

A Reformation Sourcebook Documents From An Age Of Debate

This book sheds new light on the origin of Calvinism and the Reformed faith through a detailed history of its progress in the Pays de Vaud. A careful examination of twin conflicts – the forced conversion of a Catholic populace to Protestantism by the Bernese; and the struggle of Calvinists against the Zwinglian political and theological ideas that dominated the Swiss Confederation – helps show why the Reformation bloomed where and when it did.

History has long viewed French Protestants as Calvinists. *Refusing to Kiss the Slipper* re-examines the Reformation in francophone Europe, presenting for the first time the perspective of John Calvin's evangelical enemies and revealing that the French Reformation was more complex and colorful than previously recognized. Michael Bruening brings together a cast of Calvin's opponents from various French-speaking territories to show that opposition to Calvinism was stronger and better organized than has been recognized. He examines individual opponents, such as Pierre Caroli, Jerome Bolsec, Sebastian Castellio, Charles Du Moulin, and Jean Mor é ly, but more importantly, he explores the anti-Calvinist networks that developed around such individuals. Each group had its own origins and agenda, but all agreed that Calvin's claim to absolute religious authority too closely echoed the religious sovereignty of the pope. These oft-neglected opponents refused to offer such obeisance-to kiss the papal slipper-arguing instead for open discussion of controversial doctrines. They believed Calvin's self-appointed leadership undermined the bedrock principle of the Reformation that the faithful be allowed to challenge religious authorities. This book shows that the challenge posed by these groups shaped the way the Calvinists themselves developed their reform strategies. Bruening's work demonstrates that the breadth and strength of the anti-Calvinist networks requires us to abandon the traditional assumption that Huguenots and other francophone Protestants were universally Calvinist.

Early modern Protestant scholars closely engaged with Islamic thought in more ways than is usually recognized. Among Protestants, Lutheran scholars distinguished themselves as the most invested in the study of Islam and Muslim culture. Mehmet Karabela brings the neglected voices of post-Reformation theologians, primarily German Lutherans, into focus and reveals their rigorous engagement with Islamic thought. Inspired by a global history approach to religious thought, *Islamic Thought Through Protestant Eyes* offers new sources to broaden the conventional interpretation of the Reformation beyond a solely European Christian phenomenon. Based on previously unstudied dissertations, disputations, and academic works written in Latin in the seventeenth and eighteenth centuries, Karabela analyzes three themes: Islam as theology and religion; Islamic philosophy and liberal arts; and Muslim sects (Sunni and Shi ' a). This book provides analyses and translations of the Latin texts as well as brief biographies of the authors. These texts offer insight into the Protestant perception of Islamic thought for scholars of religious studies and Islamic studies as well as for general readers. Examining the influence of Islamic thought on the construction of the Protestant identity after the Reformation helps us to understand the role of Islam in the evolution of Christianity.

Taking the three continents in turn, the documents trace chronologically the transfer of Christianity from the beginning of Western colonization through the end of the Cold War. Traditional forms of Christianity in Asia and Africa are not covered. The emphasis is on the voices of people working in the field--both missionaries and indigenous people--rather than those at the imperial centers.

Curated by acclaimed scholar Nicholas Terpstra, Lives Uncovered is a captivating collection of early modern primary sources organized around the human life cycle. The collection begins with a short essay titled "How to Read a Primary Source," which helps readers recognize different kinds of primary sources and introduces the idea of critical reading. A second brief essay, "Life Cycles in the Early Modern Period," details the organization of the volume and explains each stage in the life cycle within its historical context. Over 150 readings examine men and women from different social classes and different religious and racial groups, addressing topics that include sex and sexuality, food and drink, poverty, crime and punishment, religious tension and coexistence, and migration and emigration. Using a creative range of sources such as letters, wills, laws, diaries, fiction, and poems, Terpstra gives readers a comprehensive picture of everyday life in early modern Europe and in other parts of the globe that Europeans were beginning to settle and colonize. Each of the life-cycle chapters includes a combination of longer readings, shorter readings, and images. Every reading begins with a short introduction that sets the context of the primary source, while review questions complement the main themes of the readings. Over 30 illustrations serve as non-textual primary sources. An index is also provided.

Historical Dictionary of the Reformation and Counter-Reformation provides a comprehensive account of two chains of events_ the Protestant Reformation and the Catholic Counter-Reformation_ that have left an enduring imprint on Europe, America, and the world at large. This is done through a chronology, a introductory essay, a bibliography, and over 300 cross-referenced dictionary entries on persons, places, countries, institutions, doctrines, ideas, and events.

Sourcebook on the Weimar Republic.

*The Reformation and Counter-Reformation represented the greatest upheaval in Western society since the collapse of the Roman Empire a millennium before. The consequences of those shattering events are still felt today—from the stark divisions between (and within) Catholic and Protestant countries to the Protestant ideology that governs America, the world's only remaining superpower. In this masterful history, Diarmaid MacCulloch conveys the drama, complexity, and continuing relevance of these events. He offers vivid portraits of the most significant individuals—Luther, Calvin, Zwingli, Loyola, Henry VIII, and a number of popes—but also conveys why their ideas were so powerful and how the Reformation affected everyday lives. The result is a landmark book that will be the standard work on the Reformation for years to come. The narrative verve of *The Reformation* as well as its provocative analysis of American culture's debt to the period will ensure the book's wide appeal among history readers.*

A History of Christianity examines the development of Christianity from its biblical foundations to modern times. While seeking to be comprehensive, historian Joseph Early Jr. centers on key events, people, theological developments, and conflicts that have shaped Christianity over its two-thousand-year history. He also presents the development of Christianity within the social, political, and economic challenges of the times. In doing so, he paints a clear, detailed, and balanced picture of the opportunities and struggles faced by the church and the contributions made by significant people, institutions, and traditions. **A History of Christianity** is an ideal introductory survey for undergraduate students and any reader who desires to know more about the broad scope of Christianity.

This book presents the debates of the Reformation era through over eighty primary sources. The Reformation transformed Europe, and left an indelible mark on the modern world. It began as an argument about what Christians needed to do to be saved, but rapidly engulfed society in a series of fundamental changes. This Very Short Introduction provides a lively and up-to-date guide to the process. It explains doctrinal debates in a clear and non-technical way, but is equally concerned to demonstrate the effects the Reformation had on politics, society, art, and minorities. Peter Marshall argues that the Reformation was not a solely European phenomenon, but that varieties of faith exported from Europe transformed Christianity into a truly world religion. The complex legacy of the Reformation is also assessed; its religious fervour produced remarkable stories of sanctity and heroism, and some extraordinary artistic achievements, but violence, holy war, and martyrdom were equally its products. A paradox of the Reformation - that it intensified intolerance while establishing pluralism - is one we still wrestle with today.

Western Civilization: A Comparative and Global Approach is a one-author, one-voice narrative history of western civilization from ancient times to the present. Within an overarching chronological approach, individual chapters focus on social, cultural, political, economic, and intellectual life during particular, sometimes overlapping, periods. Religion, everyday life, and transforming moments are the three main themes of the book that make the past interesting, intelligible, and relevant to today's students. Another important feature is the incorporation of a comparative approach—using illustrations, documents, quotes, and visual or written material to provide students with a keener understanding of the West through comparison with other civilizations and cultures. Every chapter includes original source boxes, timelines, and web links to additional and complementary information. An online Instructor's Manual written by the author provides instructors with access to a wide variety of resources including image galleries; web links, maps, test materials, and suggested readings.

"The Christian church worldwide has been taken prisoner by Satan's counterfeit healing." This statement is based on the author's personal experience, modest exposure to the Toronto Blessing, observation of parachurch healing ministries, and extensive historical reconstructions. *Satan's Counterfeit Healing* presents and evaluates Satan's supernatural healing from the Paleolithic period (ca. 45000 BCE) to the contemporary church. The guiding thesis is that Satan and his demonic surrogates perform miracles which are evident as psi paranormal phenomena. These manifestations include physical and exorcistic supernatural healings. Paleolithic and Neolithic periods produced Great Mother goddess worship and healing, which have persisted ever since. These idolatries, combined with OT nature gods, were a backdrop to Jesus' true miracles. For two thousand years of church history there's been a tug-of-war between true and false healing. Mother goddess as Mariological shrine healing joined with natural and demonic magic, and esoteric energy psi. Alongside these the Holy Spirit has raised up genuine healers and their ministries. Modern healing is marked by energy counterfeits and faith healing, the latter especially accompanied by trance, false prophecy, and psi transformations. True divine healing can be recovered when Christians repudiate nature gods, reject false prophecy, and restore proper eschatology.

Religion and Society in Early Modern England is a thorough sourcebook covering interplay between religion, politics, society, and popular culture in the Tudor and Stuart periods. It covers the crucial topics of the Reformation through narratives, reports, literary works, orthodox and unorthodox religious writing, institutional church documents, and parliamentary proceedings. Helpful introductions put each of the sources in context and make this an accessible student text.

In 1517, Augustinian monk Martin Luther wrote the infamous Ninety-Five Theses that eventually led to a split from the Catholic Church. The movement became popularly identified as the Protestant Reformation, but Church reform actually began well before the schism. In *The Church and the Age of Reformations (1350-1650)*, historian Joseph T. Stuart and theologian Barbara A. Stuart highlight the watershed events of a confusing period in history, providing a broader—and deeper—historical context of the era, including the Council of Trent, the rise of humanism, and the impact of the printing press. The Stuarts also profile important figures of these tumultuous centuries—including Thomas More, Teresa of Ávila, Ignatius of Loyola, and Francis de Sales—and show that the saints demonstrated the virtues of true reform—charity, unity, patience, and tradition. You will learn: Reform efforts in the Catholic Church were underway before Luther's Ninety-Five Theses. The Church did not sell the forgiveness of sins with indulgences. Millions of people did not die in the Spanish Inquisition; there were less than 5,000 deaths during a 350-year period. Inquisitions led to legal advances such as grand juries, the need for multiple witnesses, and defendant protections that are still in place today. The so-called Catholic Reformation was conducted in four stages and exhibited respect for Church authority, human free will, and the saints, and focused on the new universal reach of the Church around the globe due to missionary work. A map and chronology are included. Books in the *Reclaiming Catholic History* series, edited by Mike Aquilina and written by leading authors and historians, bring Church history to life, debunking the myths one era at a time.

Detailed and comprehensive, the work includes 60 primary source documents that shed light on the character, personalities, and events of that time and provides context, questions, and activities for successfully incorporating these documents into academic research and reading projects. A special section provides guidelines for better evaluating and understanding primary documents. During the Reformation, Europeans were engaged in a debate that would alter the course of European history. This debate was about how to understand and practice the Christian faith. Never before had so many people weighed in on a topic of such importance. This book presents the debates of the Reformation era through over eighty primary sources. Some of the documents present formal debates. Others represent informal debates or disputes, with one text responding directly to the other. Still other sections present texts that offer divergent approaches to or perspectives on specific ideas. These too were part of the century-long debate that characterized the Reformation. The author provides an essay on how to read primary sources. Each chapter opens with a brief introduction, and each group of primary sources is preceded by information on historical context as well as focus questions. Further readings are provided at the end of each chapter, and a map of Europe divided by religions is included.

The Reformation: A Very Short Introduction

Historical Dictionary of the Reformation and Counter-Reformation

The Reformation Theologians

The Reformation was the seismic event in European history over the past 1000 years, and one which tore the medieval world apart. Not just European religion, but thought, culture, society, state systems, personal relations - everything - was turned upside down. Just about everything which followed in European history can be traced back in some way to the Reformation and the Counter-Reformation which it provoked. The Reformation is where the modern world painfully and dramatically began, and MacCulloch's great history of it is recognised as the best modern account.

This volume of primary sources brings together letters, memoirs, petitions, tracts, and stories related to religion and reform around the globe from the fifteenth through the eighteenth centuries. The common subject of the sources is the Reformation, and these texts demonstrate the themes and impacts of religious reform in Europe and around the globe. Scholars once framed the Reformation as a sixteenth-century European dispute between Protestant and Catholic churches and states, but now look expansively at connections and entanglements between different confessions, faiths, time periods, and geographical areas. The Reformation coincided with Europeans' expanding reach across the globe as traders, settlers, and colonists, but the role that religion played in this drive has yet to be fully explored. These readings highlight these reformers' engagements with Judaism, Islam, Buddhism, and indigenous spirituality, and the entanglement of Christian reform with colonialism, trade, enslavement, and racism. Offering a sustained, comparative, and interdisciplinary exploration of religious transformations in the early modern world, this collection of primary sources is invaluable to both undergraduate and postgraduate students working on theology, the Reformation, and early modern society.

A Sourcebook of Early Modern European History not only provides instructors with primary sources of a manageable length and translated into English, it also offers students a concise explanation of their context and meaning. By covering different areas of early modern life through the lens of contemporaries' experiences, this book serves as an introduction to the early modern European world in a way that a narrative history of the period cannot. It is divided into six subject areas, each comprising between twelve and fourteen explicated sources: I. The fabric of communities: Social interaction and social control; II. Social spaces: Experiencing and negotiating encounters; III. Propriety, legitimacy, fidelity: Gender, marriage, and the family; IV. Expressions of faith: Official and popular religion; V. Realms intertwined: Religion and politics; and, VI. Defining the religious other: Identities and conflicts. Spanning the period from c. 1450 to c. 1750 and including primary sources from across early modern Europe, from Spain to Transylvania, Italy to Iceland, and the European colonies, this book provides an excellent sense of the diversity and complexity of human experience during this time whilst drawing attention to key themes and events of the period. It is ideal for students of early modern history, and of early modern Europe in particular.

Featuring the one author, one voice approach, this text is ideal for instructors who do not wish to neglect the importance of non-Western perspectives on the study of the past. The book is a brief, affordable presentation providing a coherent examination of the past from ancient times to the present. Religion, everyday life, and transforming moments are the three themes employed to help make the past interesting, intelligible, and relevant to contemporary society.

To understand Calvin's Reformed theology one must see his early context. Eleven scholars have joined in this volume to explore the people, movements, politics, education and controversies that shaped the young man Calvin into the reformer he would become. Sixteenth-century Augsburg comes to life in this beautifully chosen and elegantly translated selection of original documents. Ranging across the whole panoply of social activity from the legislative reformation to work, recreation, and family life, these extracts make plain the subtle system of checks and balances, violence, and self-regulation that brought order and vibrancy to a sophisticated city community. Most of all we hear sixteenth-century people speak: in their petitions and complaints, their nervous responses under interrogation, their rage and laughter. Tlusty has done an invaluable service in crafting a collection that should be an indispensable part of the teaching syllabus. --Andrew Pettegree, University of St. Andrews
