Research in Accounting in Emerging Economies

Accounting Two Column Ledger Book

*A comprehensive guide to new and existing accounting practices for fixed income securities and interest rate derivatives The financial crisis forced accounting standard setters and market regulators around the globe to come up with new proposals for modifying existing practices for investment accounting. Accounting for Investments, Volume 2: Fixed Income and Interest Rate Derivatives covers these revised standards, as well as those not yet implemented, in detail. Beginning with an overview of the financial products affected by these changes—defining each product, the way it is structured, its advantages and disadvantages, and the different events in the trade life cycle—the book then examines the information that anyone, person or institution, holding fixed income security and interest rate investments must record. Offers a comprehensive overview of financial products including fixed income and interest rate derivatives like interest rate swaps, caps, floors, collars, cross currency swaps, and more Follows the trade life cycle of each product Explains how new and anticipated changes in investment accounting affect the investment world Accurately recording and reporting investments across financial products requires extensive knowledge both of new and existing practices, and Accounting for Investments, Volume 2, Fixed Income Securities and Interest Rate Derivatives covers this important topic in-depth, making it an invaluable resource for professional and novice accountants alike.*

*Intermediate Accounting, 12th Edition, Volume 2, continues to be the number one intermediate accounting resource in the Canadian market. *Description: Intended primarily as a text for the undergraduate students of commerce, this book gives a comprehensive and in-depth analysis of the concepts and principles underlying financial accounting. It also introduces the student to the tools and techniques essential for tackling real-life problems. The text discusses in detail final accounts, branch accounting, hire-purchase and instalment sales, partnership accounts, stock valuations, as well as other company accounts. The book would be of considerable help to the readers in preparing financial statements and would equip them with the necessary knowledge in understanding the financial performance and the financial position of an organization and communicate these to its stakeholders. Besides students of commerce, those appearing for various professional examinations such as CA and ICWA foundation courses should find this student-friendly and accessible book extremely useful.*

**This volume of Advances in Accounting Education consists of three themes: (1) Capacity Building and Program Leadership, (2) Classroom Innovation and Pedagogy, and (3) Engagement with Professionals Through Advisory Councils.**

**The book contains a collection of papers dealing with a range of controversial accounting issues which exercised the minds of local authority officials during the period 1909-1934 and the "solutions" embodied in the Accounts (Boroughs and Metropolitan Boroughs) Regulations 1930. The contributors to the debate were mainly local government officials and the items reproduced cover a wide range of matters such as the content of the abstract accounts; the need for standardization and an illuminating comparison of the nature and contents of municipal accounts with those of limited companies. A number of issues which received close attention from the literature during the early part of the present century were related to the growth of municipal trading undertakings (water, gas, tramways and electricity). The pricing of these services was a matter of considerable debate; questions included whether these services should be priced to generate a profit, break-even or receive a subsidy from the rates. The depreciation question and the related issues of loan periods and the need for a sinking fund receive some attention as do the growing concern of municipal debt.**
