**Asian Development Bank (ADB). When Indonesia became a founding member of the bank in 1966, the country faced daunting challenges. In the five decades that passed, both Indonesia and ADB have evolved in remarkable ways. Indonesia developed rapidly through the late 1990s yet faced a difficult time of adjustment after the Asian financial crisis of 1997–1998. The country has since resumed growth in the last decade. For its part, ADB has widened its activities in Indonesia, transforming from a project-oriented bank into a broad-based development institution. This effective partnership reflects Indonesia’s success in working with the international community in the past 50 years.**

These models show that a 25 basis point cut in the Official Cash Rate (OCR) leads to an increase in inflation and GDP growth, and that this response is as big today as it was before the GFC. This implies that the recent OCR cuts by the Reserve Bank will lead to - all else equal - higher inflation and
