A Day At Vsa

Evapotranspiration is a very complex phenomenon, comprising different aspects and processes (hydrological, meteorological, physiological, soil, plant and others). Farmers, agriculture advisers, extension services, hydrologists, agrometeorologists, water management specialists and many others are facing the problem of evapotranspiration. This book is dedicated to further understanding of the evapotranspiration problems, presenting a broad body of experience, by reporting different views of the authors and the results of their studies. It covers aspects from understandings and concepts of evapotranspiration, through methodology of calculating and measuring, to applications in different fields, in which evapotranspiration is an important factor. The book will be of benefit to scientists, engineers and managers involved in problems related to meteorology, climatology, hydrology, geography, agronomy and agricultural water management. We hope they will find useful material in this collection of papers.

The political theories and usages originated or adopted by Thomas Jefferson have shown such persistence and permanence in their value to our people and government as to demonstrate a far deeper and broader principle underlying them than is always recognized. In popular estimation, Jefferson stands as the founder of the Democratic party, and the developer of the theory of State Rights; and on these foundations are based the so called "Jeffersonian principles," and the respect and acceptance, as well as the criticism and contravention, accorded to them. To meet the need of an edition of the writings of Thomas Jefferson, that embraces all his lifetime, this work has been undertaken. Not content with relying upon the Jefferson MSS. in the Department of State, from which, substantially, the former editions were compiled, the present editor, while making full use of the records of the Department, has obtained many interesting documents from the papers of Jefferson still in the hands of his descendants; the papers of the Continental Congress; the archives of the State of Virginia; the files of the French Foreign Office; the private papers of Washington, Adams, Madison, Monroe, Steuben, and Gates; as well as from many state archives, historical societies, and private collections throughout the country. This is volume one out of twelve, covering the years 1780 to 1782, including the first part of "Notes on Virginia."

This is the era of flexibility. Under constant pressure to be adaptable, organizations increasingly adopt employment practices such as zero-hours contracts, the casualization of the workforce and the use of temporary and agency labour. These flexible practices are central to debates about the changing nature of job quality and its causes, trends and consequences. Arguing that job quality is central to understanding contemporary work, this book explores the internal and external pressures for flexibility in workplaces, professions and sectors and how this pressure shapes workers' experiences of job quality. By studying job quality dynamics via case studies from organizations and occupations in the UK, Poland, Belgium and Sweden, the volumes illustrates the diversity of practices and experiences, as well as market pressures and institutional arrangements which effect working lives. Finally, the editors propose a policy debate on the new concept "flexiquality" - a combination of flexibility and job quality that can be beneficial for both management and workers.
