

Administration Of Government Contracts

The dramatic growth of government over the course of the twentieth century since the New Deal prompts concern among libertarians and conservatives and also among those who worry about government's costs, efficiency, and quality of service. These concerns, combined with rising confidence in private markets, motivate the widespread shift of federal and state government work to private organizations. This shift typically alters only who performs the work, not who pays or is ultimately responsible for it. "Government by contract" now includes military intelligence, environmental monitoring, prison management, and interrogation of terrorism suspects. Outsourcing government work raises questions of accountability. What role should costs, quality, and democratic oversight play in contracting out government work? What tools do citizens and consumers need to evaluate the effectiveness of government contracts? How can the work be structured for optimal performance as well as compliance with public values? Government by Contract explains the phenomenon and scope of government outsourcing and sets an agenda for future research attentive to workforce capacities as well as legal, economic, and political concerns.

"The purpose of this manual is not to summarize all aspects of the law or to opine on what the law should be. Our purpose is also not to teach government contracts lawyers all they need to know about corporate law or, alternatively, to make corporate lawyers experts in government contracts. Instead, this guide is written to identify key transactional issues that arise in transactions involving government contractors across corporate, antitrust, political, foreign investment and other areas of law. Our goal is to provide audiences with targeted, and most importantly, useful advice from practitioners who have been involved in hundreds of transactions (often on opposite sides of each other). It is our hope that readers will learn from our hard-earned experience in the form of bold "Best Practice Tips" and this volume's highly structured, easy to reference format. Each page is designed to allow a reader to quickly grasp a key issue to readily deploy in their practice. This volume also includes detailed appendices and forms that will help practitioners to supplement their existing forms, gather key documents and perform comprehensive government contracts due diligence"--

This book offers an in-depth examination of the law on government contracts and develops a challenging approach which views government contracts from a public law perspective as opposed to a matter for private law.

Government Contracts: Cost Issues

Cyclopedic Guide to Law, Administration, Procedure

Contract management is a critical skill for all contemporary public managers. As more government duties are contracted out, managers must learn to coordinate and measure the performance of private contractors, and to write contract requirements and elicit bids that obtain important services and products at the best possible price and quality. They must also learn to work in teams that include both public and private sector partners. The Responsible Contract Manager delves into the issues of how to ensure that the work done by private sector contractors serves the public interest and argues for the necessity of making these organizations act as extensions of the public sector while maintaining their private character. Government contract managers have a unique burden because they must develop practices that ensure the production advantages of networked organizations and the transparency and accountability required of the public sector. The Responsible Contract Manager fills a major gap in public management literature by providing a clear and practical introduction to the best practices of contract management and also includes a discussion of public ethics, governance and representation theory. It is an essential guide for all public management scholars and is especially useful for students in MPA graduate programs and related fields.

The second edition of Government Contracting: Promises and Perils picks up where the first edition's mission left off: exposing fraud, incompetence, waste, and abuse (FIWA) and analyzing corruption, mismanagement, and ineptitude that defile government contracting. The first edition thoroughly outlined procurement throughout the contracting cycle including initial planning, contractor selection, contract administration, contract closeout, and auditing. This significantly revised new edition provides additional much-needed guidance on contracting documents, management tools, and processes for addressing negative influences on government contracting, including an improved approach to evaluating proposals. Specific guidance for avoiding FIWA is provided for government officials and employees, government agencies, and government contractors, and practical solutions to problems faced by individuals and organizations involved in government contracting are intended for both practitioner and pedagogical applications. The "Government Procurement Corruption Wall of Shame" that was introduced in the first edition to illustrate contracting perils such as conflicts of interest, duplicity, favoritism, incompetence, kickbacks, and protests is continued in the second edition, and cases illustrating the existence of FIWA in government contracting have been thoroughly updated. Contracting documents and contract management tools are provided on a website designed to accompany the book. Written at the graduate level and specifically intended for state, local, federal, and international government procurement activities, this textbook is required reading for public procurement, contract management, business, and public administrations courses.

In an effort to find a balance between the right contracting apparatus, the right government contractor relationship and the correct contract form, the government has tinkered endlessly with its procurement agencies. A History of Government Contracting, Second Edition traces procurement systems dating back to the French and Indian War and the Revolutionary War, including both military and civilian contracting. See how seemingly unconnected events caused chain reactions that altered the course of contracting and the history of the nation. Discover how important events in history affected the metamorphoses of the contracting business and gain insight to the systems used today. Written by James F. Nagle, Jr., a

nationally acclaimed expert in the field of government contracting, and brought to you by the experts in government contracting, the George Washington University Law School Government Contracts Program and CCH, A History of Government Contracting, Second Edition is an intriguing text for any history buff, particularly if involved with government procurement agencies.

Government contracting is one of the most important issues facing federal, state, and local governments. As governments contend with lower tax revenues and a growing belief that smaller government is better government, contracting has become a fundamental means of providing goods and services to citizens. This volume, which is geared toward practitioners as well as students, addresses the broad range of issues that comprise government contracting - from the political, economic philosophy, and value of contracting - to the future of government contracting. Throughout the volume academic theory provides a foundation to address practical subjects, including the contract process, monitoring and evaluating contracts, ethics, and both federal and state local government contracting. Contributors to this volume are both academicians and practitioners, who together offer their scholarly expertise and practical experience, encouraging readers to ask the very question "What is the role of government in American society?" Through this approach, students will acquire the knowledge needed to understand the various aspects of government contracting, and practitioners will enhance their public procurement skills. Government Contracting is ideally suited to MPA students, practitioners in the public sector, and elected officials looking to enhance their understanding of privatization and contracting in order to provide public services more effectively.
