

### Unlocking Contract Law (UNTL)

Some of the most exciting and innovative legal scholarship has been driven by historical curiosity. Legal history today comes in a fascinating array of shapes and sizes, from microhistory to global intellectual history. Legal history has expanded beyond traditional parochial boundaries to become increasingly international and comparative in scope and orientation. Drawing on scholarship from around the world, and representing a variety of methodological approaches, areas of expertise, and research agendas, this timely compendium takes stock of legal history and methodology and reflects on the various modes of the historical analysis of law, past, present, and future. Part I explores the relationship between legal history and other disciplinary perspectives including economic, philosophical, comparative, literary, and rhetorical analysis of law. Part II considers various approaches to legal history, including legal history as doctrinal, intellectual, or social history. Part III focuses on the interrelation between legal history and jurisprudence by investigating the role and conception of historical inquiry in various models, schools, and movements of legal thought. Part IV traces the place and pursuit of historical analysis in various legal systems and traditions across time, cultures, and space. Finally, Part V narrows the Handbooks focus to explore several examples of legal history in action, including its use in various legal doctrinal contexts.

The Criminalization series arose from an interdisciplinary investigation into criminalization, focussing on the principles that might guide decisions about what kinds of conduct should be criminalized, and the forms that criminalization should take. Developing a normative theory of criminalization, the series tackles the key questions at the heart of the issue: what principles and goals should guide legislators in deciding what to criminalize? How should criminal wrongs be classified and differentiated? How should law enforcement officials apply the law's specifications of offences? This, in turn, offers a historical and conceptual account of the development of the modern criminal law in England and as it has spread to common law jurisdictions around the world. The book offers a historical perspective on the development of theories of criminalization. It shows how the emergence of theories of criminalization is inextricably linked to modern understandings of the criminal law as a conceptually distinct body of rules, and how this in turn has been shaped by the changing functions of criminal law as an instrument of government in the modern state. The book is structured in two main parts. The first traces the development of the modern law as a distinct, and conceptually distinct body of rules, looking in particular at ideas of jurisdiction, codification and responsibility. The second part then engages in detailed analysis of specific areas of criminal law, focusing on patterns of criminalization in relation to property, the person, and sexual conduct.

John Bingham was the architect of the reborn of the United States following the Civil War. A leading antislavery lawyer and congressman from Ohio, Bingham wrote the most important part of the Fourteenth Amendment to the Constitution, which guarantees fundamental rights and equality to all Americans. He was also at the center of two of the greatest trials in history, giving the closing argument in the military prosecution of John Wilkes Booth's co-conspirators for the assassination of Abraham Lincoln and in the impeachment of President Andrew Johnson. And more than any other man, Bingham played the key role in shaping the United States' policy towards the occupied ex-Confederate States, with consequences that still haunt our politics. American Founding Son provides the most complete portrait yet of this remarkable statesman. Drawing on his personal letters and speeches, the book traces Bingham's life from his humble roots in Pennsylvania through his career as a leader of the Republican Party. Gerard N. Magliocco argues that Bingham and his congressional colleagues transformed the Constitution that the Founding Fathers created, and did so with the same integrity that their forbears used to create a more perfect union in the 1780s. In this book, Magliocco restores Bingham to his rightful place as one of our great leaders. Gerard N. Magliocco is the Samuel R. Rosen Professor at Indiana University Robert H. McKinney School of Law. He is the author of three books on constitutional law, and his work on Andrew Jackson was the subject of an hour-long program on C-Span's Book TV.

The China-Australia Free Trade Agreement (ChAFTA) negotiations begun under the Howard Government in November 2005, and was not concluded until almost a decade later. The ChAFTA creates encouraging prospects for both countries, regarded as a 'landmark deal' that will safeguard Australia's economy in the years to come. Despite that, high yield investments generally attach with it significant risks. The complexity of China's legal system and often intertwining link between culture and business carries such risks, particularly in relation to cross-border commercial activities. Against the backdrop of the ChAFTA's aim in fostering closer economic integration, the need for further in-depth engagement at all levels between both countries is crucial. The correlation between cultural eloquence and business success have never been more relevant. The success of businesses unlocking opportunities within Chinese markets will also be directly proportionate to the degree of insights on China. It is argued that extensive gaps between China and Australia's mutual understanding will prove to be a major source of contractual disputes. Specific provisions of the ChAFTA's master agreement are not expected to be finalised for another 12 months, at the very least. Anecdotes of prior commercial trading with China since its accession into the World Trade Organisation (WTO) have also been negative in general, where many disputes concern circumstances of contractual breaches. By undertaking a generic examination of the Chinese legal system along with recent reforms unveiled in China, a comparative of contract laws between China and Australia will be assessed within the ChAFTA context. Alternative dispute resolution mechanisms in China will also be examined, where recommendations of best practice guidelines in utilising the ChAFTA will be proposed. Finally, further practical recommendations deemed necessary in enhancing future Sino-Australian relations will be considered.

**Available Open Access under CC-BY-NC licence. Citizenship is always in dispute – in practice as well as in theory – but conventional perspectives do not address why the concept of citizenship is so contentious. This unique book presents a new perspective on citizenship by treating it as a continuing focus of dispute. The authors dispute the way citizenship is normally conceived and analysed within the social sciences, developing a view of citizenship as always emerging from struggle. This view is advanced through an exploration of the entanglements of politics, culture and power that are both embedded and contested in forms and practices of citizenship. This compelling view of citizenship emerges from the international and interdisciplinary collaboration of the four authors, drawing on the diverse disputes over citizenship in their countries of origin (Brazil, France, the UK and the US). The book is essential reading for anyone interested in the field of citizenship, no matter what their geographical, political or academic location.**

**Imagine a world where you can step off a plane in a foreign country and buy street food with a tap of your phone. A world where your assets are protected by futuristic brainwave monitors. A world where you're in control of your medical records, legal contracts, and payment experiences. This is the world that Kyle Kemper envisions in The Unified Wallet - Unlocking the Digital Golden Age. In this book, he explains how cryptocurrency and blockchain will revolutionize everything from commerce to medicine to law. But the full potential of this digital future will not be realized until new systems have been created that will allow for streamlined, secure interoperability between key elements. An open, unified digital wallet will be at the forefront of the digital revolution. Learn how these exciting new technologies will come together under a universal platform, one that will utterly transform the way that commerce is done in the global economy.**

**This volume is for students and scholars of intellectual property law, practitioners seeking creative arguments from across the field, and policymakers searching for solutions to changing social and technological issues. The book explores the tensions between two fundamentally competing demands made of IP law.**

**European Law is a core element of all law degrees in England and Wales. Unlocking EU Law will ensure you grasp the main concepts with ease, providing you with an essential foundation for further study or practice. This new fourth edition is fully up-to-date with the latest developments and includes: The European Union Act 2011 Detailed coverage of the Lisbon Treaty All major new cases This book is essential reading for students studying EU Law on undergraduate courses in the UK.**

**The UNLOCKING THE LAW series is designed specifically to make the law accessible. Features include: aims and objectives at the start of each chapter key facts charts to consolidate your knowledge diagrams to aid learning summaries to help check your understanding of each chapter problem questions with guidance on answering a glossary of legal terminology The series covers all the core subjects required by the Bar Council and the Law Society for entry onto professional qualifications, as well as popular option units. **Transition and Coherence in Intellectual Property Law**

*Universal basic income (UBI) is emerging as one of the most hotly debated issues in development and social protection policy. But what are the features of UBI? What is it meant to achieve? How do we know, and what don't we know, about its performance? What does it take to implement it in practice? Drawing from global evidence, literature, and survey data, this volume provides a framework to elucidate issues and trade-offs in UBI with a view to help inform choices around its appropriateness and feasibility in different contexts. Specifically, the book examines how UBI differs from or complements other social assistance programs in terms of objectives, coverage, incidence, adequacy, incentives, effects on poverty and inequality, financing, political economy, and implementation. It also reviews past and current country experiences, surveys the full range of existing policy proposals, provides original results from micro-tax benefit simulations, and sets out a range of considerations around the analytics and practice of UBI.*

*A SUNDAY TIMES BESTSELLER PRESENTER OF THE BBC RADIO 4 SERIES 'HOW TO STEAL A TRILLION' SHORTLISTED FOR THE ORWELL PRIZE 2019 SUNDAY TIMES BUSINESS BOOK OF THE YEAR AN ECONOMIST POLITICS AND CURRENT AFFAIRS BOOK OF THE YEAR 'You cannot understand power, wealth and poverty without knowing about Moneyland! Simon Kuper, New Statesman 2019: democracy is eating itself, inequality is skyrocketing, the system is breaking apart. Why? Because in 1962, some bankers in London had an idea that changed the world. That idea was called 'offshore'. It meant that, for the first time, thieves could dream big. They could take everything. Join investigative journalist Oliver Bulough on a journey into the hidden world of the new global kleptocrats. See the poor countries where public money is stolen and the rich ones where it is laundered and invested. Watch the crooks at work and at play, and meet their respectable, white-collar enablers. Learn how the new system works and begin to see how we can tackle it.*

*Despite the vital importance of the emerging area of biotechnology and its role in defense planning and policymaking, no definitive book has been written on the topic for the defense policymaker, the military student, and the private-sector bioscientist interested in the "emerging opportunities market" of national security. This edited volume is intended to help close this gap and provide the necessary backdrop for thinking strategically about biology in defense planning and policymaking. This volume is about applications of the biological sciences, here called "biologically inspired innovations," to the military. Rather than treating biology as a series of threats to be dealt with, such innovations generally approach the biological sciences as a set of opportunities for the military to gain strategic advantage over adversaries. These opportunities range from looking at everything from genes to brains, from enhancing human performance to creating renewable energy, from sensing the environment around us to harnessing its power.*

*The extensively updated seventh edition of Unlocking Equity and Trusts will help you grasp the main concepts of Equity and Trusts with ease. Using straightforward language and explaining the law in a clear manner, it provides an excellent foundation for learning and revising. Each chapter in the book contains: Aims and objectives; Activities such as self-test questions; Charts of key facts to consolidate your knowledge; Diagrams to aid memory and understanding; Prominently displayed cases and judgements; Chapter summaries; Essay questions with answer plans; Glossary of legal terms. The Unlocking the Law series is designed specifically to make the law accessible to students coming to study a topic for the first time. All titles in the series follow the same formula and include the same features so students can move easily from one subject to another.*

Offers a thorough examination of Afro-Barbadian migration to Liberia during the mid- to late nineteenth century.

Unlocking Land Law will help you grasp the main concepts of this core subject with ease. Containing accessible explanations in clear and precise terms that are easy to understand, it provides an excellent foundation for learning and revising land law. The information is clearly presented in a logical structure and the following features support learning, helping you to advance with confidence: clear learning outcomes at the beginning of each chapter set out the skills and knowledge you will need to get to grips with the subject; key facts summaries throughout chapter allow you to progressively build and consolidate your understanding; end-of-chapter summaries provide a useful check-list for each topic; cases and judgments are highlighted to help you find them and add them to your notes quickly; frequent activities and self-test questions are included so you can put your knowledge into practice; sample essay questions with annotated answers prepare you for assessment. This 7th edition has been extensively rewritten and updated to include discussion of recent changes and key developments in land law. These are the different ways in which the Covid-19 pandemic has affected property transactions, and the changes in the rules with regard to electronic signatures and the witnessing of wills, as well as coverage of key recent cases and judgments, and their effect on the law.

Land law is a core element of all law degrees in England and Wales. Unlocking Land Law will ensure that you grasp the main concepts of this core area with ease, providing you with an indispensable foundation to the subject. This third edition of Unlocking Land Law is fully up-to-date with the latest changes in the law and now includes discussion of home information packs (HIPs), the move towards e-conveyancing, developments in proprietary estoppel, and all the major new cases.

South Western Reporter. Second Series

Pirate Cinema

The Strategy for a Volatile, Fragmented Business Environment

Unlocking Equity and Trusts

Islam and the Trajectory of Globalization

The Royal Path of Life

From the New York Times bestselling author of Little Brother, Cory Doctorow, comes Pirate Cinema, a new tale of a brilliant hacker runaway who finds himself standing up to tyranny. Trent McCauley is sixteen, brilliant, and obsessed with one thing: making movies on his computer by reassembling footage from popular films he downloads from the net. In the dystopian near-future Britain where Trent is growing up, this is more illegal than ever; the punishment for being caught three times is that your entire household's access to the internet is cut off for a year, with no appeal. Trent's too clever for that too happen. Except it does, and it nearly destroys his family. Shamed and shattered, Trent runs away to London, where he slowly learns the ways of staying alive on the streets. This brings him in touch with a demimonde of artists and activists who are trying to fight a new bill that will criminalize even more harmless internet creativity, making felons of millions of British citizens at a stroke. Things look bad. Parliament is in power of a few wealthy media conglomerates. But the powers-that-be haven't entirely reckoned with the power of a gripping movie to change people's minds.... At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Japan today is caught up in chronic economic crisis, its financial system wracked by record-breaking bankruptcies and its companies hobbled by bad balance sheets, overproduction, and weak consumer demand. In turn, Japan's faltering fortunes have sent shock waves across Asia, triggering the collapse of economies in South Korea, Thailand, and other Asian countries that followed its model for rapid growth and development. While a growing chorus of Japanese politicians, business leaders, and economic analysts blame the current troubles on the misguided policies of Japan's Ministry of Finance, the root of Japan's malaise lies more fundamentally in the contradictory relationship that first made it a record powerhouse: the combination of businesses that aggressively compete for profits in the best tradition of free enterprise with a government bureaucracy that controls the economy with a heavy thicket of regulation and guidance. And so far, despite ringing declarations of reform, the entrenched bureaucracy shows little willingness -- or ability -- to make the significant reforms that Japan (and its Asian economic disciples) needs to recover. In this book, a cross-section of Japanese, American, and European journalists and authorities in the business, political, and economic sectors examine the problems caused by over-regulation, and offer solutions for reshaping the Japanese marketplace. In Part One, former Japanese Prime Minister Yasuhiro Nakasone, Vice Minister of Finance Eisuke Sakakibara, and some of America's and Japan's leading experts on the Japanese economy map out the long road to regulatory reform. They analyze the postwar origins of today's bureaucracy, current attitudes toward regulation among politicians and the public, and the changes in both policymaking and mind set that must occur to achieve true reform. Part Two focuses on the effects of over-regulation, ranging from ill-fated economic stimulus involving Japan's financial system, insurance markets, non-profit industries, and regulatory agencies. It is time, as Japanese politician Ichiro Ozawa once famously put it, for Japan to become a "normal country." This book not only underlines the critical nature of the problem, but explains how it can be solved.

This open access book presents a comprehensive and up-to-date collection of knowledge on the state of crowdfunding research and practice. It considers crowdfunding models and their different manifestations across a variety of geographies and sectors, and explores the perspectives of fundraisers, backers, platforms, and regulators. Gathering insights from a wide range of influential researchers in the field, the book balances concepts, theory, and case studies. Going beyond previous research on crowdfunding, the contributors also investigate issues of community, sustainability, education, and ethics. A vital resource for anyone researching crowdfunding, this book offers readers a deep understanding of the characteristics, business models, user-relations, and behavioural patterns of crowdfunding.

Legal research examines subject matter embedded in social circumstances in order to conceptualize theories and prepare a future course of action. This dynamic, inter-disciplinary, and labyrinthine character of legal research requires researchers to be fluid, eclectic, and analytical in their approach. Idea and Methods of Legal Research unearths how the thinking process is to be streamlined in research, how a theme is built on the basis of comprehensive and intensive study, and the paths through which notions of objectivity, feminism, ethics, and purposive character of knowledge are to be understood. The book first explains the meaning, evolution, and scope of legal research, and discusses objectivity and ethics in legal research. It engages with the requirements, advantages, and limits of various doctrinal and non-doctrinal methods and tools, and the points to be considered in selecting a suitable method or combination of methods. It highlights analytical, historical, philosophical, comparative, qualitative, and quantitative methods of legal research. The book then goes on to discuss the use of multi-method legal research, policy research, action research, and feminist legal research and finally, reflects on research-based critical legal writing, as opposed to client-related legal writing. This book, thus, is a comprehensive answer to key questions one faces in legal research.

**A Selected List of Biographical Sketches and Portraits of the Leaders in Business, Professional and Official Life, Together with Brief Notes of the History and Character of Indiana**

*This guide is designed for musicians and music professionals who wish to hone their knowledge of the music business. It is intended as a practical tool to help composers, performers and all those involved in the music world get into the specifics of the management of their intellectual property rights. The guide aims to provide instructive advice on how to build a successful career in music in both developed and developing countries, by generating income from musical talent.*

*Jurisprudence offers a comprehensive overview of legal theory and philosophy. Written in plain English, it examines and demystifies the discipline's major ideas, promoting a deeper understanding of the social, moral and economic dimensions of the law. It critically assesses the major schools of jurisprudential thought throughout history and to the present, from Plato and Aristotle to Enlightenment thinkers, postmodernists and economic analysts. The book challenges students to reconsider their moral intuitions in light of established theories. This edition examines recent debates and literature in legal philosophy. It features new material on scientific advances in cognition and human behaviour in relation to the law. The book expands significantly on its discussion of natural law theory, evolutionary jurisprudence and theories of justice. Special attention is paid to the revival of theological natural law, challenges to legal positivism, assessments of Scandinavian realism and critiques of law and economics from the Austrian economic perspective.*

*An exciting new way to fund social services has recently emerged. This new financing mechanism, called a social impact bond (SIB), has the potential to help us tackle some of our nation's most challenging social problems. Broadly speaking, a SIB is a type of "pay for success" contract where private investors provide the upfront capital to finance a social program, but only recoup their investment and realize returns if the program is successful. Like any new financing instrument, SIBs create numerous regulatory challenges that have not yet been addressed. One unresolved issue is the tax implications of a SIB investment. This Article argues that the current law allows for multiple possible characterizations of the SIB arrangement for tax purposes. This uncertainty as to the correct characterization of a SIB investment can affect a private investor's ultimate tax liability and subject the investor to an unnecessary audit risk. A SIB investment can also expose a non-profit investor to additional taxes or, possibly, even cause it to lose its tax-exempt status. Despite the potentially substantial tax implications of a SIB investment, no guidance exists on this issue. This Article is the first to analyze the federal income tax consequences to investors who participate in a SIB-funded program. It concludes that SIB arrangements should generally be classified as contingent debt under the current tax law but that it may be appropriate to bifurcate the transaction in the case of nonprofit investors. To address the substantial tax uncertainty created by the current law, this Article also argues that IRS guidance is ultimately necessary and suggests ways to structure the SIB arrangement to minimize the risk of any negative tax implications until such guidance is issued. Doing so will hopefully encourage investors to invest in SIBs and thereby unlock an additional source of capital to fund much needed social services.*

*Philosophy of Law: An Introduction provides an ideal starting point for students of philosophy and law as it assume no prior knowledge of either subject. The book is structured around the key issues and themes in the philosophy of law, including: what is the law? - exploring the major legal theories of realism, positivism and natural law the reach of the law - covering authority, rights, liberty, privacy and tolerance criminal responsibility and punishment - including legal defenses, crime, diminished responsibility and theories of punishment. The second edition is updated with important developments in English law, the general impact of the Human Rights Act and the defence of necessity in relation to the Case of the Conjoined Twins. Radical Marxism, Feminist, critical legal studies and critical race theories are also explained against the background of controversy between postmodernism and defences of modernity. New chapters assess the value of traditional legal theory and various critical perspectives and study questions at the end of each chapter help students explore the most important issues in philosophy of law.*

*For the first time ever, Shark Wars and Shark Wars 2: the Battle of Riptide are published together in one single, action-packed edition. Since the dawn of time, prehistoric shark clans called shivers have ruled over the earth's oceans. For eons, the Big Blue has prospered under Shiver Law, and the delicate balance of sea life kept sacred. Until now. When a young shark named Gray is exiled from the safety of his peaceful reef home, he and his best friend Barkley find themselves forced to venture out into open water. In the dangerous open ocean, the two friends learn that not all sharks are interested in upholding Shiver Law, and some sharks are even trying to destroy it. With the ocean on the brink of chaos, Gray must work with his friends to take down the corrupt shivers and bring peace back to the ocean. But first, he'll have to unlock the secrets of his destiny and discover the truth about who-and what-he really is.*

*European Contract Law unification projects have recently advanced from the Draft Common Frame of Reference (2009) to a European Commission proposal for an optional Common European Sales Law (2011) which is to facilitate cross-border marketing. This book investigates for the first time how CESL and DCFR rules would interact with various aspects of domestic law, represented by English and German law. Nineteen chapters, co-authored by British and German scholars, examine such interface issues for e-g-pr contractual relationships, notions of contract, formation, interpretation, and remedies, extending to non-discrimination, third parties, transfers or rights, aspects of property law, and collective proceedings. They go beyond a critical analysis of CESL and DCFR rules by demonstrating where and how CESL rules would interact with neighbouring areas of English and German law before English and German courts, how domestic traditions might influence the application, which aspects might motivate sellers and buyers to choose or reject CESL, and which might serve as model for national legislators. The findings are summarized in the final two chapters.*

*The book examines the growing tension between social movements that embrace egalitarian and inclusivist views of national and global politics, most notably classical liberalism, and those that advance social hierarchy and national exclusivism, such as neoliberalism, neoconservatism, and national populism. In exploring issues relating to tensions and conflicts around globalization, the book identifies historical patterns of convergence and divergence rooted in the monotheistic traditions, beginning with the ancient Israelites that dominated the Near East during the Axial age, through Islamic civilization, and finally by considering the idealism-realism tensions in modern times. One thing remained constant throughout the various historical stages that preceded our current moment of global convergence: a recurring tension between transcendental idealism and various forms of realism. Transcendental idealism, which prioritize egalitarian and universal values, pushed periodically against the forces of realism that privilege established law and power structure. Equipped with the idealism-realism framework, the book examines the consequences of European realism that justified the imperialistic venture into Africa, the Middle East, and Latin America in the name of liberation and liberalization. The ill-conceived strategy has, ironically, engendered the very dysfunctional societies that produce the waves of immigrants in constant motion from the South to the North, simultaneously as it fostered the social hierarchy that transfer external tensions into identity politics within the countries of the North. The book focuses particularly on the role played historically by Islamic rationalism in translating the monotheistic egalitarian outlook into the institutions of religious pluralism, legislative and legal autonomy, and scientific enterprise at the foundation of modern society. It concludes by shedding light on the significance of the Muslim presence in Western cultures as humanity draws slowly but consistently towards what we may come to recognize as the Global Age. The Open Access version of this book, available at <http://www.taylorfrancis.com/books/9781003203360>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.*

*The Unlocking the Law series makes the law accessible. Each chapter contains activities such as quick quizzes and self-test questions, key facts charts to consolidate your knowledge and diagrams to aid learning. Jurisprudence

How to Make a Living from Music

"The book is carefully organized and well written, and it deals with a question that is still of great importance--what is the relationship of the Bill of Rights to the states."--Journal of American History "Curtis effectively settles a serious legal debate: whether the framers of the 14th Amendment intended to incorporate the Bill of Rights guarantees and thereby inhibit state action. Taking on a formidable array of constitutional scholars, . . . he rebuts their argument with vigor and effectiveness, conclusively demonstrating the legitimacy of the incorporation thesis. . . . A bold, forcefully argued, important study."--Library Journal

This third edition offers a logically structured, comprehensive, well-researched and accessible overview of legal theory and philosophy. Written primarily for undergraduate students, it examines and demystifies the discipline's major ideas, and promotes a richer understanding of the social, moral and economic dimensions of the law. By locating the major traditions of jurisprudence within the history of ideas, the author deepens students' understanding of the perennial debates about the nature and function of law and its relation to justice. Fully revised and updated, with new materials on all topics, Suri Ratnapala's Jurisprudence remains an essential text for students and researchers of jurisprudence and legal theory.
