A Twist Of Fate

From New York Times and USA Today bestselling author Jill Shalvis comes a new story in her Heartbreaker Bay series... When the one you want ... Daisy doesn't believe love is ever-lasting, so it's ironic as hell that she parlayed a business degree into a wedding planning business. More ironic still is her latest job bringing her back into contact with the man who'd taught her that love can't last. Is the one you can't have... To say Diego has been taught the hard way to bury emotions is an understatement. But when he's called home to help the brother he hasn't seen or spoken to in years, that's one thing. It's another entirely to also come face to face with the first woman he ever loved. First and only... Can love conquer all? Daisy's learned to depend only on herself, and Diego is and always has been an island of one. And yet when they're together, even when they're bickering, still wary and haunted by memories of what was ... it's magic. The question is, how to find their way back to each other...? **Every 1001 Dark Nights novella is a standalone story. For new readers, it's an introduction to an author's world. And for fans, it's a bonus book in the author's series. We hope you'll enjoy each one as much as we do.**

When he is assigned to fly a single passenger to Colorado, he has no idea that this charter flight will change his life forever. It is not until he meets the passenger at the airplane that he is pleasantly surprised to discover that she is an ex-girlfriend, Juneko. They had separated several years ago and had not had contact since. Their meeting seemed to be a chance encounter of old friends, but fate shows that is not so. A hidden intelligence has much greater plans for them beyond the completion of a simple charter flight. Their flight is intercepted and redirected to another world. Surprisingly the inhabitants appear to be human and their technology is not that different from the technology the two travelers left behind on Earth although there are a few startling differences. The reasons for these similarities and differences become clear in time. Initially it causes the two travelers no end of confusion. Juneko and Jason have arrived at a planet that is on the brink of a worldwide war. An evil presence is bent on using the countries it already controls to conquer the rest. Jason's and Juneko's main questions are: how did they get there, why were they brought there, and how can they get home. Even as they try to find the answers to these questions they are drawn into the international tensions that are about to produce open conflict on a global basis. There are no nuclear weapons here to produce brief, impersonal but highly deadly war. These battles will be fought by soldiers, sailors, and pilots on a much more intimate basis. As Jason and Juneko befriend the people trying to stave off the evil forces that are driving this planet to war, they find that their own values drive them to sign up to join the military and help. Jason and Juneko, previously separated for years, now find that the spark of love between them still exists. The uncertainty of war gives their relationship an urgency that they can hardly stop. Always in the back of their minds are the questions of why they are there and how can they get home. Their duties in the war pull them apart for a time and the stresses of day to day fighting put survival ahead of thoughts of getting home. Still they both wonder what strange TWIST OF FATE brought them to this world and this war. In time they begin to glimmer the truth but it is a truth that shocks them to their core beings. Their love, the war, and the strange destiny that brought them to this place change them both forever.

Lucky Two years ago I humiliated myself by declaring my love to an older man who clearly didn't share my feelings. And that's fine. One day Zach will come around. Meanwhile, I've built a life for myself in northern Montana, pursuing my college degree while working hard toward certification in high-risk alpine search and rescue on the side. And perhaps I've kept the danger part a secret from my two dads. After all, what they don't know won't hurt them... Everything's going exactly as planned until my dads send Zach to check on me just as I'm dealing with an ex who doesn't understand the meaning of the word no. It's bad enough Zach still thinks of me as a child; now he also thinks I'm incapable of looking out for myself. I need to get him off my back before he finds out I'm not heading to Wyoming for summer break like everyone thinks. I'm going to Glacier National Park to learn how to rappel from helicopters... Zach Two years ago I wanted something I couldn't have, so I threw myself back into my job as an Army Ranger and wound up scarred in more ways than one. When the army dumps my sorry self back into the real world, it's time to start over. I accept a summer job teaching high-risk search and rescue. On the way there, all I have to do is peek in on little Lucky Reed and make sure he's okay. He's not. Someone has it out for him, and I'll be damned if I'm going to let him get hurt on my watch. My plan is to keep him safe until he heads south for his summer job playing trail guide to tourists. Once he's gone, I'll be free to head to Glacier where my biggest challenge will be keeping a handful of alpine search and rescue students safe as they learn how to dangle from helicopters high above the Rocky Mountains. It's all fine. Until it's not. Danger follows us to Glacier, and by the time I finally start seeing Lucky as more than the awkward teenager he used to be, I wonder if it's too late to convince him that this scarred soldier sees him as anything but little anymore.

Twist of Fate

How tiny variations in our personal DNA can determine how we look, how we behave, how we get sick, and how we get well. News stories report almost daily on the remarkable progress scientists are making in unraveling the genetic basis of disease and behavior. Meanwhile, new technologies are rapidly reducing the cost of reading someone's personal DNA (all six billion letters of it). Within the next ten years, hospitals may present parents with their newborn's complete DNA code along with her footprints and APGAR score. In Genetic Twists of Fate, distinguished geneticists Stanley Fields and Mark Johnston help us make sense of the genetic revolution that is upon us. Fields and Johnston tell real life stories that hinge on the inheritance of one tiny change rather than another in an individual's DNA: a mother wrongly accused of poisoning her young son when the true killer was a genetic disorder; the screen siren who could no longer remember her lines because of Alzheimer's disease; and the president who was treated with rat poison to prevent another heart attack. In an engaging and accessible style, Fields and Johnston explain what our personal DNA code is, how a few differences in its long list of DNA letters makes each of us unique, and how that code influences our appearance, our behavior, and our risk for such common diseases as diabetes or cancer.
