Unequal Treatment:
Learning How to Learn

Book 1

What can we teach kids today that will have utility ten or fifteen years from now? Angela Kohnen and Wendy Saul propose an approach to information literacy that goes beyond the teaching of discreet, easily outdated skills. Instead they use activity to help students build identities as curious individuals empowered to ask their own questions and able to navigate their information-filled world in pursuit of credible answers. A generalist is curious, open-minded, skeptical, and persistent in their quest for information. Thinking Like a Generalist demonstrates what it means to take a generalist stance in instruction and provides a set of teaching tools to be able to pass those skills to students--skills that will transfer beyond the walls of the classroom. Inside you'll find the following: a thorough introduction to what it means to be a "generalist", and how to develop the practices and tools that help generalists navigate the world we live in a focus on the teacher becoming a generalist and tips for modeling those practices in the classroom detailed instructions on how to write a unit of study that emphasizes generalist literacy skills and includes an overview and examples of five different units how to use the authors' read-aloud-think-aloud strategy to orient students to generalist tools and practices The Ideas, strategies, and examples in Thinking Like a Generalist will give you the tools to think like a generalist and then pass that knowledge on to your students, guiding them to become inquisitive, lifelong learners and preparing them for a future that we can't yet imagine.

How do K-12 students become self-regulated learners who actively deploy comprehension strategies to make meaning from texts? This cutting-edge guide is the first book to highlight the importance of executive skills for improving reading comprehension. Chapters review the research base for

particular executive functions--such as planning, organization, cognitive flexibility, and impulse control--and present practical skills-building strategies for the classroom. Detailed examples show what each skill looks like in real readers, and sidebars draw explicit connections to the

Common Core State Standards (CCSS). Reproducible planning and assessment forms can be downloaded and printed in a convenient 8 1/2" x 11" size.

Racial and ethnic disparities in health care are known to reflect access to care and other issues that arise from differing socioeconomic conditions. There is, however, increasing evidence that even after such differences are accounted for, race and ethnicity remain significant predictors of the quality of health care received. In *Unequal Treatment*, a panel of experts documents this evidence and explores how persons of color experience the health care environment. The book examines how disparities in treatment may arise in health care systems and looks at aspects of the clinical encounter that may contribute to such disparities. Patients' and providers' attitudes, expectations, and behavior are analyzed. How to intervene? *Unequal Treatment* offers recommendations for improvements in medical care financing, allocation of care, availability of language translation, community-based care, and other arenas. The committee highlights the potential of cross-cultural education to improve provider-patient communication and offers a detailed look at how to integrate cross-cultural learning within the health professions. The book concludes with recommendations for

data collection and research initiatives. *Unequal Treatment* will be vitally important to health care policymakers, administrators, providers, educators, and students as well as advocates for people of color.

Thinking Like a Generalist

PMBOK® Guide is the go-to resource for project management practitioners. The project management profession has significantly evolved due to emerging technology, new approaches and rapid market changes. Reflecting this evolution, The Standard for Project Management enumerates 12 principles of project management and the PMBOK® Guide 4th Edition is structured around eight project performance domains. This edition is designed to address practitioners' current and future needs and to help them be more proactive, innovative and nimble in enabling desired project outcomes. This edition of the PMBOK® Guide:

•Reflects the full range of development approaches (predictive, adaptive, hybrid, etc.);•Provides an entire section devoted to tailoring the development approach and processes;•Includes an expanded list of models, methods, and artifacts;•Focuses on not just delivering project outputs but also enabling outcomes; and• Integrates with PMStandards™ for information and standards application content based on project type, development approach, and industry sector.

The old saying goes, "To the man with a hammer, everything looks like a nail." But anyone who has done any kind of project knows a hammer often isn't enough. The more tools you have at your disposal, the more likely you'll use the right tool for the job – and get it done right. The same is true when it comes to your thinking. The quality of your outcomes depends on the mental models in your head. And most people are going through life with little more than a hammer. Until now. The Great Mental Models: General Thinking Concepts is the first book in The Great Mental Models series

designed to upgrade your thinking with the best, most useful and powerful tools so you always have the right one on hand. This volume details nine of the most versatile, all-purpose mental models you can use right away to improve your decision making, productivity, and how clearly you see the world. You will discover what forces govern the universe and how to focus your efforts so you can harness them to your advantage, rather than fight with them or worse yet – ignore them. Upgrade your mental toolbox and get the first volume today. AUTHOR BIOGRAPHY Farnam Street (FS) is one of the world's fastest growing websites, dedicated to helping our readers master the best of what other people have already figured out.
