Useful for undergraduate and graduate students of international business, this work features coverage of the Asian financial crisis and the European Union. Its treatment of such topics as foreign exchange, international trade policy, and economic development introduces students to techniques for analyzing national economies.

With this fourth edition, accountants will acquire a practical set of tools and the confidence they need to use them effectively in making business decisions. It better reflects a more conceptual and decision-making approach to the material. The authors follow a "macro- to micro-" strategy by starting with a discussion of real financial statements first, rather than starting with the Accounting Cycle. The objective is to establish how a financial statement communicates the financing, investing, and operating activities of a business to users of accounting information. This motivates accountants by grounding the discussion in the real world, showing them the relevance of the topics covered to their careers.

Advances in Business Education & Training is a Book Series to foster advancement in the field of Business Education and Training. It serves as an international forum for scholarly and state-of-the-art research and development into all aspects of Business Education and Training. This new volume deals with several aspects of the challenge to design learning in and for a changing world. The first part concerns program development. How to build curricula that are future-proof? Principles to innovate our curricula are identified. It answers the question how we can incorporate the need for change in our thinking about curriculum-development and identify the necessary elements to incorporate in our curricula. The second part focuses on the increasing diversity of students and employees within our schools and organizations, in terms of culture, language, and perception of ability, gifts, and talents. This offers a range of opportunities, but at the same time can possibly jeopardize some processes that are taken for granted. Chapters in this part analyze the processes that play a crucial role in dealing with this diversity and identify educational practices that can help to harvest the potential that lies within this diversity. The third part of this book digs further into the possibilities that are opened up by the implementation of ICT-support in our learning environments. E-learning provides tools to adapt these environments to the needs of an increasingly diverse student-population. In the last part we focus specifically on the workplace and how learning can be designed in such a way that employees are equipped for a shifting workplace. On the one hand it is looked how training can affect performance in the workplace. Does learning transfer to the work environment? On the other hand it is questioned how one can design affordances to trigger learning in the workplace.

The leading Heintz/Parry's COLLEGE ACCOUNTING, 22E combines a step-by-step approach with excellent examples that make accounting understandable, regardless of the reader's accounting background or business experience. Known for its clarity and accompanying technology, this book focuses on the skills needed to transition from the classroom to the workplace. The book begins with a basic foundation and simple service company examples before advancing to accounting within the more challenging merchandising and manufacturing environments. Engaging learning features reinforce the relevance of skills and ensure an understandable presentation. Plan for success in tomorrow's workplace with COLLEGE ACCOUNTING, 22E.
