expanded chapter and appendix on leading millennials, based on Simon Sinek's viral video "Millenials in the workplace" (150+ million views).

Imagine a world where almost everyone wakes up inspired to go to work, feels trusted and valued during the day, then returns home feeling fulfilled. This is not a crazy, idealized notion. Today, in many successful organizations, great leaders create environments in which people naturally work together to do

remarkable things. In his work with organizations around the world, Simon Sinek noticed that some teams trust each other so deeply that they would literally put their lives on the line for each other. Other teams, no matter what incentives are offered, are doomed to infighting, fragmentation and failure. Why? The answer became clear during a conversation with a Marine Corps general. "Officers eat last," he said. Sinek watched as the most junior

Marines ate first while the most senior Marines took their place at the back of the line. What's symbolic in the chow hall is deadly serious on the battlefield: Great leaders sacrifice their own comfort--even their own survival--for the good of those in their care. Too many workplaces are driven by cynicism, paranoia, and self-interest. But the best ones foster trust and cooperation because their leaders build what Sinek calls a

In these troubled times, perhaps no institution has unraveled more quickly and more completely than American medicine. In only a few decades, the medical system has been overrun by organizations seeking to exploit for profit the trust that vulnerable and sick Americans place in their healthcare. Our politicians have proven themselves either unwilling or incapable of reining in

the increasingly outrageous costs faced by patients, and market-based solutions only seem to funnel larger and larger sums of our money into the hands of corporations. Impossibly high insurance premiums and inexplicably large bills have become facts of life; fatalism has set in. Very quickly Americans have been made to accept paying more for less. How did things get so bad so fast? Breaking down this monolithic business into the individual industries—the hospitals, doctors, insurance companies, and drug manufacturers—that together constitute our healthcare system, Rosenthal exposes the recent evolution of American medicine as never before. How did healthcare, the caring endeavor, become healthcare, the highly profitable industry? Hospital systems, which are managed by business executives, behave

like predatory lenders, hounding patients and seizing their homes. Research charities are in bed with big pharmaceutical companies, which surreptitiously profit from the donations made by working people. Patients receive bills in code, from entrepreneurial doctors they never even saw. The system is in tatters, but we can fight back. Dr. Elisabeth Rosenthal doesn't just explain the symptoms, she diagnoses and treats the disease itself. In clear and practical terms, she spells out exactly how to decode medical doublespeak, avoid the pitfalls of the pharmaceuticals racket, and get the care you and your family deserve. She takes you inside the doctor-patient relationship and to hospital C-suites, explaining step-by-step the workings of a system badly lacking transparency. This is about what we can do, as individual patients, both to navigate

From the back cover: Once upon a time, a silly, impossible little Gem named Pink Diamond ran away from her Homeworld to the planet Earth. She transformed into Rose Quartz and gave up her existence to create a half-human child, Steven Universe. But so long as Steven has her Gem, can they BOTH exist? Is he her? Is she him? Is she trapped inside his Gem? This is so DISORIENTING! In a story unlike any other-- made up of multiple points of view-- who gets to tell the Tale

money laundering, accounting fraud, and tax evasion connected to foreign bribery. The first step, however, in enforcing foreign bribery and related offences is effective detection. This study looks at the primary sources of detection for the foreign bribery offence and the role that certain public agencies and private sector actors can play in uncovering this crime. It examines the practices developed in different sectors and countries which have led to the successful detection of foreign bribery with a view to sharing good practices and improving countries' capacity to detect and ultimately step-up efforts against transnational bribery. The study covers a wide range of potential sources for detecting foreign bribery: self-reporting; whistleblowers and

whistleblower protection; confidential informants and cooperating witnesses; media and investigative journalism; tax authorities; financial intelligence units; other government agencies; criminal and other legal proceedings; international co-operation and professional advisers.

Falun Gong is a modern day spiritual/exercise movement which began in China in 1991 drawing on and combining ancient Chinese traditions. The Chinese Communist Party, alarmed at the growth of the movement and fearing for its own ideological supremacy banned the movement in 1999. Falun Gong practitioners were arrested in the hundreds of thousands and asked to recant. If they did not, they were tortured. If they still did not recant, they disappeared. Allegations surfaced in 2006 that the disappeared were

being killed for their organs which were sold for large sums mostly to foreign transplant tourists. It is generally accepted that China kills prisoners for organs. The debate is over whether the prisoners who are killed are only criminals sentenced to death or Falun Gong practitioners as well. The authors produced a report concluding that the allegations were true. Bloody Harvest sets out the investigations and conclusions of the authors.
