This volume contains the papers presented at the third biennial Information Systems Foundations ('Theory, Representation and Reality') Workshop, held at The Australian National University in Canberra from 27-28 September 2006. The

focus of the workshop was, as for the others in the series, the foundations of Information Systems as an academic discipline. The particular emphasis was, as in past workshops, the adequacy and completeness of theoretical underpinnings and the research methods employed. At the same time the practical nature of the applications and phenomena with which the discipline deals were kept firmly in view. Accordingly, the papers in this volume range from the unashamedly theoretical n their focus

(Designing for Mutability in Information Systems Artifacts; Towards a Unified Theory of Fit: Task, Technology and Individual) to the much more practically oriented (An Action-Centred Approach to Conceptualising Information Support for Routine Work).

The 9th European Conference on Information Management and Evaluation (ECIME) is being hosted this year by the University of the West of England, Bristol, UK on the 21-22 September 2015. The Conference Chair is Dr Elias Pimenidis, and the Programme Chair is Dr Mohammed Odeh both from the host University. ECIME provides an opportunity for individuals researching and working in the broad field of information systems management, including IT evaluation to come together to exchange ideas and discuss current research in the field. This has developed into a particularly important forum for the present era, where the modern challenges of managing information and evaluating the effectiveness of related technologies are constantly evolving in the world of Big Data and Cloud Computing. We hope that this year ' s conference will provide

Bagi organisasi, salah satu kebutuhan terpenting saat ini adalah sistem informasi (SI). Hal ini dikarenakan sistem informasi dapat membantu perusahaan / organisasi

meningkatkan efisiensi dan efektifitas proses bisnisnya sendiri. Hal yang sama berlaku pada perguruan tinggi yang merupakan salah satu lembaga yang bergerak di bidang pendidikan. Untuk mencapai efisiensi dan efektifitas, diperlukan pengelolaan sistem informasi yang terdapat di dalam organisasi/lembaga dengan baik dan benar. Diharapkan melalui pengelolaan sistem informasi yang ada dengan baik maka sistem informasi tersebut dapat mendukung organisasi/lembaga tersebut untuk berhasil mencapai tujuannya di masa depan. Keberhasilan tata kelola organisasi/kelembagaan saat ini sangat bergantung pada derajat penerapan tata kelola sistem informasi (Marlindawati, 2014).

Today's accounting professionals are challenged to identify enterprise risks and provide quality assurance for a company's information systems. ACCOUNTING INFORMATION SYSTEMS, 9E, focuses on three critical accounting information systems in use today: enterprise systems, e-Business systems, and controls

for maintaining those systems. Students will easily grasp even the most challenging topics as they explore today's most intriguing AIS topics relative to business processes, information technology, strategic management, security, and internal controls. The 9th edition provides students with the tools for organizing and managing information to help them succeed and protect the integrity of their employer's

information system.

Biochar is the carbon-rich product when biomass (such as wood, manure or crop residues) is heated in a closed container with little or no available air. It can be used to improve agriculture and the environment in several ways, and its stability

in soil and superior nutrient-retention properties make it an ideal soil amendment to increase crop yields. In addition to this, biochar sequestration, in combination with sustainable biomass production, can be carbon-negative and therefore used to actively remove carbon dioxide from the atmosphere, with major implications for mitigation of climate change. Biochar production can also be

combined with bioenergy production through the use of the gases that are given off in the pyrolysis process. This book is the first to synthesize the expanding research literature on this topic. The book's interdisciplinary approach, which covers engineering, environmental sciences, agricultural sciences, economics and policy, is a vital tool at this stage of biochar technology development. With the modernization of services offered through the internet, many traditional face-to-face services have adopted new e-service phenomena. Especially prevalent among the younger generations, this change in service has promoted many industries to rethink how to best reach their consumers using modern technology. Structural Equation Modeling Approaches to E-Service Adoption is a pivotal reference source that aims to share the latest empirical research findings within technology acceptance, information systems, information technology, human-computer interaction, and management information systems.

WHATS IN IT FOR ME?

Information technology lives all around us-in how we communicate, how we do business, how we shop, and how we learn. Smart phones, iPods, PDAs, and wireless devices dominate our lives, and yet it's all too easy for students to take information technology for granted. Rainer and Turban's Introduction to Information Systems, 2nd edition helps make Information Technology come alive in the classroom. This text takes students where IT lives-in today's businesses and in our daily lives while helping students understand how valuable

Accounting Information Systems provides a comprehensive knowledgebase of the systems that generate, evaluate, summarize, and report accounting information. Balancing technical concepts and student comprehension,

this textbook introduces only the most-necessary technology in a clear and accessible style. The text focuses on business processes and accounting and IT controls, and includes discussion of relevant aspects of ethics and corporate governance. Relatable real-world examples and abundant end-of-chapter resources reinforce Accounting Information Systems (AIS) concepts and their use in day-to-day operation. Now in its fourth edition, this popular textbook explains IT controls using the AICPA

Trust Services Principles framework—a comprehensive yet easy-to-understand framework of IT controls—and allows for incorporating hands-on learning to complement theoretical concepts. A full set of pedagogical features enables students to easily comprehend the material, understand data flow diagrams and document flowcharts, discuss case studies and examples, and successfully answer end-of-chapter questions. The book's focus on ease of use, and its straightforward presentation of business

processes and related controls, make it an ideal primary text for business or accounting students in AIS courses.

Today's accounting professionals must help organizations identify enterprise risks and provide assurance for information systems.

What is a just way of spending public resources for health and health care? Several significant answers to this question are under debate. Public spending could aim to promote greater equality in health, for example, or maximize the health of the population, or provide the worst off with the best possible health. Another approach is to aim for each person to have "enough" so that her health or access to health care does not fall under a critical level. This latter approach is called sufficientarian. Sufficientarian approaches to distributive justice are intuitively appealing, but require further

analysis and assessment. What exactly is sufficiency? Why do we need it? What does it imply for the just distribution of health or healthcare? This volume offers fresh perspectives on these critical questions. Philosophers, bioethicists, health policy-makers, and health economists investigate sufficiency and its application to health and health care in fifteen original contributions.

the current state of AIS research, including design, acceptance and reliance, value-added decision making, interorganizational links, and process improvements. The contributions in this volume emphasize that AIS has grown into a powerful strategic tool. The book provides evidence for this observation by examining a wide range of current issues ranging from theory development in AIS to practical applications of accounting information systems. In particular it focuses on themes of growing interest in the realm of XBRL and Financial Reporting, Management Information Systems, IT/IS Audit and IT/IS Compliance.
