Trends International 2017 Engagement Planner, January 2017 December 2017 , 7 X 9, Sports Illustrated Swimsuit

This open access book outlines new concepts, development models, governance and implementation processes capable of addressing the challenges of transformative urban regeneration of cities at precinct scale.

Education is the key to America's economic growth and prosperity and to our ability to compete in the global economy. It is the path to higher earning power for Americans and is necessary for our democracy to work. It fosters the cross-border, cross-cultural collaboration required to solve the most challenging problems of our time. The National Education Technology Plan 2010 calls for revolutionary transformation. Specifically, we must embrace innovation and technology which is at the core of virtually every aspect of our daily lives and work. This book explores the National Education Technology Plan which presents a model of learning powered by technology, with goals and recommendations in five essential areas: learning, assessment, teaching, infrastructure and productivity.

How can local experiences and the social transformation generated by modernity help to enrich our understanding of the international? What might a version of the much-discussed "non-Western International Relations (IR)" look like? What continuities and discontinuities from the Philippine experience in particular can be useful for understanding other post-colonial polities? The Philippines makes a fascinating case study of a medium-sized, developing, post-colonial, multi-ethnic and multi-cultural state in Southeast Asia. Cruz, Adiong and their contributors map horizons of non-Western approaches in Philippine experiences of IR, rooted in the Global South, and in local customs and practice. Examining both theory and praxis, they explore issues as diverse as pre-colonial history, diplomacy, religion, agrarian reform and the Philippines' relationship with key regions in the Global South. The book will appeal to researchers interested in Southeast Asian Studies and alternative perspectives on IR.

Exploring how urban professionals plan, manage and govern cities in emerging economies, this insightful book studies the actions and instruments they employ. It highlights how the paradigms of interventions and approaches to urban management are shifting, indicating that urban governance is becoming increasingly important in dealing with wicked issues, like climate change and social and economic inequalities in cities.

Changing Horizons in the 21st Century

Bringing together over fifty leading global experts, this Research Handbook provides a state-of-the-art overview of research findings regarding Human Resource Management (HRM) in the public sector. Original chapters provide useful insights from two different disciplines: public administration and HRM. They illustrate that the public context of organisations matters and discuss research findings detailing how this plays out in practice.

Taking the students' perspective, Education Policy Outlook 2018: Putting Student Learning at the Centre analyses the evolution of key education priorities and key education policies in 43 education systems. It compares more recent developments in education policy ecosystems (mainly between 2015 ...

Only 15% of employees worldwide are engaged at work. This represents a major barrier to productivity for organizations everywhere – and suggests a staggering waste of human potential. Why is this engagement number so low? There are many reasons — but resistance to rapid change is a big one, Gallup's research and experience have discovered. In particular, organizations have been slow to adapt to breakneck changes produced by information technology, globalization of markets for products and labor, the rise of the gig economy, and younger workers' unique demands. Gallup's 2017 State of the Global Workplace offers analytics and advice for organizational leaders in countries and regions around the globe who are trying to manage amid this rapid change. Grounded in decades of Gallup research and consulting worldwide -- and millions of interviews -- the report advises that leaders improve productivity by becoming far more employee-centered; build strengths-based organizations to unleash workers' potential; and hire great managers to implement the positive change their organizations need not only to survive – but to thrive.

Artificial Intelligence (AI) is changing all aspects of communications and journalism as automatic processes are being introduced into all facets of classical journalism: investigation, content production, and distribution. Traditional human roles in these fields are being replaced by automatic processes and robots. The first section of this book focuses on a discussion of AI, the new emerging field of robot journalism, and the opportunities that AI limitations create for human journalists. The second section offers examples of the new journalism storytelling that empower human journalists using new technologies, new applications, and AI tools. While this book focuses on journalism, the discussion and conclusions are relevant to all content creators, including professionals in the advertising industry, which is a major main source of support for journalism. Contents: Preface About the Authors Acknowledgments AI and Journalism: Introduction (Noam Lemelshtrich Latar) Are AI's Limitations Creating New Opportunities for Human Journalists? (Noam Lemelshtrich Latar) Robot Journalism (Noam Lemelshtrich Latar) Big Data and Advanced Analytics (Amir Ruskin) Automatic Newsrooms (Noam Lemelshtrich Latar) New Story Telling in the Age of AI: "The New News" Storytelling in the Digital Age (Gali Einav and Nathan Lipson) Immersive Journalism: The New Narrative (Doron Friedman and Candice Kotzen) New Journalistic Story Telling Covering Conflict Zones (Noam Lemelshtrich Latar) Evolution, Revolution, or a Real Game Changer? Artificial Intelligence and Sports Journalism (Yair Galily) Cybernetics and the New Storytelling of Government Decision Making in the Age of AI (Noam Lemelshtrich Latar) Conclusions Index Readership: Journalists and content creators in all media platforms as well as students of media studies and journalism. Integrating Human Health into Urban and Transport Planning
The Influence of Labour Legislation on Job Creation and Job Sustainability in South Africa
Education Policy Outlook 2018 Putting Student Learning at the Centre
Paradigm Shifts
Global Trends 2040

This open access collection examines how higher education responds to the demands of the automation economy and the fourth industrial revolution. Considering significant trends in how people are learning, coupled with the ways in which different higher education stakeholders are implementing adaptations, it looks at new programs and technological advances that are changing how and why we teach and learn. The book addresses trends in liberal arts integration of STEM innovations, the changing role of global trends in youth mobility, and the development of lifelong learning programs. This is coupled with case study assessments of the various ways China, Singapore, South Africa and Costa Rica are preparing their populations for significant shifts in labour are already underway. Offering examples of new frameworks in which collaboration between government, industry, and higher education institutions can prevent lagging behind in this fast changing environment, this book is a key read for anyone wanting to should respond to the radical technological shifts underway on the frontline of higher education.

Marketing and Managing Tourism DestinationsRoutledge

As well as being spatial, planning is necessarily also about the future – and yet time has been relatively neglected in the academic, practice and policy literature on planning. Time, in particular the need for longer-term thinking, is critical to responding effecti societal challenges from climate change to an ageing population, poor urban health to sustainable economic development. This makes the relative neglect of time not only a matter of theoretical importance but also increasing practical and political significan accessible, wide-ranging book that considers how planning practice and policy have been constrained by short-termism, as well as by a familiar lack of spatial thinking in policy, in response to major social, economic and environmental challenges. It suggests represent failures to anticipate and shape the future which go well beyond planning systems and practices: rather our failure to plan for the longer-term relates to wider issues in policy-making and governance. This book traces the rise and fall of long-term or so, but also sets out how planning can take responsibility for twenty-first century challenges. It provides examples of successes and failures of longer-term planning from around the world. In short, the book argues that we need to put time back into pla planning which serve to promote the sustainability and wellbeing of future generations.

Curriculum in Early Childhood Education: Re-examined, Reclaimed, Renewed critically and thoroughly examines key questions, aims, and approaches in early childhood curricula. Designed to provide a theoretical and philosophical foundation for examining teach early years, this fully updated and timely second edition provokes discussion and analysis among all readers. What influences curriculum (both historically and currently) to impact what happens in young children's classrooms? Whose perspectives are dominant What values are explicit and implicit? Each chapter gives readers a starting point for re-examining key topics, encourages a rich exchange of ideas in the university classroom, and provides a valuable resource for professionals. This second edition has been f current complexities and tensions inherent in curricular decision-making and features attention to policy, standardization, play, and diversity, providing readers with historical context, current theories, and new perspectives for the field. Curriculum in Early Ch essential reading for those seeking to examine curriculum in early childhood and develop a stronger understanding of how theories and philosophies intersect with the issues that accompany the creation and implementation of learning experiences.

The twenty-first century presents a changing global demographic. People are living longer and older people comprise a continued greater representation in populations. This book provides detailed insights into ageing issues related to longi legislation, policy, and the ageing experience (including a personal reflection on ageing), as well as ageing and the environment, intergenerational relations, ageivism and age representations in media. Consequently, the reader will benefit fro complete, holistic understanding of ageing which will enhance their interactions with older people. The contributors here are globally recognised experts in diverse areas within ageing research, scholarship and practice. The volume is, there not limited to health and social care professionals, but also provides insights into the diversity of the context and experience of ageing. The content is also of interest to those studying social gerontology, urban planning, and sociology, as professionals and policy makers.

This scholarly book focuses on the issue of high unemployment and the challenges related thereto in South Africa. It demonstrates the urgent need for research into the contribution of job creation to poverty alleviation and economic grov relevant from a legal, economic and social sciences point of view. The main thesis of the book is to explore the influence of labour legislation on job creation. It investigates sustainability regarding employment relationships through the len participants: business and organised labour. This book adds value to the social justice context from both a societal and business point of view. It provides business and unionised labour a voice from which the influence of labour legislation job sustainability can be addressed.

For many decades, Western European countries have undertaken diverse pathways in tourism development and planning. Most have experienced fast or even unlimited growth, resulting in overtourism and, now, the introduction of policies limits of communities and the sustainability of their resources. Focusing exclusively on tourism development, planning and policy, this book draws together new voices to discuss issues across Belgium, Denmark, Faroe Islands, Finland, Franc Greenland, Iceland, Ireland, Italy, Malta, Norway, Portugal, Spain, Sweden and the UK. An invaluable collection for policy-makers, researchers and academics, this book is also an insightful source of engaging contemporary case studies for us classroom.

This Guidance provides a clear and practical introduction to the challenges faced in working in situations of forced displacement, and provides guidance to donor staff seeking to mainstream responses to forced displacement into developm co-operation.

Digital Participatory Planning outlines developments in the field of digital planning and designs and trials a range of technologies, from the use of apps and digital gaming through to social media, to examine how accessible and effective these new methods are. It critically discusses urban planning, democracy, and computing technology literature, and sets out case studies on design and deployment. It assesses whether digital technology offers an opportunity for the public to engage with urban change, to enhance public understanding and the quality of citizen participation, and to improve the proactive possibilities of urban planning more generally. The authors present an exciting alternative story of citizen engagement in urban planning through the reimagination of participation that will be of interest to students, researchers, and professionals engaged with a digital future for people and planning.

Climate change, and the resultant impact on resource management and societal wellbeing, is one of the greatest challenges facing businesses and their long-term performance. Uncertainty about access to resources, unanticipated weather events, rapidly changing market conditions and potential social unrest is felt across all business and industry sectors. This book sets out an engaging step-by-step scenario-planning method that executives, Board members, managers and consultants can follow to develop a long-term strategy for climate change tailored for their business. Most climate change strategy books discuss climate mitigation only, focusing on how companies engage with carbon policy, new technologies, markets and other stakeholders about reducing carbon emissions. This book explores these themes but also looks at strategizing for climate change adaptation. Adaptation is equally important, especially given that companies cannot negotiate with nature. There is a need to interpret climate science for business in a way that acknowledges the realities of climate change and identifies a way forwards in responding to this uncertain future.

The Fundamentals of Event Design aims to rethink current approaches to event design and production. The textbook explores the relationship between event design and multiple visitor experiences, as well as interactivity, motivation, sensory stimuli and co-creative participation. Structured around the key phases of event design, the book covers all the critical dimensions of event concepting, atmospherics, the application of interactive technologies, project management, team leadership, creative marketing and sustainable production. The concepts of authenticity, creativity, co-creation, imagineering and storytelling are discussed throughout, and practical step-by-step guidance is provided on how to create and deliver unique and memorable events. The chapters include industry voices offering real-life insight from leading international event practitioners and individual and/or team assignments to stimulate learners' creativity, visualisation and problem solving. This is the first textbook in event design that integrates areas of anthropology, social psychology, management, marketing, graphic design and interactivity. Focusing on bringing theory into practice, this is essential reading for all Events Management students.

This book argues that Canada and its international policies are at a crossroads as US hegemony is increasingly challenged and a new international order is emerging. The contributors look at how Canada has been adjusting to this new environment and resetting priorities to meet its international policy objectives in a number of different fields: from the alignment of domestic politics along new foreign policies, to reshaping its international identity in a post-Anglo order, its relationship with international organizations such as the UN and NATO, place among middle powers, management of peace operations and defense, role in G7 and G20, climate change and Arctic policy, development, and relations with the Global South. Embracing multilateralism has been and will continue to be key to Canada's repositioning and its ability to maintain its position in this new world order. This book takes a comprehensive look at Canada's role in the world and the various political and policy variables that will impact Canada's foreign policy decisions into the future. Chapter 22 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

The SME Policy Index is a benchmarking tool for emerging economies to monitor and evaluate progress in policies that support small and medium-sized enterprises.

The Business of War incisively interrogates the development and contemporary implications of the military-industrial complex. It exposes the moral dangers of life in neoliberal economies dependent upon war-making for their growth and brings the Christian tradition's abundance of resources into conversation with this phenomenon. In doing so, the authors invite us to rethink the moral possibilities of Christian life in the present day with an eye toward faithful resistance to "the business of war" and its influence in every aspect of our lives. In combining biblical, historical, theological, and ethical analyses of "the business of war," the authors invite us to better understand it as a new moral problem that demands a new, faithful response. With contributions from: Pamela Brubaker Stan Goff Christina McRorie Logan Mehl-Laituri Kara Slade Won Chul Shin David Swartz Jonathan Tran Myles Werntz Matthew Whelan Tobia Winright

The Handbook of Forensic Mental Health in Africa traces the history of forensic mental health in Africa, discussing the importance of considering cultural differences when implementing Western-validated practices on the continent while establishing state-of-the-art assessment and treatment of justice-involved persons. Experts in the field of forensic mental health throughout Africa explore the current state of forensic mental health policy and service provision, as well as the unique ethical challenges which have arisen with the recent growth of interest in the field. The African and international research literature on violence risk assessment, competency to stand trial, malingering assessment, Not Guilty by Reason of Insanity (NGRI) evaluations, report writing as an expert witness and mental health legislation in the context of forensic practice are explored throughout. Finally, future directions for forensic mental health in Africa are discussed for juvenile, female and elderly offenders. This text is ideal for mental health, criminal justice and legal professionals working in clinical, research and policy contexts.

From its late nineteenth century origins, the concept of protected areas has increased in scope and complexity. It now has to come to terms with the twenty first century world of neo-liberal politics, performance metrics and the growing and complex demands of tourism. This international collection of papers explores how this might be done, detailing the issues involved, and the value and values that protected areas have for economies, peoples and environments. Special attention is given to World Heritage Sites, tourism planning and the relationship with international organizations, to the growth of private protected areas, and to the health values of protected areas. Other subjects include private sector business involvement in protected areas, concessions policy experiments, and how the work of the world's largest protected area agency, the US National Park Service, is adapting to changing political and market demands, and to the challenges of sustainable development. It concludes with a searching interview with a member of UNESCO's World Heritage Committee. The chapters were originally published in a special issue in the Journal of Sustainable Tourism.

Energy consumption and production have major influences on the economy, environment, and society, but in return they are also influenced by how the economy is structured, how the social institutions work, and how the society deals with environmental degradation. The need for integrated assessment of the relationship between energy, economy, environment, and society is clear, and this handbook offers an in-depth review of all four pillars of the energy-economy-environment-society nexus. Bringing together contributions from all over the world, this handbook includes sections devoted to each of the four pillars. Moreover, as the financialization of commodity markets has made risk analysis more complicated and intriguing, the sections also cover energy commodity markets and their links to other financial and non-financial markets. In addition, econometric modeling and the forecasting of energy needs, as well as energy prices and volatilities, are also explored. Each part emphasizes the multidisciplinary nature of the energy economics field and from this perspective, chapters offer a review of models and methods used in the literature. The Routledge Handbook of Energy Economics will be of great interest to all those studying and researching in the area of energy economics. It offers guideline suggestions for policy makers as well as for future research.

Public Relations Planning provides students with an in-depth understanding of the steps involved in planning and executing a successful PR campaign. Taking a strategic approach to the subject, the author brings years of practical experience to the project, helping students see how it all fits together in reality. The book goes beyond an introductory discussion of the theory of PR planning, incorporating material from cutting-edge research in the field. A discussion of the psychological aspects of communication, material on in-house/employee communication, as well as a chapter dedicated to discussing how social media strategies fit into a PR campaign, give students a real edge when it comes to executing an effective campaign. Plenty of global examples and a companion website featuring PowerPoint slides, a test bank, and answer key for end-of-chapter questions round out this excellent resource for students of public relations and corporate communication.

These proceedings represent the work of researchers participating in the 5th European Conference on Social Media (ECSM 2018) which is being hosted this year by Limerick Institute of Technology, Ireland on 21-22 June 2018.

Positive psychological science has experienced extraordinary growth over the past two decades. Research in this area is revealing new strategies and interventions for improving everyday life, health and well-being, work, education, and societies across the globe. Contributions from luminaries in the field provide excellent reviews of the selected topics, summarizing empirical evidence, describing measurement tools, and offering recommendations for improving many aspects of our lives. Comprehensively updated, this second edition not only incorporates the more recent empirical findings: three new chapters on relationships and love, the importance of purpose, and the stimulation of education practice have been added. Focused on peer-reviewed and theory-driven psychological science, this book uniquely establishes a bridge between the intellectual movement for positive psychology and how it works in the real world. This collection of chapters will inspire the reader to creatively find new opportunities to better the human condition, whether these are in our lives, schools, health care settings, or workplaces. This book will be of interest to all psychologists and social scientists, applied researchers, program designers and evaluators, educators, leaders, students, and anyone interested in applying the science of positive psychology to improve everyday life and/or to promote social betterment and justice locally and globally.

Planning Metropolitan Australia

A Framework

This innovative Handbook provides an expansive interrogation of the spaces and places of law, exploring how we engage relationally in a material world, within which we are inter-dependent and reliant, and governed by laws in a dynamic process. It advances novel insights into the numerous intersections of space, place and law in our lives.

Australia has long been a highly (sub)urbanized nation, but the major distinctive feature of its contemporary settlement pattern is that the great majority of Australians live in a small number of large metropolitan areas focused on the state capital cities. The development and application of effective urban policy at a regional scale is a significant global challenge given the complexities of urban space and governance. Building on the editors' previous collection The Australian Metropolis: A Planning History (2000), this new book examines the recent history of metropolitan planning in Australia since the beginning of the twenty-first century. After a historical prelude, the book is structured around a series of six case studies of metropolitan Melbourne, Sydney, Adelaide, Perth, the fast-growing metropolitan region of South-East Queensland centred on Brisbane, and the national capital of Canberra. These essays are contributed by some of Australia's leading urbanists. Set against a dynamic background of economic change, restructured land uses, a more diverse population, and growing spatial and social inequality, the book identifies a broad planning consensus around the notion of making Australian cities more contained, compact and resilient. But it also observes a continuing gulf between the simplified aims of metropolitan strategies and our growing understanding of the complex functioning of the varied communities in which most people live. This book reflects on the raft of planning challenges presented at the metropolitan scale, looks at what the future of Australian cities might be, and speculates about the prospects of more effective metropolitan planning arrangements.

Marketing and Managing Tourism Destinations is a comprehensive and integrated introductory textbook covering both destination marketing and destination management in one volume. It focuses on how destination management is planned, implemented and evaluated as well as the management and operations of destination management organizations (DMOs), how they conduct business, major opportunities, challenges and issues they face to compete for the global leisure and business travel markets. This second edition has been updated to include: • A new chapter on visitor management that includes a section on crisis and disaster management • New material on destination leadership and coordination • New and revised content on digital marketing • New and updated international case examples throughout to show the practical realities and approaches to managing different destinations around the world. It is illustrated in full colour and packed with features to encourage reflection on main themes, spur critical thinking and show theory in practice. Written by an author with many years of industry practice, university teaching and professional training experience, this book is the essential guide to the subject for tourism, hospitality and events students and industry practitioners alike.

Among other issues, this review looks at how the European Union has shown leadership in forging global agreements on sustainable development and climate change, and suggests the enhancement of a whole of EU approach in focusing on poverty reduction and countries that are most in need.

Water Ethics

Improving Everyday Life, Well-Being, Work, Education, and Societies Across the Globe

Citizen Engagement, Democracy, and Design

While the interdependence of the different aspects of water security and the relevance of ethical and distributive aspects is acknowledged in both policy circles and academia, a comprehensive introduction to water ethics is still missing. This book aims to follows from three current interrelated debates: the allocation of water resources, the human right to water, and the commodification and privatisation of water services. These questions create a plea for alternatives to the predominantly consequentialist explores the normative and ethical aspects of flood and water-related risks, and looks at the topic of responsibility: who should be responsible for correcting inequities, or taking remedial action in the case of pollution? These and other questions to be linked within philosophy, such as environmental ethics, climate ethics, the ethics of technology and climate justice, making this text important across a wide range of courses for upper undergraduate and graduate students.

This volume brings together the world's leading experts on urban and transport planning, environmental exposures, physical activity, health and health impact assessment to discuss challenges and solutions in cities. The book provides a conceptual framework future research needs. It presents the current evidence-base, the benefits of and numerous case studies on integrating health and the environment into urban development and transport planning. Within cities there is a considerable variation in the levels of pollution, noise, and temperature, green space availability and physical activity. Many of these exposures, and their adverse health impacts, are related to and are being exacerbated by urban and transport planning and policy. Emerging research suggests that such as road network, distance to major roads, traffic density, household density, industry, and natural and green space can explain a large proportion of the variability in environmental exposures and therefore represent important and highly modifiable factors interlinked system. Decision-makers need not only better data on the complexity of factors in environmental and developmental processes affecting human health, but also an enhanced understanding of the linkages between these factors and health effects most effectively. In recent years, there also has been a shift from trying to change at the national level to more comprehensive and ambitious actions being developed and implemented at the regional and local levels. Cities have come to the forefront of pr climate change, which has co-benefits for health, but yet need better knowledge for wider health-centric action. This book provides the latest and most up-to-date information and studies for academics and practitioners alike.

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a conteste discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems fo world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glim with colored graphs, essential reading.

This booklet is based on the Estimates and Projections of Family Planning Indicators 2019, which includes estimates at the global, regional and country level of contraceptive prevalence, unmet need for family planning and SDG indicator 3.7.1 "Proportion of planning satisfied by modern methods".

Guidance for Donor Policy Makers and Practitioners

The Handbook of Forensic Mental Health in Africa

A Strategic Approach

An Introduction

Putting Student Learning at the Centre

The digital transformation of the 21st century has affected all facets of society and has been highly advantageous in many industries, including urban planning and regional development. The practices, strategies, and developments surrounding urban e-planning in particular have been constantly shifting and adapting to new innovations as they arrive. Trends and Innovations in Urban E-Planning provides an updated panorama of the main trends, challenges, and recent innovations in the field of e-planning through the critical perspectives of diverse experts. This book adds new and updated evidence on recent changes in this field and provides critical insights on these innovations. Covering topics such as citizen engagement, land property management, and spatial planning, this book is an essential resource for students and educators of higher education, researchers, urban planners, engineers, public officials, community groups, and academicians.
