Contemporary Art: World Currents argues that, in recent decades, a worldwide shift from modern to contemporary art has occurred. This has not, however, been a uniform change from one phase or style in the history of art to another. Rather, artists everywhere have embraced the contemporary world's diversity and complexity. The book is a genuinely worldwide survey of art from the 1960s to the present, which emphasizes its relationships to all aspects of contemporary experience what the author calls arts contemporaneity. Examining the changes as they occurred, Terry Smith offers the first historical account of the developments that constitute the key currents in world contemporary art. Artists well known in the cultural centres of Europe and the US, and those prominent on the biennale circuit, are placed within the art scenes from which they came. The work of artists whose reputations are primarily local is fully acknowledged. Ranging across Asia, East and Central Europe, the Americas and the Caribbean, Oceania and Africa, and drawing upon local histories and research, this book breaks new ground in tracing how modern, traditional and indigenous art became contemporary in each cultural region of the world. Taking a comparative perspective, it relates these developments to worldwide changes in art and culture, highlighting the main concerns of contemporary artists today. Diversity the contemporaneity of difference not a convergence towards sameness, Smith argues, is what makes today's art contemporary.

While there is growing interest in IFRS within the US, interest outside the US has exploded. Weygandt's fourth edition of Financial Accounting: IFRS highlights the integration of more US GAAP rules, a desired feature as more foreign companies find the United States to be their largest market. The highly anticipated new edition retains each of the key features (e.g. TOC, writing style, pedagogy, robust EOC) on which users of Weygandt Financial have come to rely, while putting the focus on international companies/examples, discussing financial accounting principles and procedures within the context of IFRS, and providing EOC exercises and problems that present students with foreign currency examples instead of solely U.S. dollars. This book includes self-test section at the end of each chapter. Test yourself, then check answers in the back of the book to see how you score. CD-ROM included.

Copley's Essentials of Accounting for Governmental and Not-for-Profit Organizations, 13e is best suited for those professors whose objective is to provide more concise coverage than what is available in larger texts. The main focus of this text is on the preparation of external financial statements

which is a challenge for governmental reporting. The approach in this edition is similar to that used in practice. Specifically, day to day events are recorded at the fund level using the basis of accounting for fund financial statements. Governmental activities are recorded using the modified accrual basis. The fund-basis statements are then used as input in the preparation of government-wide statements. The preparation of government-wide statements is presented in an Excel worksheet. NEW for the 13th edition is McGraw-Hill Connect, a digital teaching and learning environment that saves students and instructors time while improving performance over a variety of critical outcomes.

This document contains a record of the oral and written testimony of witnesses at a Chicago (Illinois) Congressional hearing on the Job Opportunities and Basic Skills (JOBS) Training Program. Witnesses at the hearing included officials from various Illinois programs funded by the JOBS program, government officials, and unemployed persons. They testified that the high state match of funds and services works against the successful implementation of the JOBS program and the requirements of the Family Support Act of 1988 are burdensome. Witnesses noted that in times of recession, the states simply do not have enough money to set up the matches for federal funds. Witnesses also stated that the JOBS program's requirement that participants engage in 20 hours per week of education is unrealistic because most literacy programs or postsecondary programs require less than 20 hours of classroom work but presume home study time. The 20-hour rule works against participants improving their skills. Proposed changes in the JOBS legislation to lessen the amount of state money required and to make program requirements more flexible are included in these proceedings. (KC)
