecological era, which has been banished by reductionist, "brute" materialist discourses and mechanical models of life. Offering an alternative worldview of the living realm through a "new materialist" and "liquid" study of matter, it conjures forth examples of creatures that do not obey mechanistic concepts like predictability, efficiency, and rationality. With the advent of molecular science, an increasingly persuasive ontology of liquid technologies can be identified. Through the lens of lifelike dynamic droplets, the agency for these systems exists at the interfaces between different fields of matter/energy that respond to highly local effects, with no need for a central organizing system. Liquid Life seeks an alternative partnership between humanity and the natural world. It provokes a re-invention of the languages of the living realm to open up alternative spaces for exploration: Rolf Hughes' "angelology" of language explores the transformative invocations of prose poetry, and Simone Ferracina's graphical notations help shape our concepts of metabolism, upcycling, and designing with fluids. A conceptual and practical toolset for thinking and designing, Liquid Life reunites us with the irreducible "soul substance" of living things, which will neither be simply "solved," nor go away. Mindfulness is the simple and powerful practice of training your attention. It's simple in that it's just about paying attention to what's happening here and now, and powerful because it can keep you from getting lost in thoughts about the future or past, which often generate more stress on top of the real pressures of everyday life. While learning to live in the moment, the joyful mindfulness exercises, meditations, coloring pages, and habit-breakers in this beautifully designed and illustrated book will challenge your powers of observation, investigation, and cultivation while bringing new awareness to your senses, thoughts, and emotions. *I Am Here Now* inspires readers to explore the world with greater curiosity and find moments of mindfulness in everyday life, while unleashing your creativity along the way.

In 1775 Prince Marcantonio Borghese IV and the architect Antonio Asprucci embarked upon a decorative renovation of the Villa Borghese. Initially their attention focused on the Casino, the principal building at the villa, which had always been a semi-public museum. By 1625 it housed much of the Borghese's outstanding collection of sculpture. Integrating this statuary with vast baroque ceiling paintings and richly ornamented surfaces, Asprucci created a dazzling and unified homage to the Borghese family, portraying its legendary ancestors as well as its newly born heir. In this book, Carole Paul reads the inventive decorative program as a set of exemplary scenes for the education of the ideal Borghese prince. Her wide-ranging essay also situates the Villa Borghese among the sumptuous palaces and suburban villas of Rome's collectors of antiquities and outlines the renovated Casino's pivotal role in the historic transition from the princely collection to the public museum. Rounding out this volume is a catalog of the Getty Research Institute's fifty-nine drawings for the refurbishing of the Villa Borghese and

Alberta Campitelli's discussion of sketches for the short-lived Museo di Gabii, the Villa's other antiquities museum.

From a late 15th-century Catalan incunable and drawing on a rich tradition of astrological magic, geomancy, Pythagorean numerology and Hebrew gematria, this practical manual reveals a unique expression of medieval syncretism, the mingling of traditions and the development of new ideas.

This new edition of what has become a standard account of Western expansion and technological dominance includes a new preface by the author that discusses how subsequent developments in gender and race studies, as well as global technology and politics, enter into conversation with his original arguments.

This book takes a sweeping view of the ways we build things, beginning at the scale of products and interiors, to that of regions and global systems. In doing so, it answers questions on how we effect and are affected by our environment and explores how components of what we make—from products, buildings, and cities—are interrelated, and why designers and planners must consider these connections.

Research into Pre-Roman Burial Grounds in Italy results from a specialist workshop held at the University of Groningen in 2011 highlighting new results in the field of funerary archaeology. It contains papers on funerary sites in Italy ranging from Verucchio in Emilia Romagna to Francavilla Marittima in Calabria between the 9th and 4th centuries BC. Four papers deal with the hundreds of tombs excavated at Crustumerium (Rome). Other papers deal with the necropoleis of Francavilla Marittima, Satricum, Verucchio, Vetulonia and Veii. The volume concludes with an article on the excavation of 3700 medieval and later graves around St. Peter's church in the centre of Berlin offering an example of recent developments in recording and assessing large funerary datasets. Archaeologists working on pre-Roman Italy are indeed frequently confronted with large burial grounds holding hundreds to thousands of graves and having complex excavation and publication histories. These and other challenges of funerary archaeology are conscientiously and creatively addressed by the authors in this volume.

-A publication collecting the papers from the CATS conference, Technology & Practice: Studying the European Visual Arts 1800-1850 This publication contains papers from the CATS conference - Technology & Practice: Studying the European Visual Arts 1800-1850. The conference focused on artists' techniques and materials, written sources, conservation science, the history of science and technology, history of trade, and innovation of artists' materials during the first half of the 19th century. In the preceding several decades a succession of art academies emerged throughout Europe, and another focal point of the conference was the impact of these institutions on a new generation of artists, examining how this manifested itself in their paintings, sculpture, interiors and art on paper. This magisterial new work brings fresh insight into the essential functions of early modern Roman society and the development of the modern state.

"Stott finds that male behavior could be strikingly

similar in diverse locales, from taverns and boardinghouses to college campuses and sporting events. He explores the permissive attitudes that thrived in such male domains as the streets of New York City, California during the gold rush, and the Pennsylvania oil fields, arguing that such places had an important influence on American society and culture. Stott recounts how the cattle and mining towns of the American West emerged as centers of resistance to Victorian propriety. It was here that unrestrained male behavior lasted the longest, before being replaced with a new convention that equated manliness with sobriety and self-control."

A sweeping history of premodern architecture told through the material of stone. Spanning almost five millennia, *Painting in Stone* tells a new history of premodern architecture through the material of precious stone. Lavishly illustrated examples include the synthetic gems used to simulate Sumerian and Egyptian heavens; the marble temples and mansions of Greece and Rome; the painted palaces and polychrome marble chapels of early modern Italy; and the multimedia revival in 19th-century England. Poetry, the lens for understanding costly marbles as an artistic medium, summoned a spectrum of imaginative associations and responses, from princes and patriarchs to the populace. Three salient themes sustained this "lithic imagination": marbles as images of their own elemental substance according to

premodern concepts of matter and geology; the perceived indwelling of astral light in earthly stones; and the enduring belief that colored marbles exhibited a form of natural—or divine—painting, thanks to their vivacious veining, rainbow palette, and chance images.

â€œToward a Ludic Architectureâ€ is a pioneering publication, architecturally framing play and games as human practices in and of space. Filling the gap in literature, Steffen P. Walz considers game design theory and practice alongside architectural theory and practice, asking: how are play and games architected? What kind of architecture do they produce and in what way does architecture program play and games? What kind of architecture could be produced by playing and gameplaying?

Writing as Material Practice grapples with the issue of writing as a form of material culture in its ancient and more recent manifestations, and in the contexts of production and consumption. Fifteen case studies explore the artefactual nature of writing — the ways in which materials, techniques, colour, scale, orientation and visibility inform

the creation of inscribed objects and spaces, as well as structure subsequent engagement, perception and meaning making. Covering a temporal span of some 5000 years, from c.3200 BCE to the present day, and ranging in spatial context from the Americas to the Near East, the chapters in this volume bring a variety of perspectives which contribute to both specific and broader questions of writing materialities. The authors also aim to place past graphical systems in their social contexts so they can be understood in relation to the people who created and attributed meaning to writing and associated symbolic modes through a diverse array of individual and wider social practices.

From National Book Award winner Deirdre Bair, the definitive biography of Saul Steinberg, one of The New Yorker's most iconic artists. The issue date was March 29, 1976. The New Yorker cost 75 cents. And on the cover unfolded Saul Steinberg's vision of the world: New York City, the Hudson River, and then...well, it's really just a bunch of stuff you needn't concern yourself with. Steinberg's brilliant depiction of the world according to self-satisfied New Yorkers placed him squarely in the pantheon of the magazine's—and the era's—most celebrated artists. But if you look beyond the searing wit and stunning artistry, you'll find one of the most fascinating lives of the twentieth century. Born in Romania, Steinberg was educated in Milan and was already famous for his satirical drawings when World War II forced him to immigrate to the United States. On a single day, Steinberg became a US citizen, a commissioned officer in the US Navy, and a member of the OSS, assigned to spy in China, North Africa, and Italy. After the war ended, he returned to America and to his art. He quickly gained entree into influential circles that included Saul Bellow, Vladimir Nabokov, Willem de Kooning, and Le

Corbusier. His wife was the artist Hedda Sterne, from whom he separated in 1960 but never divorced and with whom he remained in daily contact for the rest of his life. This conveniently freed him up to amass a coterie of young mistresses and lovers. But his truly great love was the United States, where he traveled extensively by bus, train, and car, drawing, observing, and writing. His body of work is staggering and influential in ways we may not yet even be able to fully grasp, quite possibly because there has not been a full-scale biography of him until now. Deirdre Bair had access to 177 boxes of documents and more than 400 drawings. In addition, she conducted several hundred personal interviews. Steinberg's curious talent for creating myths about himself did not make her job an easy one, but the result is a stunning achievement to admire and enjoy. The electronic version of this title does not contain the 35 Saul Steinberg illustrations that are available in the print edition.

Since precious few architectural drawings and no theoretical treatises on architecture remain from the premodern Islamic world, the Timurid pattern scroll in the collection of the Topkapi Palace Museum Library is an exceedingly rich and valuable source of information. In the course of her in-depth

analysis of this scroll dating from the late fifteenth or early sixteenth century, Gülru Necipoğlu throws new light on the conceptualization, recording, and transmission of architectural design in the Islamic world between the tenth and sixteenth centuries. Her text has particularly far-reaching implications for recent discussions on vision, subjectivity, and the semiotics of abstract representation. She also compares the Islamic understanding of geometry with that found in medieval Western art, making this book particularly valuable for all historians and critics of architecture. The scroll, with its 114 individual geometric patterns for wall surfaces and vaulting, is reproduced entirely in color in this elegant, large-format volume. An extensive catalogue includes illustrations showing the underlying geometries (in the form of incised “dead” drawings) from which the individual patterns are generated. An essay by Mohammad al-Asad discusses the geometry of the muqarnas and demonstrates by means of CAD drawings how one of the scroll’s patterns could be used to design a three-dimensional vault. Well-known art historians from Europe and the Americas discuss the influence of conceptualism on art since the 1970s. Art

After Conceptual Art tracks the various legacies of conceptualist practice over the past three decades. This collection of essays by art historians from Europe and the Americas introduces and develops the idea that conceptual art generated several different, and even contradictory, forms of art practice. Some of these contested commonplace assumptions of what art is; others served to buttress those assumptions. The bulk of the volume features newly written and highly innovative essays challenging standard interpretations of the legacy of conceptualism and discussing the influence of conceptualism's varied practices on art since the 1970s. The essays explore topics as diverse as the interrelationships between conceptualism and institutional critique, neoexpressionist painting and conceptualist paradigms, conceptual art's often-ignored complicity with design and commodity culture, the specific forms of identity politics taken up by the reception of conceptual art, and conceptualism's North/South and East/West dynamics. A few texts that continue to be crucial for critical debates within the fields of conceptual and postconceptual art practice, history, and theory have been reprinted in order to convey the vibrant and ongoing discussion

on the status of art after conceptual art. Taken together, the essays will inspire an exploration of the relationship between postconceptualist practices and the beginnings of contemporary art.
