Learn to Read Latin helps students acquire an ability to read and appreciate the great works of Latin literature as quickly as possible. It not only presents basic Latin morphology and syntax with clear explanations and examples but also offers direct access to unabridged passages drawn from a wide variety of Latin texts. As beginning students learn basic forms and grammar, they also gain familiarity with patterns of Latin word order and other features of style. Learn to Read Latin is designed to be comprehensive and requires no supplementary material. It explains English grammar points and provides drills especially for today's students. It offers sections on Latin metrics, includes numerous unaltered examples of ancient Latin prose and poetry, incorporates selections by authors such as Caesar, Cicero, Sallust, Catullus, Vergil, and Ovid, presented chronologically with introductions to each author and work, offers a comprehensive workbook that provides drills and homework assignments. This enlarged second edition improves upon an already strong foundation

by streamlining grammatical explanations, increasing the number of syntax and morphology drills, and offering additional short and longer readings in Latin prose and poetry.

Accounting: What the Numbers Mean, 6e, by Marshall/McManus/Viele is written to meet the needs of those students who will not be accountants but who do need to understand accounting, the language of business, in order to effectively participate in activities such as planning, control, and decision-making. Marshall takes readers through the basics: what accounting information is, what it means, and how it is used. In using this text, students examine financial statements and discover what they do and do not communicate. This enables them to gain the crucial decision-making and problem-solving skills they need in order to succeed in a professional environment.

Utilizing the first thirteen chapters of Wild's best-selling, Financial and Managerial Accounting text, Financial Accounting Fundamentals responds to the market's request for a low-cost, succinct book; a book that balances large and small businesses, and one that is contemporary, engaging, and accessible for today's students. Its innovation is reflected in its extensive use of small business examples, the integration of new technology learning tools, superior end-of-chapter material, and a highly engaging, pedagogical

design.

The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

First published in 1996, this book seeks to establish Gabriel A.D. Preinreich as an important accounting theorist and redress the neglect that his work has suffered despite its foundational importance to prominent areas of modern research. Two criteria were used to select the papers included in this volume — papers related to dividends, yield, valuation, goodwill and depreciation were selected while those that were primarily concerned with mathematical economics were omitted. The collected articles and other

items were written between 1931 and 1944 and grouped into three sections: accounting from the investor's viewpoint; valuation and goodwill; and depreciation.
