Twiddling Your Thumbs

Art and literature are essential components of a child's education that encourage creativity, self-expression, and abstract, critical thinking. These skills, in turn, help a child excel in math, science, reading, and drama. However, traditional educational settings often destroy a child's innate self-esteem and creativity. Art and Children is an indispensable aid to educators and librarians interested in helping young children achieve their artistic and creative potential. This teaching aid provides thematic, unit-based activities that use art and literature to develop skills such as interpretation, self-expression, critical thinking, experiential learning, and problem solving. Accompanied by numerous examples, it offers step-by-step suggestions on how to plan, implement, and present these units and their related activities. Addresses of art suppliers are also provided.

This is the first critical book on the poetry of Wendy Cope, one of Britain's most widely read poets. Rory Waterman considers her five 'adult' collections, her works for children and her uncollected poems, with many close readings, and careful consideration of her cultural and literary contexts and her poetic development.

The Oxford Handbook of Music and Advertising is an essential guide to the crucial role that music plays in relation to the audio or audiovisual advertising message, from the perspectives of its creation, interpretation, and reception. The book's unique three-part organization reflects this life cycle of an advertisement, from industry inception to mass-mediated text to consumer behaviour. Experts well versed in the practice, analysis, and empirical studies of the commercial message have contributed to the collection's forty-two chapters, which collectively represent the most ambitious and comprehensive attempt to date to address the important intersections of music and advertising. Handbook chapters are self-contained yet share borders with other contributions within a given section and across the major sections of the book, so readers can either study one topic of particular interest or read through to gain an understanding of the broader issues at stake. Within the book's Introduction, each editor has provided an overview of the unifying themes for the section for which they were responsible, with brief summaries of individual contributions at the beginnings of the sections. The lists of recommended readings at the end of chapters are intended to assist readers in finding further literature about the topic. An overview of industry practices by a music insider is provided in the Appendix, giving context for the three parts of the book.

The Poetry Review

First Verses

Narrator Gladys Calliff is eleven years old in 1938 when a worldly schoolteacher turns the small town of Threestep, Georgia, upside down. Miss Grace Spivey defies the traditional curriculum and racial boundaries alike, regaling her charges with readings from the Thousand Nights and a Night and casting a gifted African American student as "chief engineer" of the town's annual festival, newly reinvented as the Baghdad Bazaar. But her progressive actions are not without consequence and ultimately culminate in a night of death-defying stories that take readers on a magic carpet ride from a schoolroom in the South to the banks of the Tigris (and back again).

Cartoons and humorous essays take a look at family values, male-female relations, working women, medicine, dreams, dogs, friendship, marriage, motherhood, anger, and therapy.
