penganggaran dan perbendaharaan, mengagendakan sejumlah penyempurnaan terutama di bidang proses bisnis, teknologi informasi dan manajemen perubahan. Dalam penyempurnaan ini, pengintegrasian fungsi-fungsi sistem penganggaran dan perbendaharaan menjadi dasar bagi upaya pencapaian akuntabilitas pertanggungjawaban keuangan Pemerintah yang dapat diandalkan. Sistem pengelolaan keuangan negara yang modern,

transparan dan akuntabel menjadi tujuan yang akan dicapai dalam reformasi penganggaran dan perbendaharaan, yang diwujudkan dalam bentuk sistem perbendaharaan dan anggaran negara (SPAN). Sebagai bagian dari upaya pencapaian tujuan reformasi, maka penyempurnaan proses bisnis adalah hal utama yang dilaksanakan untuk mencapai pengelolaan keuangan Negara yang profesional, transparan dan akuntabel. Salah satu langkah untuk

mewujudkan transparansi dan akuntabilitas pengelolaan keuangan negara tersebut adalah dengan pelaksanaan akuntansi atas transaksi keuangan pemerintah dan penyampaian laporan keuangan pemerintah yang andal dan tepat waktu. Hal ini dapat dicapai dengan berpedoman pada standar akuntansi pemerintah, penerapan sistem pengendalian intern dan pelaksanaan akuntansi sesuai dengan kebijakan dan sistem akuntansi pemerintah.

Selain penyempurnaan proses bisnis, untuk mendukung peningkatan transparansi dan akuntabilitas pengelolaan keuangan Negara yang diwujudkan dalam bentuk penyampaian laporan keuangan yang andal dan tepat waktu, penerapan teknologi informasi akan sangat diperlukan. Dengan adanya kejelasan tujuan, sasaran, dan manfaat yang ingin dicapai dari pelaksanaan reformasi pengelolaan keuangan negara melalui SPAN ini,

diharapkan SPAN dapat menghasilkan suatu sistem pengelolaan keuangan negara yang andal demi terwujudnya pengelolaan keuangan negara yang profesional, transparan, dan akuntabel. Penyempurnaan proses bisnis akuntansi dilatarbelakangi oleh amanat UU Keuangan Negara dan UU Perbendaharaan Negara untuk menggunakan akuntansi berbasis akrual. Dengan adanya kewenangan Menteri Keuangan selaku

bisnis akuntansi dalam modul ini diiringi dengan penyusunan sistem akuntansi, framework Bagan Akun Standar dan framework akuntansi akrual. Perubahan yang difasilitasi oleh modul ini antara lain perubahan sistem akuntansi di KPPN, berupa penyatuan sistem akuntansi umum (SAU) dan sistem akuntansi kas umum negara (SAKUN) menjadi satu sistem akuntansi yang terintegrasi. Dengan sistem yang terintegrasi

akuntansi pemerintah. Perubahan Bagan Akun Standar terutama pada struktur dan akun-akunnya ini dikarenakan adanya penerapan basis akrual, manajemen komitmen, dan penganggaran berbasis kinerja, sehingga terdapat penambahan akun-akun akrual seperti beban persediaan, akun komitmen, dan informasi mengenai output. Selain perubahan sistem akuntansi dan bagan akun standar, perubahan juga terjadi pada modul

Eurasia Business and Economics conference held in Barcelona, Spain, in October 2014. Peer-reviewed articles in this first volume present latest research breakthroughs in the areas of Accounting, Corporate Governance, Finance and Banking, Institutional and International Economics, and Regional Studies. The contributors are both distinguished and young scholars from different parts of the World. This book explores creative interdisciplinary and potentially transformative solutions to the current stalemate in contemporary water policy design. A more open policy conversation about water than exists at present is proposed – one that provides a space for the role of the imagination and is inclusive – of the arts and humanities, relevant stakeholders, including landholders and Indigenous

peoples, as well as science, law and economics. Written for a wide audience, including practitioners and professional readers, as well as scholars and students, the book demonstrates the value of multiple disciplines, voices, perspectives, knowledges and different ways of relating to water. It provides a fresh and timely response to the urgent need for water policy that works to achieve sustainability, and may be better able to resolve complex environmental, social and cultural water issues. Utilising a broad range of evidentiary sources and case studies from Australia, New Zealand, Canada and elsewhere, the authors of this edited collection demonstrate how new ways of thinking and imagining water are not only possible but already practised, and growing in saliency and impact. The

current dominance of narrower ways of conceptualising our relationship with water is critiqued, including market valuation and water privatisation, and more innovative alternatives are described, including those that recognise the importance of place-based stories and narratives, adopt traditional ecological knowledge and relational water appreciations, and apply cutting-edge behavioural and ecological systems science. The book highlights how innovative approaches drawing on a wide range of views may counter prevailing policy myopia, enable reflexive governance and transform water policy towards addressing water security questions and the broader challenges posed by the Anthropocene and the UN Sustainable Development Goals. Digital Asset Valuation and Cyber Risk
Measurement: Principles of

Cybernomics is a book about the
future of risk and the future of value. It
examines the indispensable role of
economic modeling in the future of
digitization, thus providing industry
professionals with the tools they need
to optimize the management of
financial risks associated with this
megatrend. The book addresses three

problem areas: the valuation of digital assets, measurement of risk exposures of digital valuables, and economic modeling for the management of such risks. Employing a pair of novel cyber risk measurement units, bitmort and hekla, the book covers areas of value, risk, control, and return, each of which are viewed from the perspective of entity (e.g., individual, organization, business), portfolio (e.g., industry sector, nation-state), and global ramifications. Establishing adequate, holistic, and statistically robust data points on the entity, portfolio, and global levels for the development of a cybernomics databank is essential for the resilience of our shared digital future. This book also argues existing economic value theories no longer apply to the digital era due to the unique characteristics of

This book presents a new understanding on how control systems truly operate, and explains how to recognize, simulate, and improve control systems in all fields of activity. It also reveals the pervasive, ubiquitous and indispensable role of control processes in our life and the need to develop a "control-oriented thinking" based on uncomplicated but effective models derived from systems thinking—that is, a true "discipline of control." Over the book's thirteen chapters, Piero Mella shows that there are simple control systems (rather than complex ones) that can easily help us to manage complexity without drawing upon more sophisticated control systems. It begins by reviewing the basic language of systems thinking and the models it allows users to create. It then introduces the control

process, presenting the theoretical structure of three simple control systems we all can observe in order to gain fundamental knowledge from them about the basic structure of a control system. Then, it presents the anatomy of the simplest "magic ring" and the general theoretical model of any control system. This is followed by an introduction to a general typology of control systems and a broader view of control systems by investigating multi-level control systems and multi-objective systems. The book undertakes the concepts through various environments, increasingly broader in scope to suggest to readers how to recognize therein control systems manifestations in everyday life and in natural phenomena. Updated for the 2nd edition, new chapters explore control systems

regulating the biological environment and the organizations, with an in-depth study of the control of quality, productivity, production, stocks and costs. Finally, it concludes by dealing with the learning process, problem-solving, and designing the logical structure of control systems.

Accounting Theory 5th edition is the new edition of the market leading theory textbook. The 5th edition has been updated to enhance student understanding of the role of accounting theory and the application of accounting theory in the professional environment.

Increasingly, students have failed to appreciate the relevance of studying accounting theory due to the esoteric nature of the discipline and its lack of any obvious correlation to a discrete accounting process. The new edition addresses this issue and makes the link to industry more clear through chapter vignettes and case studies. The new edition goes further to align the study of
