Exploding the assumption that black women's only important musical contributions have been in folk, jazz, and pop Helen Walker-Hill's unique study provides a carefully researched examination of the history and scope of musical composition by African American women composers from the nineteenth and twentieth centuries. Focusing on the effect of race, gender, and class, *From Spirituals to Symphonies* notes the important role played by individual personalities and circumstances in shaping this underappreciated category of American art. The study also provides in-depth exploration of the backgrounds, experiences, and musical compositions of eight African American women including Margaret

Bonds, Undine Smith Moore, and Julia Perry, who combined the techniques of Western art music with their own cultural traditions and individual gifts. Despite having gained national and international recognition during their lifetimes, the contributions of many of these women are today forgotten. Adele Marion Fielde, born in 1839, was a teacher, an evangelist, a social activist, scientist, lexicographer, writer and lecturer. As an American missionary in China, she became a local teacher and evangelist, struggling to reconcile her Baptist upbringing with her restless intellect. As an energetic social activist, she was a major figure in the suffragist movement, the abolition of the slave trade and the founding of two hospitals. As a scientist she conducted seminal research which is still

discussed and studied today. This book provides an in-depth biographical study of the life of this remarkable woman, exploring her impact on her contemporary society, and her abiding influence on the scientific and academic communities to the present day. The author examines the social and religious constraints on Fielde's life and work and discusses her efforts to transcend these through the construction of a personal system of belief which emphasized the importance of helping others. He demonstrates how, as a woman of immense energy and intellectual ability, she was able to influence the scientific and political communities despite their prevailing negative attitude towards women. Adele Marion Fielde will be of vital interest to scholars concerned with the study of

was the first woman president of the Texas State Historical Association, the longest-serving president of the association (1915-1925), and a remarkable individual. Daughter of Andrew Briscoe, signer of the Texas Declaration of Independence, and granddaughter of John Richardson Harris, founder of Harrisburg, Texas, she was shaped and motivated by her heritage throughout her life. Adele Looscan was a woman of her time, yet

she flourished in the society of both men and women, earning the respect of the former as an astute businesswoman and the admiration of the latter for her leadership and accomplishments. As a clubwoman, she built an impressive résumé: charter member of the Texas State Historical Association; member of the Daughters of the American Revolution, United Daughters of the Confederacy, Daughters of the Republic of

She organized the Ladies' Reading Club of Houston in 1885 and was instrumental in founding other literary clubs years before the organization of the Texas Federation. Her contributions to Texas history appeared in many

newspapers and in the Southwestern Historical Quarterly. She used her influence to encourage public education and the preservation of historic landmarks and actively advocated for a state library, archives, and museum. Her story is valuable and compelling for what it reveals about women and culture in nineteenth- and early twentieth-century Texas and for what it reveals about the nature, origins, and shaping of Texas's modern identity.

first golden age of the Viennese symphony during the late 18th and first three decades of the 19th century. The last two dozen symphonies by Haydn, half dozen by Mozart, and three by Schubert, together with Beethoven's nine symphonies became established in the repertoire and provided a standard against which every other symphony would be measured. Most significantly, they imparted a prestige to the genre that was only occasionally rivaled by other cyclic compositions. More than 170 symphonies from this repertoire are described and analyzed in *The First Golden Age of the Viennese Symphony*, the first volume of the series to appear [Publisher description]. This discography addresses all the recordings made by The Boston

Each entry contains complete details of the recording session and work, including all the soloists and choruses, as well as issued discs and tapes in many formats. The material is cross-referenced in indexes organized by composer, conductor, and soloist. In addition to commercial recordings, this volume has separate sections on recordings issued by the U.S. government, recordings made by BSO musicians under other ensemble names, and 'pirate' recordings of BSO concerts and broadcasts.
