The federal government wastes your tax dollars worse than a drunken sailor on shore leave. The 1984 Grace Commission uncovered that the Department of Defense spent \$640 for a toilet seat and \$436 for a hammer. Twenty years later things weren't much better. In 2004, Congress spent a record-breaking \$22.9 billion dollars of your money on 10,656 of their pork-barrel projects. The war on terror has a lot to do with the record \$413 billion in deficit spending, but it's also the result of pork over the last 18 years. study screwworms which were long ago eradicated from American soil - \$273,000 to combat goth culture in Missouri - \$2.2 million to renovate the North Pole (Lucky for Santa!) - \$50,000 for a tattoo removal program in California - \$1 million for ornamental fish research Funny in some instances and jaw-droppingly stupid and wasteful in others, The Pig Book proves one thing about Capitol Hill: pork is king!

Agatha Raisin and the Terrible Tourist continues the tradition in M. C. Beaton's beloved Agatha Raisin cozy mystery series—now a hit show on Acorn TV and public television. Agatha Raisin's marriage was put off when her ex-husband showed up, unfortunately alive. Fortunately, he was murdered and Agatha solved the crime. Now she is off to Cyprus to track down her ex-flance. Instead of enjoying their planned honeymoon, however, they witness the murder of an obnoxious tourist. Two sets of terrible tourists surround the unhappy couple, arousing Agatha's suspicions. And, much to James' chagrin, she won't rest until she finds the killer. Unfortunately, it seems the killer also won't rest until Agatha is out of the picture. Agatha is forced to track down the murderer, try to rekindle her romance with James, and fend off a suave baronet, all while coping with the fact that it's always bathing suit season in Cyprus.

Douglas Bostick, historian and former director of Save the Light, Inc., recounts the stories of the many lightkeepers and their families who braved meager provisions, low pay and grueling conditions living on a small island at the entrance to Charleston Harbor.

"Bruce Schneier's amazing book is the best overview of privacy and security ever written." —Clay Shirky "Bruce Schneier's amazing book is the best overview of privacy and security ever written." —Clay Shirky "Your cell phone provider tracks your location and knows who's with you. Your online and in-store purchasing patterns are recorded, and reveal if you're unemployed, sick, or pregnant. Your e-mails and texts expose your intimate and casual friends. Google knows what you're thinking because it saves your private searches. Facebook can determine your sexual orientation without you ever mentioning it. The powers that surveil us do more than simply store this information. Corporations use surveillance to manipulate not only the news articles and advertisements we each see, but also the prices we're offered. Governments use surveillance to discriminate, censor, chill free speech, and put people in danger worldwide. And both sides share this information with each other or, even worse, lose it to cybercriminals in huge data breaches. Much of this is voluntary: we cooperate with corporate surveillance because it promises us convenience, and we submit to government surveillance because it promises us protection. The result is a mass surveillance society of our own making. But have we given up more than we've gained? In Data and Goliath, security expert Bruce Schneier offers another path, one that values both security and privacy. He brings his bestseller up-to-date with a new preface covering the latest developments, and then shows us exactly what we can do to reform government surveillance programs, shake up surveillance-based business models, and protect our individual privacy. You'll never look at our phone, your computer, your credit cards, or even your car in the same way again.

Now available: Nudge: The Final Edition The original edition of the multimillion-copy New York Times bestseller by the winner of the Nobel Prize in Economics, Richard H. Thaler, and Cass R. Sunstein: a revelatory look at how we make decisions—for fans of Malcolm Gladwell's Blink, Charles Duhigg's The Power of Habit, James Clear's Atomic Habits, and Daniel Kahneman's Thinking, Fast and Slow Named a Best Book of the Year by The Economist and the Financial Times Every day we make choices—about what to buy or eat, about financial investments or our children's health and education, even about the causes we champion or the planet itself. Unfortunately, we often choose poorly. Nudge is about how we make these choices and how we can make better ones. Using dozens of eye-opening examples and drawing on decades of behavioral science research, Nobel Prize winner Richard H. Thaler and Harvard Law School professor Cass R. Sunstein show that no choice is ever presented to us in a neutral way, and that we are all susceptible to biases that can lead us to make bad decisions. But by knowing how people think, we can use sensible "choice architecture" to nudge people toward the best decisions for ourselves, our families, and our society, without restricting our freedom of choice.

Overcrowding. Lengthy queues. Increasing animosity from locals. Loss of authenticity. Disappointment. As tourists, how can we improve tourism for locals, their communities, their culture and the environment - as well as for ourselves?By taking steps to "be invisible," of course!Unbeknownst to most tourists, there is a hidden power within them. This handbook examines the lesser-known problems with overtourism, how they came to be and details practical solutions to help you unlock this power to use as a force for good.Packed with everything you need to know to tailor your own invisibility cloak, you'll learn how to: Plan a stress-free trip every time & ways to reduce disappointment; Enjoy popular destinations without contributing to overcrowding; Feel fulfilled by personal, authentic encounters with locals whilst helping their businesses; Avoid pickpockets & scammers for a safe travel experience; Preserve local cultures & identities instead of diluting them; Protect attractions of significant cultural heritage & the natural environment.Learn how to make the most of your next travel experience by "blending in"

"It is worse, much worse, than you think. If your anxiety about global warming is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible. In California, wildfires now rage year-round, destroying thousands of homes. Across the US, "500-year" storms pummel communities month after month, and floods displace tens of millions annually. This is only a preview of the changes to come. And they are coming fast. Without a revolution in how billions of humans conduct their lives, parts of the Earth could become close to uninhabitable, and other parts horrifically inhospitable, as soon as the end of this century. In his trailogue of our near future, David Wallace-Wells brings into stark relief the climate troubles that await - food shortages, refugee emergencies, and other crises that will reshape the globe. But the world will be remade by warming in more profound ways as well, transforming our politics, our culture, our relationship to technology, and our sense of history. It will be all-encompassing, shaping and distorting nearly every aspect of human life as it is lived today. Like An Inconvenient Truth and Silent Spring before it, The Uninhabitable Earth is both a meditation on the devastation we have brought upon ourselves and an impassioned call to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single generation"

TRIBUNE HEARTLAND PRIZE FOR NONFICTION NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • NPR • Financial Times • New York • Independent (U.K.) • Times (U.K.) • Publishers Weekly • Library Journal • Kirkus Reviews • Booklist • Globe and Mail Her name was Henrietta Lacks, but scientists know her as HeLa. She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in medicine: The first "immortal" human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb' s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta' s family did not learn of her "immortality" until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the decade it took to uncover this story, Rebecca became enmeshed in the lives of the Lacks family—especially Henrietta' s daughter Deborah. Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn' t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, The Immortal Life of Henrietta Lacks captures the beauty and drama of scientific discovery, as well as its human consequences.

Jamie DeMent opens a bright kitchen window onto the newest kind of North Carolina farming life. On fifty-five acres of beautiful Piedmont farmland in Hillsborough, North Carolina, DeMent and her family raise sustainably nurtured and sought-after heirloom varieties of produce and livestock. Every day on Coon Rock Farm, DeMent cooks robust, flavorful, satisfying meals for family, crew, and farm interns—and now you are invited to share the bounty. The Farmhouse Chef offers 150 recipes for every occasion, from down home to downright elegant, inspired by the farm's yield through the four seasons. From fall's Sage- and Sausage-Stuffed Acorn Squash to Pear and Bacon Salad, to summer's Sugarcane Barbecue Chicken and Watermelon Mojitos, DeMent's cooking style highlights no-nonsense approaches using great ingredients combined with easy preparations for supercharged flavor. Accompanying the recipes are DeMent's deliciously observant stories illuminating what life is really like on a working farm. A native North Carolinian committed to the development of sustainable farming in her state, DeMent will inspire those of us who may not have a lot of time to cook, let alone farm, but who care about seasonal, healthfully grown food.

Thirty years after its publication, The Death and Life of Great American Cities was described by The New York Times as "perhaps the most influential single work in the history of town planning...[I]t can also be seen in a much larger context. It is first of all a work of literature; the descriptions of street life as a kind of ballet and the biting satiric account of traditional planning theory can still be read for pleasure even by those who long ago absorbed and appropriated the book's arguments." Jane Jacobs, an editor and writer on architecture in New York City in the early sixties, argued that urban diversity and vitality were being destroyed by powerful architects and city planners. Rigorous, sane, and delightfully epigrammatic, Jacobs's small masterpiece is a blueprint for the humanistic management of cities. It is sensible, knowledgeable, readable, indispensable. The author has written a new foreword for this Modern Library edition. Math in Society is a survey of contemporary mathematical topics, appropriate for a college-level topics course for liberal arts major, or as a general quantitative reasoning course.This book is an open textbook; it can be read free online at http://www.opentextbookstore.com/mathinsociety/. Editable versions of the chapters are available as well.

Bill Buford's Heat meets Phoebe Damrosch's Service included in this unique blend of personal narrative, food miscellany, and history In March of 2009, Erin Byers Murray ditched her pampered city girl lifestyle and convinced the rowdy and mostly male crew at Island Creek Oysters in Duxbury, Massachusetts, to let a completely unprepared, equaculture-illiterate food and lifestyle writer work for them for a year to learn the business of oysters. The result is Shucked—part love letter, part memoir and part documentary about the world's most beloved bivalves. Providing an in-depth look at the work that goes into getting oysters from farm to table, Shucked shows Erin's fullcircle journey through the modern day oyster farming process and tells a dynamic story about the people who grow our food, and the cutting-edge community of weathered New England oyster farmers who are defying convention and looking ahead. The narrative also interweaves Erin's personal story—the tale of how a technology-obsessed workaholic learns to slow life down a little bit and starts to enjoy getting her hands dirty (and cold). This is a book for oyster lovers everywhere, but also a great read for locavores and foodies in general.

The beloved debut novel about an affluent Indian family forever changed by one fateful day in 1969, from the author of The Ministry of Utmost Happiness NEW YORK TIMES BESTSELLER • MAN BOOKER PRIZE WINNER Compared favorably to the works of Faulkner and Dickens, Arundhati Roy's modern classic is equal parts powerful family saga, forbidden love story, and piercing political drama. The seven-year-old twins Estha and Rahel see their world shaken irrevocably by the arrival of their beautiful young cousin, Sophie. It is an event that will lead to an illicit liaison and tragedies accidental and intentional, exposing "big things [that] lurk unsaid" in a country drifting dangerously toward unrest. Lush, lyrical, and unnerving, The God of Small Things is an award-winning landmark that started for its author an esteemed career of fiction and political commentary that continues unabated. This book is designed to engage students' interest and promote their writing abilities while teaching them to think critically and creatively. Dowden takes an activist stance on critical thinking, asking students to create and revise arguments rather than simply recognizing and criticizing them. His book emphasizes inductive reasoning and the analysis of individual claims in the beginning, leaving deductive arguments for consideration later in the course.

Events can be synonymous with a particular place, helping shape and promote a location. Given the rise of the global events industry, this book uncovers how events impact upon places and societies, looking at a range of different events and geographical scales. Geographers are concerned with how notions of space and place impact people, communities and identity, and events have played a central role in how places are perceived, consumed and even contested. This book will discuss international event cases to frame knowledge around the increased demands, pressures and complexities that globalisation, transnationalism, regeneration and competitiveness has put on events, places and societies. Integrating discussions of theory and practice, this book will explore the range of conceptual perspectives linked to how geographers and sociologists understand events and the role events play in contemporary times. This involves recognizing histories and planning strategies, the purpose of bidding for an event or the local meanings that have emerged and changed in the place. This helps us analyse how events have the potential to redefine place identities. This international edited collection will appeal to academics across disciplines such as geography, planning and sociology, as well as students on events management and events studies courses.
