In its US edition, ?Principles of Accounting? has been a market leading

introductory accounting textbook for over 20 years. The Australasian adaptation of this highly regarded textbook accentuates its relevance to both students and academics alike with its constructive pedagogical structure, application of accounting to a wider business environment, and clear, easy-to-understand writing style. As accounting is the international language of business, with many students expecting their qualifications to open career opportunities internationally, ?Principles of Financial Accounting 2nd edition? aligns to the conceptual framework and financial reporting requirements under IFRS, as well as presenting real company financial information from the Australasian region. Throughout all chapters, accounting processes and systems are applied and illustrated with either real businesses or constructive hypothetical examples. A unique feature of the textbook is that it can be used in either a one semester or two semester introductory accounting subject. Students who study with this textbook will be equipped with knowledge and skills required for their further accounting studies and eventual career as an accounting professional. The books have been written in accordance with the latest syllabus of Commercial Studies prescribed by the Council for the Indian School Certificate Examination. The books follow a student-friendly approach to the study of forms and functions of Commercial Organizations and their Functional Departments.

The text is presented in a self-explanatory manner. Questions have been put in a logical sequence and at different levels of difficulty.
