A brave mouse, a covetous rat, a wishful serving girl, and a princess named Pea come together in Kate DiCamillo's Newbery Medal-winning tale. Welcome to the story of Despereaux Tilling, a mouse who is in love with music, stories, and a princess named Pea. It is also the story of a called Roscuro, who lives in the darkness and covets a world filled with light. And it is the story of Miggery Sow, a slow-witted serving girl who harbors a simple, impossible wish. These three characters are about to embark on a journey t

masterpiece tells the mystical story of Santiago, an Andalusian shepherd boy who yearns to travel in search of a worldly treasure. His quest will lead him to riches far different—and far more satisfying—than he ever imagined. Santiago's journey teaches us about the essential wisdom of listening to our hearts, of recognizing opportunity and learning to read the omens strewn along life's path, and, most importantly, to follow our dreams. A girl dresses in a bunny costume to earn her dad ' s approval.... A boy bakes a cake and takes out his dad in the same afternoon.... These are just two of the offbeat and utterly captivating scenarios

readers will find in this collection of stories inspired by narrative artwork. Nine charcoal drawings, each one hauntingly surreal, were the creative spur for eighteen different authors. Pairs of writers were sent the same image and asked to write a story to accompany it. The results are fascinating: some of the couplings are strikingly similar; others couldn't be more different, and all make terrific reading.

Political scientist V. O. Key in 1949 described North Carolina as a "progressive plutocracy." He argued that in the areas of industrial development, public education, and race relations, North Carolina appeared progressive when compared to other southern states. Reconsidering Key's evaluation nearly sixty years later, contributors to this volume find North Carolina losing ground as a progressive leader in the South. The "new politics" of the state involves a combination of new and old: new opportunities and challenges have forced the state to change, but the old culture still remains a powerful

force. In the eleven essays collected here, leading scholars of North Carolina politics offer a systematic analysis of North Carolina's politics and policy, placed in the context of its own history as well as the politics and policies of other states. Topics discussed include the evolution of politics and political institutions; the roles of governors, the judicial branch, interest groups, and party systems; and the part played by economic development and environmental policy. Contributors also address how geography affects politics within the state, region, and nation. Designed with

Renaissance readers perceived the print book as both a thing and a medium - a thing that could be broken or reassembled, and a visual medium that had the power to reflect, transform, or deceive. At the same historical moment that print books remediated the visual and material structures of manuscript and oral rhetoric, the relationship between vision and perception was

fundamentally called into question. Investigating this crisis of perception, Pauline Reid argues that the visual crisis that suffuses early modern English thought also imbricates sixteenth- and seventeenth-century print materials. These vision troubles in turn influenced how early modern books and readers interacted. Platonic, Aristotelian, and empirical models of sight vied with one another in a culture where vision had a tenuous

Through situating early modern books' design elements, such as woodcuts, engravings, page borders, and layouts, as important rhetorical components of the text, *Reading by Design* articulates how the early modern book responded to epistemological crises of perception and competing theories of sight. about how we need to fundamentally change the way we think about America's broken education system in order to fix it. Whether or not you have children, you know that education is vital to the prosperity and future of our society. Yet our current system simply doesn't work. Parents feel increasingly powerless, and nearly half of Americans give our schools a grade of "C". Now, in his new book, Ron Paul attacks the problem head-on and provides a focused solution that centers on strong support for home schooling and the application of free market principles to the American education system. Examining the history of education in this country, Dr. Paul identifies where we've gone

Speed in acquiring the knowledge and skills to perform tasks is crucial. Yet, it still ordinarily takes many years to achieve high proficiency in countless jobs and professions, in government, business, industry, and throughout the private sector. There would be great advantages if regimens of training could be established that could accelerate the achievement of high levels of proficiency. This book discusses the construct of ' accelerated learning. ' It includes a review of the research literature on learning acquisition and

retention, focus on establishing what works, and why. This includes several demonstrations of accelerated learning, with specific ideas, plans and roadmaps for doing so. The impetus for the book was a tasking from the Defense Science and Technology Advisory Group, which is the top level Science and Technology policy-making panel in the Department of Defense. However, the book uses both military and non-military exemplar case studies. It is likely that methods for acceleration will leverage technologies and capabilities including virtual training, cross-training, training across strategic and tactical levels, and training for resilience and adaptivity. This volume provides a wealth of

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method
