

What The Dinosaurs Did Last Night: A Very Messy Adventure

From the parents who brought us the web sensation "Dinovember," comes photographic proof of what mischief toy dinosaurs can get up to at school. Every November, writer and social media master Refe Tuma and his wife, Susan, work into the night to bring their four children scenes from the secret lives of their toys--specifically the nighttime antics of their plastic dinosaurs. But in the follow-up to the hit What the Dinosaurs Did Last Night, these scampish dinosaurs make the trip to school, hidden in a kid's backpack. Each scene is photographed in meticulous detail, letting viewers joyfully suspend disbelief and think to themselves--just LOOK at what these diminutive dinos did at school!

Eight-year-old Jack and his younger sister Annie find a magic treehouse, which whisks them back to an ancient time zone where they see live dinosaurs.

From the creative parents who brought the world the web sensation "Dinovember" comes photographic proof of what toys get up to when the rest of the house is asleep. You might have noticed weird things happening in your house. Unexplainable messes. Food all over the kitchen floor. Who could the culprits be? Dinosaurs! Boasting bright and hilarious photographs, along with a story written from the point of view of an older, wiser sibling, Refe and Susan Tuma's picture book documents a very messy adventure that shows just what the dinosaurs did last night.

Mother and child ponder the different ways a dinosaur can say goodnight, from slamming his tail and pouting to giving a big hug and kiss, in a picture book featuring ten sleepy dinosaurs which includes the names of each dinosaur on the end papers.

Uncover the mystery of the dinosaur extinction with diagrams, strong photos, and hi/lo text.

*Today, any kid can rattle off the names of dozens of dinosaurs. But it took centuries of scientific effort--and a lot of luck--to discover and establish the diversity of dinosaur species we now know. How did we learn that Triceratops had three horns? Why don't many paleontologists consider Brontosaurus a valid species? What convinced scientists that modern birds are relatives of ancient Velociraptor? In *The Story of the Dinosaurs in 25 Discoveries*, Donald R. Prothero tells the fascinating stories behind the most important fossil finds and the intrepid researchers who unearthed them. In twenty-five vivid vignettes, he weaves together dramatic tales of dinosaur discoveries with what modern science now knows about the species to which they belong. Prothero takes us from eighteenth-century sightings of colossal bones taken for biblical giants through recent discoveries of enormous predators even larger than Tyrannosaurus. He recounts the escapades of the larger-than-life personalities who made modern paleontology, including scientific rivalries like the nineteenth-century "Bone Wars." Prothero also details how to draw the boundaries between species and explores debates such as whether dinosaurs had feathers, explaining the findings that settled them or keep them going. Throughout, he offers a clear and rigorous look at what paleontologists consider sound interpretation of evidence. An essential read for any dinosaur lover, this book teaches us to see an ancient world ruled by giant majestic creatures anew.*

*Find out what really drove the dinosaurs to extinction in this funny, wacky celebration of underpants from top-selling author-illustrator team Claire Freedman and Ben Cort! The mystery of dinosaur extinction is solved! Scientists have plenty of theories about why dinosaurs are extinct, but the UK's bestselling authorillustrator team of Claire Freedman and Ben Cort knows the real answer: The dinos were wiped out in an Underpants War! This wacky celebration of underpants is perfect for reading aloud, and the hilarious antics of T. rex and the gang are endlessly entertaining. Featuring fun, vibrant art and short, rhyming text, *Dinosaurs Love Underpants* is a prehistoric pleasure parents and kids will want to read again and again.*

How the Dinosaur Got to the Museum

That's What Dinosaurs Do

The world ' s leading paleontologist takes us on a visual tour of the latest dinosaur science, illustrated with accurate and stunning paleoart. Dinosaurs are not what you thought they were—or at least, they didn ' t look like you thought they did. Here, world-leading paleontologist Michael J. Benton brings us a new visual guide to the world of the dinosaurs, showing how rapid advances in technology and amazing new fossil finds have changed the way we see these extinct beasts forever. Stunning, brand-new illustrations by paleoartist Bob Nicholls display the latest and most exciting scientific discoveries in vibrant color. From Sinosauropteryx, the first dinosaur to have its color patterns identified—a ginger-and-white striped tail and a " bandit mask " —by Benton ' s team at the University of Bristol to recent research on the surprising mixed feathers and scales of Kulindadromeus, this is one of the first books to include cutting-edge scientific research in paleontology. Each chapter focuses on a particular extinct species, featuring a specially commissioned illustration by Bob Nicholls that brings to life the latest scientific breakthroughs, with accompanying text exploring how paleontologists have determined new details, such as the patterns on skin and the colors of feathers of animals that lived millions of years ago. This visual compendium surprises and challenges everything you thought you knew about what dinosaurs looked like and how they lived.

"A boy keeps a toy dinosaur in his pocket to help him be brave like his dad—but when the dinosaur goes missing, Dad knows just what to do"--

For the first time in board book, from the parents who brought us the web sensation "Dinovember," comes photographic proof of what mischief toy dinosaurs can get up to at school. Every November, writer and social media master Refe Tuma and his wife, Susan, work into the night to bring their four children scenes from the secret lives of their toys--specifically the nighttime antics of their plastic dinosaurs. But in the follow-up to the hit What the Dinosaurs Did Last Night, these scampish dinosaurs make the trip to school, hidden in a kid's backpack. Each scene is photographed in meticulous detail, letting viewers joyfully suspend disbelief and think to themselves--just LOOK at what these diminutive dinos did at school!

Photographs and simple text reveal the mischief toy dinosaurs get into all night long, from knocking over potted plants to painting on walls.

The Age of Dinosaurs: The Rise and Fall of the World's Most Remarkable Animals

A Very Messy Adventure

If you love dinosaurs then you will LOVE this book! On every street in every town, perhaps next door to you, Dinosaurs are doing things you won't believe are true... What do you think

dinosaurs get up to in their free time? I'll tell you something, they're not off eating leaves - they're out having fun! Whether it's trampolining, whizzing around on skates, becoming movie stars - or even astronauts - these dinosaurs have the best time ever. And you can join in the fun! From award-winning author Giles Paley-Phillips and award-winning and bestselling author-

illustrator Liz Pichon, this new edition of an old favourite is a joy from start to finish.

From The Bad Seed and The Good Egg creators, Jory John and Pete Oswald, comes a story about a dinosaur who loves to ROAR. William the dinosaur likes to roar. At the park?"ROAR." At the bus stop?"ROAR!" At the farm? You bet. ROARRR! William never lets the chance to roar pass him by, even if others find it rather bothersome. That's until William gets a sore throat and the doctor warns him not to roar for a WHOLE week. But can this overexcited, boisterous, giant lizard not do what dinosaurs are meant to do? In his humorous and insightful style, Jory John creates an epic story about unapologetically and happily being yourself, no matter the cost. Another side-splitting combination of John's brilliant text and Pete Oswald's expressive and lively illustrations, That's What Dinosaurs Do is a read-aloud that young readers will roar for again and again.

Dinosaurs disappeared completely from the Earth many, many years ago...or did they? An ALA Notable Children's Book A Kirkus Reviews Best Book of the Year! Millions of years ago, dinosaurs roamed the shores of Mesozoic seas. They lay eggs in the shade of ginkgo trees, and as time went on, dinosaurs grew, and grew, and grew. There were so many different species of dinosaurs.

Large, monstrous, and fearsome, they ruled the earth. Until gradually, there were no dinosaurs left. But they didn't disappear completely. Some dinosaurs had feathers, which grew and grew...until all through the skies were hundreds of species of birds, which flew and flew. From the bestselling creator of Dinosaur Dream Dennis Nolan comes a poetic nonfiction picture book about how dinosaurs evolved into birds. A Bank Street Best Book of the Year - Outstanding Merit An ILA-CBC Children's Choice!

"A wonderfully entertaining reminder to young readers that science is ever evolving and that there's always more to learn."-Booklist Join T. Rex and his friend the paleontologist for this

fun, silly story about how what we think we know about dinosaurs may not always stay true... Rex, a cute Tyrannosaurus Rex with a big imagination and even bigger attitude, meets a friendly paleontologist and soon discovers the latest scientific findings ... like dinosaurs can't roar! Hilarity ensues as the paleontologist helps Rex and his dinosaur friends come to terms with today's science. In this unique and fun dinosaur story, common myths are dispelled with real facts in humorous rhymes and changing art. Dinosaurs, dinosaurs, romp, chomp, and roar! But what if we learned there was so much more? From their skin to their size, and their stomps to and fro, We should probably question all that we know!

What the Dinosaurs Did the Night Before Christmas

"Our favorite dinosaurs are back, and this time they must save Santa Claus from a snowstorm! Join them as they plow the road, whizz down a mountain on snowmobiles, zoom through the icy water on a hovercraft, and much more! But where is Santa? And will they manage to dig out his sleigh in time for Christmas day?"--Tp verso.

An American bioengineering research firm erects a theme park on a Caribbean island, complete with living dinosaurs, and invites a group of scientists to be its first terrified guests.

A JUNIOR LIBRARY GUILD GOLD STANDARD SELECTION! A boy who underestimates his power . . . A girl with a gift long thought lost . . . A Land ready for revolution . . . The heir to the Land should be strong. Fierce. Ruthless. At least, that's what Beau's father has been telling him his whole life, since Beau is the exact opposite of what the heir should be. With little control over his future, Beau is kept locked away, just another pawn in his father's quest for ultimate power. That is, until Beau meets a girl who shows him the secrets his father has kept hidden. For the first time, Beau begins to question everything he's ever been told and sets off in search of a rebel who might hold the key to setting things right. Teaming up with a fiery runaway boy, their mission quickly turns into something far greater as sinister forces long lurking in the shadows prepare to make their final move--no matter what the cost. But it just might be Beau who wields the power he seeks . . . if he can go from pawn to player before the Land tears itself apart.

Presents facts about the prehistoric world in which dinosaurs lived, the types of dinosaurs that lived in different time periods, and how dinosaur bones are discovered and studied.

What the Dinosaurs Did Last Night

Few topics are as exciting to young readers as dinosaurs. They learn the most difficult names and minute details just to satisfy their abundant curiosity. This motivating volume about the mighty reptiles answers the big question that budding paleontologists have: Where did the dinosaurs go? Readers will discover the fascinating answers their enquiring inquiring minds seek through comprehensible text, colorful images, and detailed illustrations.

From the parents who brought us the web sensation "Dinovember" comes photographic proof of what toys do at night. Since Toy Story (and maybe since the very first toys!) children and their parents have wondered what it would be like if toys came to life. Refe and Susan Tuma take this wonder several steps further in WHAT THE DINOSAURS DID LAST NIGHT. Every November, writer and social media master Refe Tuma and his wife, Susan, work into the night to bring their four children scenes from the secret lives of their toys -- specifically the nighttime antics of their plastic dinosaurs. The dinosaurs wreck bathrooms, destroy vases, rock out, encounter terrifying hot irons, even do the dishes with hilarious, magical results. Each scene is photographed in meticulous detail, letting viewers joyfully suspend disbelief and think to themselves -- just LOOK what the dinosaurs did last night!

Where does Pony live? What does she like to do? Learn all about the things ponies do in this charming touch & feel board book!

In this brilliant exploration of our cosmic environment, the renowned particle physicist and New York Times bestselling author of Warped Passages and Knocking on Heaven's Door uses her research into dark matter to illuminate the startling connections between the furthest reaches of space and life here on Earth. Sixty-six million years ago, an object the size of a city descended from space to crash into Earth, creating a devastating cataclysm that killed off the dinosaurs, along with three-quarters of the other species on the planet. What was its origin? In Dark Matter and the Dinosaurs, Lisa Randall proposes it was a comet that was dislodged from its orbit as the Solar System passed through a disk of dark matter embedded in the Milky Way. In a sense, it might have been dark matter that killed the dinosaurs. Working through the background and consequences of this proposal, Randall shares with us the latest findings—established and speculative—regarding the nature and role of dark matter and the origin of the Universe, our galaxy, our Solar System, and life, along with the process by which scientists explore new concepts. In Dark Matter and the Dinosaurs, Randall tells a breathtaking story that weaves together the cosmos' history and our own, illuminating the deep relationships that are critical to our world and the astonishing beauty inherent in the most familiar things.

Groovy Joe: Ice Cream & Dinosaurs (Groovy Joe #1)

Dinosaurs

An Asteroid, Extinction, and the Beginning of Our World

The Life and Times of a Cultural Icon

Ice Cream & Dinosaurs

In The Last Days of the Dinosaurs, Riley Black walks readers through what happened in the days, the years, the centuries, and the million years after the impact, tracking the sweeping disruptions that overtook this one spot, and imagining what might have been happening elsewhere on the globe. Life's losses were sharp and deeply-felt, but the hope carried by the beings that survived sets the stage for the world as we know it now. Picture yourself in the Cretaceous period. It's a sunny afternoon in the Hell Creek of ancient Montana 66 million years ago. A *Triceratops horridus* ambles along the edge of the forest. In a matter of hours, everything here will be wiped away. Lush verdure will be replaced with fire. *Tyrannosaurus rex* will be toppled from their throne, along with every other species of non-avian dinosaur no matter their size, diet, or disposition. They just don't know it yet. The cause of this disaster was identified decades ago. An asteroid some seven miles across slammed into the Earth, leaving a geologic wound over 50 miles in diameter. In the terrible mass extinction that followed, more than half of known species vanished seemingly overnight. But this worst single day in the history of life on Earth was as critical for us as it was for the dinosaurs, as it allowed for evolutionary opportunities that were closed for the previous 100 million years.

"THE ULTIMATE DINOSAUR BIOGRAPHY," *hails Scientific American: A thrilling new history of the age of dinosaurs, from one of our finest young scientists. "A masterpiece of science writing." —Washington Post A New York Times Bestseller • Goodreads Choice Awards Winner • A BEST BOOK OF THE YEAR: Smithsonian, Science Friday, The Times (London), Popular Mechanics, Science News "This is scientific storytelling at its most visceral, striding with the beasts through their Triassic dawn, Jurassic dominance, and abrupt demise in the Cretaceous." —Nature The dinosaurs. Sixty-six million years ago, the Earth's most fearsome creatures vanished. Today they remain one of our planet's great mysteries. Now *The Rise and Fall of the Dinosaurs* reveals their extraordinary, 200-million-year-long story as never before. In this captivating narrative (enlivened with more than seventy original illustrations and photographs), Steve Brusatte, a young American paleontologist who has emerged as one of the foremost stars of the field—naming fifteen new species and leading groundbreaking scientific studies and fieldwork—masterfully tells the complete, surprising, and new history of the dinosaurs, drawing on cutting-edge science to dramatically bring to life their lost world and illuminate their enigmatic origins, spectacular flourishing, astonishing diversity, cataclysmic extinction, and startling living legacy. Captivating and revelatory, *The Rise and Fall of the Dinosaurs* is a book for the ages. Brusatte traces the evolution of dinosaurs from their inauspicious start as small shadow dwellers—themselves the beneficiaries of a mass extinction caused by volcanic eruptions at the beginning of the Triassic period—into the dominant array of species every wide-eyed child memorizes today, *T. rex*, *Triceratops*, *Brontosaurus*, and more. This gifted scientist and writer re-creates the dinosaurs' peak during the Jurassic and Cretaceous, when thousands of species thrived, and winged and feathered dinosaurs, the prehistoric ancestors of modern birds, emerged. The story continues to the end of the Cretaceous period, when a giant asteroid or comet struck the planet and nearly every dinosaur species (but not all) died out, in the most extraordinary extinction event in earth's history, one full of lessons for today as we confront a "sixth extinction." Brusatte also recalls compelling stories from his globe-trotting expeditions during one of the most exciting eras in dinosaur research—which he calls "a new golden age of discovery"—and offers thrilling accounts of some of the remarkable findings he and his colleagues have made, including primitive human-sized tyrannosaurs; monstrous carnivores even larger than *T. rex*; and paradigm-shifting feathered raptors from China. An electrifying scientific history that unearths the dinosaurs' epic saga, *The Rise and Fall of the Dinosaurs* will be a definitive and treasured account for decades to come. Includes 75 images, world maps of the prehistoric earth, and a dinosaur family tree.*

Syd Hoff's comical, charming illustrations will delight readers young and old alike in this beloved classic *I Can Read* about a boy and his best friend, a dinosaur. Danny loves dinosaurs! When he sees one at the museum and says, "It would be nice to play with a dinosaur," a voice answers, "And I think it would be nice to play with you." So begins Danny and the Dinosaur's wonderful adventures together. For Danny and his prehistoric playmate, even the most everyday activities become extraordinary, like finding a big-enough place to hide a dinosaur in a game of hide-and-seek. But Danny can teach an old dinosaur new tricks. It's the most fun this dinosaur has had in a hundred million years! Originally published over 50 years ago, this beloved classic is a Level 1 *I Can Read* that is perfect for the beginning reader learning to sound out words and sentences. Whether shared at home or in a classroom, the short sentences, familiar words, and simple concepts of Level One books support success for children eager to start reading on their own.

Dinosaurs from one to ten use construction equipment to dig, shovel, roll, and scrape as they build a fun surprise.
