Skills and techniques from a master therapist on how to help clients connect to their lives spiritually. Although a growing number of Americans are turning to spirituality to help explain and supplement their lives, and a vast majority identify as religious, psychotherapy has long been reluctant to work alongside clients' sense of "something bigger." But what kind of resources might a spiritual sensibility offer from a mental health standpoint? How can therapists helpfully and respectfully integrate spiritual feelings into their work with clients? Bestselling author Bill O'Hanlon tackles these questions and others in this pioneering foray into the uses and pitfalls of spiritualities—both secular and religious—in a therapeutic setting. Here, spirituality is defined by its three integral components: a feeling of connection to something beyond oneself, a capacity for compassion or "feeling with," and a sense of responsibility to make a contribution to others and to the world. Each of these "3 Cs" comes with illustrative anecdotes, case vignettes, and specific techniques for unlocking clients' own spiritual resources. Solution-Oriented Spirituality is O'Hanlon at his best: erudite, conversational, and committed to mining any resource that might help clients get "unstuck" from constrictive behavioral and thought patterns.

A friendly and brief guide to the essentials of hypnosis. Popular author Bill O'Hanlon offers an inviting and reassuring guide to the essentials of hypnosis, alleviating the newcomer's anxieties about how to make the most of this clinical tool. This brief book illustrates the benefits of solution-oriented hypnosis, which draws on the work of the pioneering therapist Milton Erickson (with whom O'Hanlon studied) and emphasizes doing what is needed to get results—which, more often than not, means trusting that the client holds within him- or herself answers or knowledge that need only be tapped or released by the therapist. O'Hanlon covers the key aspects of hypnosis, including: using possibility words and phrases; using passive language; and inducing trance. O'Hanlon offers practical tips and friendly encouragement for the novice hypnotherapist—in his characteristic warm, reassuring, and humorous style.

From sage steppe to mountain forest to the waters of the Pacific Ocean, Oregon's diverse habitats host an equally rich diversity of bird life. BIRDING OREGON guides you to more than 250 of the best birding sites, telling you where to go, when to go, and what you will see when you get there. Whether you are a casual bird watcher or a hard-core lister, this guide will help you make the most of your travels through Oregon. To be included in the book, all of the sites had to meet three criteria. 1. The site must be on public land, or on land accessible to the birding public. Trespassing is not OK, even for birders. 2. The site must be accessible in a normal passenger car. Nothing spoils a birding trip faster than a punctured oil pan or a broken axle. 3. The site must provide consistently good birding, year after year. Good birds can show up anywhere on occasion. But if your time is limited, you want to visit sites that offer the best birding on a regular basis. In addition to the site guides, BIRDING OREGON includes a checklist of 543 species of birds and their seasonal abundance. The Resources section lists contact information for federal and state agencies, conservation and birding organizations, birding trails, and guide services.

Understanding the socio-economic conditions, the drivers for land use change and economic development, along with cultural and social characteristics, is essential to ensure that land use decisions are made that ensure positive economic and social outcomes are optimised. The CoLUPUSIA socio-economic team researched the conditions facing communities and individual households across five pilot areas, each area representing different socio-economic and environmental/ bio-physical conditions. Household, village, key interview surveys and focus group discussions, were completed for 566 households, 19 villages, equivalent to approximately 7.6% of the total number of households and 20% of villages on Seram Island, Central Maluku. The results highlight the challenges that face the communities and how these vary across the pilot sites. For example in Pilot 1 on the north coast of Seram communities have growing populations, a lack of agricultural land with limited options to expand as they border the national park and in Pilot 2 alternative land uses for commodities and oil are posing challenges to the traditional way of life. On the south of the island in Pilots 3 and 4, the challenges of managing population and urban growth with access to land suitable for agricultural production, while maintaining use and access to natural forest (in part the national park) are increasing. The results of the socio-economic survey aim to provide a baseline that provides an understanding of the relationship between the communities on Seram and the natural resources – use and management – available to them. The resulting challenges and opportunities are identified and can be used in the development of land use planning processes and where possible in the development of Payment for Ecosystem Services (PES) schemes.

The definitive guide for succeeding in an era of managed care This state-of-the-art resource—a compilation of works from the nation's leading practitioners—offers mental health practitioners the tools for applying solution-focused brief therapy (SFBT) techniques. Filled with the most current research information, illustrative case examples, and practical suggestions, it uses a framework that integrates the solution-focused model with the problem-focused approach, and offers specific guidance for applying methods across treatment settings. Proven to be effective across economic, gender, and racial lines, this guide will lead to an increased number of therapeutic options for success in an era of managed care.

A tool to help gain momentum and clarity in the sometimes-confusing maze called life and work. The book covers subjects as diverse as parenting, finances, relationships, career, and more.

The CoLUPUSIA socio-economic team researched the conditions facing communities and individual households across five pilot areas, each area representing different socio-economic and environmental/ bio-physical conditions. Household, village, key interview surveys and focus group discussions, were completed for 566 households, 19 villages, equivalent to approximately 7.6% of the total number of households and 20% of villages on Seram Island, Central Maluku. The results highlight the challenges that face the communities and how these vary across the pilot sites. For example in Pilot 1 on the north coast of Seram communities have growing populations, a lack of agricultural land with limited options to expand as they border the national park and in Pilot 2 alternative land uses for commodities and oil are posing challenges to the traditional way of life. On the south of the island in Pilots 3 and 4, the challenges of managing population and urban growth with access to land suitable for agricultural production, while maintaining use and access to natural forest (in part the national park) are increasing. The results of the socio-economic survey aim to provide a baseline that provides an understanding of the relationship between the communities on Seram and the natural resources – use and management – available to them. The resulting challenges and opportunities are identified and can be used in the development of land use planning processes and where possible in the development of Payment for Ecosystem Services (PES) schemes.

A friendly and brief guide to the essentials of hypnosis. Popular author Bill O'Hanlon offers an inviting and reassuring guide to the essentials of hypnosis, alleviating the newcomer's anxieties about how to make the most of this clinical tool. This brief book illustrates the benefits of solution-oriented hypnosis, which draws on the work of the pioneering therapist Milton Erickson (with whom O'Hanlon studied) and emphasizes doing what is needed to get results—which, more often than not, means trusting that the client holds within him- or herself answers or knowledge that need only be tapped or released by the therapist. O'Hanlon covers the key aspects of hypnosis, including: using possibility words and phrases; using passive language; and inducing trance. O'Hanlon offers practical tips and friendly encouragement for the novice hypnotherapist—in his characteristic warm, reassuring, and humorous style.

From sage steppe to mountain forest to the waters of the Pacific Ocean, Oregon's diverse habitats host an equally rich diversity of bird life. BIRDING OREGON guides you to more than 250 of the best birding sites, telling you where to go, when to go, and what you will see when you get there. Whether you are a casual bird watcher or a hard-core lister, this guide will help you make the most of your travels through Oregon. To be included in the book, all of the sites had to meet three criteria. 1. The site must be on public land, or on land accessible to the birding public. Trespassing is not OK, even for birders. 2. The site must be accessible in a normal passenger car. Nothing spoils a birding trip faster than a punctured oil pan or a broken axle. 3. The site must provide consistently good birding, year after year. Good birds can show up anywhere on occasion. But if your time is limited, you want to visit sites that offer the best birding on a regular basis. In addition to the site guides, BIRDING OREGON includes a checklist of 543 species of birds and their seasonal abundance. The Resources section lists contact information for federal and state agencies, conservation and birding organizations, birding trails, and guide services.
