Since its introduction in 1979, CHEAPO, a computer based economic analysis program, has allowed users of the Stand Prognosis Model silvicultural alternatives from an economic point of view. Subsequent modifications to the Prognosis Model have rendered CHEAPO obscure. This user's guide covers a new computer model, CHEAPO II, which is compatible with version 5.1 of the Prognosis Model and expands its economic capabilities.

Unofficial User Guide - The Acer SB220Q bi 21.5" Widescreen LCD IPS display combines stylish ultra-thin functionality with amazing 1920x1080 resolution, allowing you to enjoy High-Definition entertainment in the comfort of your home. Incredible 100,000,000:1 contrast ratio and 5ms response time highlight the advanced technology, The SB220Q bi LCD also features multiple inputs (HDMI and VGA) for greater compatibility, Kensington lock slot to protect your investment, and Energy Star compliance to help you save money and energy.

China is the largest emerging market in the world, yet Western MNCs have invested significantly less there than their Asian MNC counterparts. This book systematically compares Western and Asian investment strategies and their performance in the China market and finds lessons that Western MNCs can heed. He also reviews and analyzes new economic and regulatory environments (e.g., WTO) in China and their potential effect on all foreign investors. Clearly written and readable by anyone reasonably familiar with matters of world trade and investment, the book illustrates its points with examples drawn from Luo's own research and is difficult to find elsewhere. The result is a needed contribution to the literature on international business in the China market, primarily for upper level executives and scholars specializing in emerging markets and international business.

This book explores what makes a book readable by bringing together the relevant literature and theories, and situating them within a unified account. It provides a single resource that offers a principled discussion of the issues and their applications.

The Flint River is arguably Georgia's most beautiful river, and in terms of the terrain through which it flows on its 344-mile journey, there is not another Georgia river that exposes the river traveler to more diverse vistas. From the bottomland swamps in its headwaters, through soaring views of Pine Mountain and rapids in the Piedmont, to breathtakingly clear springs in the Coastal Plain, the Flint is filled with surprises at virtually every bend. The Flint River User's Guide, the fourth in a series of Georgia River Network recreational guidebooks, is a portal to adventure on this spectacular river. The book brings to life the river's cultural and natural heritage while providing all the details needed to get out on the river and enjoy it via canoe, kayak, paddleboard, or motorized vessel. Whether in your canoe, on the river, or on your couch at home, the Flint River User's Guide will immerse you in the story of the river, which also happens to be the story of those communities along its course—from the headwaters in the suburbs of metro Atlanta to the backwaters of Lake Seminole near the Florida state line. Features: An introduction and overview of the river Chapters describing each river section with detailed maps and notes on river access and points of interest A compact natural history guide featuring species of interest found along Georgia's rivers Notes on safety and boating etiquette A fishing primer Notes on organizations working to protect the river Printed on waterproof paper

A Quick Guide to Human Resource Testing is a quick reference guide for human resource (HR) practitioners who use to use assessment instruments in any context. It includes explanations, tips, case studies and suggestions to help get the most out of their HR testing. Those in charge of recruiting and selecting new staff face a decision-making needs to be responsible in its implementation and to produce a positive and wide-ranging outcome. The cost of a selection decision has been estimated to be anywhere between one and a half times and five times the salary of the question. Studies have shown that appropriate assessment tools enhance the chances of making good selection and recruitment decisions. Testing is also important to the HR practitioner in a variety of other contexts, including team

change management and ongoing organisational needs. Good practice and appropriate use of tests are as vital to the process as they are in the selection and recruitment of staff.

An invaluable reference source on soft landscape specification for professional landscapers. Each topic is written by a specialist in the field and covers technical data with practical guidance. Ecological characteristics, selection, procurement, elements of planting design, site preparation, establishment and maintenance are all considered.

S2SIMSAP and SIMTIM are computer programs that have been developed to simulate the stand growth and development of natural and treated even-aged northern hardwood stands. SIMSAP begins with species distributions by quality classes in sapling stands after regeneration. SIMTIM, the pole-timber-sawtimber-harvest phase, uses stocking guides based on quadratic mean stand diameter, number of trees, and basal area per acre of trees in the main crown canopy. Using available data, the connecting phases of the models have been tested to determine the effects of silvicultural treatments (or no treatment) on long-term stand response. The models are coded in FORTRAN 77 and are available on mainframe and IBM compatible microcomputers with a minimum of 256 K.S3.

For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide.
