The energy system is undergoing a fundamental transformation – from fossil to renewable energy, from central power plants to distributed, decentralised generation facilities such as rooftop solar panels or wind parks, from utilities to private residents as producers of energy, and from analogue to digital. This book looks at the energy transformation from two complementary angles: governance and business model

innovation. On the one side, governance is a decisive factor for the success of the transformation because it can act as an accelerator, or it can delay the process. On the other side, entrepreneurs and corporate decision-makers provide new business models for a decentralised energy world. Based on best practices, country studies and interviews with CEOs and founders of startups from all over the world, the “Global Game Changer” suggests eight key principles for political decision-makers to successfully implement the transformation, and six core competencies for corporate decision-makers to thrive in the new marketplace.

Why were so many religious images and objects broken and damaged in the course of the Reformation? Margaret Aston's magisterial new book charts the conflicting imperatives of destruction and rebuilding throughout the English Reformation from the desecration of images, rails and screens to bells, organs and stained glass windows. She explores the motivations of those who smashed images of the crucifixion in stained glass windows and who pulled down crosses and defaced symbols of the Trinity. She shows that destruction was part of a methodology of religious revolution designed to change people as well as places and to forge in the long term new generations of new believers. Beyond blanked walls and whited windows were beliefs and minds impregnated by new modes of religious learning. Idol-breaking with its emphasis on the treacheries of images fundamentally transformed not only Anglican ways of worship but also of seeing, hearing and remembering.

Gain the competitive edge by conducting a valuation of your company every year—quickly, accurately, and inexpensively Business leaders who know their company's value at any given moment are more likely to seize the competitive edge—especially these days, when adding digital capabilities can dramatically affect value.

But most businesses drop the ball because traditional valuation is complex, time-consuming, and expensive.

Not anymore. Reed Phillips, Chairman of Oaklins International, one of the world's largest mid-market M&A firms, lays out a straightforward method for gaining a clear understanding of your company's current value in a fraction of the time and at a fraction of the cost of traditional methods. He walks you through three easy steps: Identify the key value drivers behind the company's value and rate them to develop a Value Driver Score. Perform a careful examination of comparable businesses, including their market-rate multiples for revenue and EBITDA. Put the results together to determine the value of the business.

QuickValue provides a clear, reliable way to determine your business's value in real time—transforming valuation from a reactive, defensive burden into an active, indispensable part of daily operations. Whether you're an entrepreneur, owner, executive, consultant, accountant, or M&A advisor, QuickValue provides the method you need to know the value of any company at any time.
