history, but the

personal view of a

that story. It is all

the more welcome

Get Free

Adiestramiento

Canino Basado En

Características

Ethology calls for a

range of

perspectives. One

reason is the

overarching scope

of the subject. Two

great questions

about life that

constitute much of

biology are "How

does it work

(structure and

function)?" and

"How did it get

that way (evolu

tion and

ontogeny)?"

Ethology addresses

the antecedent of

"it. " Of what are

we trying to

explain the

mechanism and

development?

Surely behavior, in

all its wealth of

control, is the main

achievement of

animal evolution,

the essential

consequence of

animal structure

and function, the

raison d' etre of all

the rest. Ethology

thus spans

between and

overlaps with the

ever-widening

circles of ecology

over the eons and

the ever-narrowing

focus of physiology

of the neurons.

Another reason

why the history of

ethology needs

perspectives is the

recency of its

acceptance. For

such an obviously
