markets have continue to grow more global over recent years, the need for cross-border financial information has correspondingly increased. This has brought international accounting to the forefront.

International Accounting: A User Perspective is designed to provide an understanding of international accounting issues to current and future business managers. The book takes a user perspective to

international financial reporting because most business executives are more likely to be users of financial information that crosses national borders than users of it. With the recent problems

exposed in the quality of financial reporting in many countries, a solid understanding of international accounting issues is an important part of the portfolio of skills that managers in

Management and cost
accounting has been the basic
toolbox in business
administration for decades.
Today it is an integral part of
all curricula in business
education and no student can**

afford not to be familiar with its basic concepts and instruments. At the same time, business in general, and management accounting in particular, is becoming more and more international. English clearly has evolved as

the "lingua franca" of international business. Academics, students as well as practitioners exchange their views and ideas, discuss concepts and communicate with each other in English. This is certainly also true for

**cost accounting and
management accounting.
Management Accounting is
becoming increasingly
international. "Management
and Cost Accounting" is a new
English language textbook
covering concepts and**

instruments of cost and management accounting at an introductory level (Bachelor, but also suited for MBA courses due to strong focus on practical applications and cases). This textbook covers all topics that are relevant in

**management accounting in
business organizations and
that are typically covered in
German and Central European
Bachelor classes on cost
accounting and management
accounting. After an
introduction to the topic,**

including major differences between the German approach and the purely Anglo-Saxon approach of management accounting, the book describes different cost terms and concepts applied in German cost accounting, The

book is much more specific here compared to US-American standard textbooks. Based on different cost concepts, the topic of cost behavior is discussed, including the determination of cost functions. The heart of

the book guides the reader through the general structure of a fully developed cost accounting system following the German and Central European standard: It starts with cost type accounting, moves on to cost center

accounting and finally deals with cost unit accounting, assigning cost to goods and services offered in the market. The remaining parts of the book deal with decision making and how management and cost accounting data can

support managers in this task. A comparison of absorption costing and variable costing introduces the reader to management decisions such as product portfolio and outsourcing decisions. Additionally, cost-

volume-profit analysis (break-even-analysis) is covered. The book closes with a comprehensive treatment of cost planning and variance analysis.

?Management Accounting and Control? is a new textbook in English covering concepts and instruments of management accounting at an

such as target costing, life cycle costing and process-based costing approaches are explained in detail.

Differences between Anglo-American activity-based costing (ABC) and German

process-based costing are highlighted. The book then turns to an extensive discussion of planning and budgeting tasks in management accounting with a strong focus on the practical

application of the topic such as developing a budget in practice. Another chapter is dedicated to a comparison of traditional budgeting with modern /alternative budgeting approaches. A major part of

the book is dedicated to the broad area of performance management. The relevance of financial statement information for performance management purposes is discussed in detail. In

Buku Akuntansi Keuangan Lanjutan Berbasis IFRS dan SAK Terbaru buku 1 ditujukan kepada mereka yang berminat untuk mempelajari dan mendalami mengenai laporan keuangan konsolidasi. Pada umumnya adalah mahasiswa yang mengambil matakuliah pada semester

lima atau semester enam. Buku ini diawali dengan apa dan bagaimana penggabungan usaha (business combination) yaitu apakah akuisisi aktiva bersih (net assets) atau akuisisi saham (stock acquisition) berdasarkan SAK 22. Apabila akuisisi yang terjadi adalah akuisisi aktiva bersih maka peristiwa

tersebut dinamakan merger atau konsolidasi dan sebelum penggabungan usaha dilaksanakan laporan posisi keuangan masing-masing perusahaan harus disusun berdasarkan nilai wajar (SAK 65) dan hanya ada 1 perusahaan tunggal yang melanjutkan dari penggabungan usaha tersebut dan

perusahaan yang lama dilikuidasi.

Apabila peristiwa penggabungan usaha adalah akusisi saham maka dinamakan akuisisi atau afiliasi dan tidak ada perusahaan yang dilikuidasi. Dalam peristiwa akuisis harus diperhatikan berapa besar kendali yang diperoleh perusahaan induk terhadap perusahaan

anak apakah 100% atau kurang dari 100% dan bagaimana excess yang timbul pada saat akuisisi hal ini akan dibahas tuntas pada buku ini. Setelah akuisisi berhasil maka perusahaan induk dan perusahaan anak merupakan 1 entitas dan perusahaan induk harus membuat laporan keuangan konsolidasi pada

tanggal akuisisi dan untuk setiap akhir periode berdasarkan SAK 65. Setelah akuisisi saham, perusahaan induk mencatat investasi saham pada perusahaan anak pada tanggal akuisisi berdasarkan harga perolehan (at cost) dengan menggunakan metode pembelian (by purchase), maka untuk selanjutnya

perusahaan induk harus menggunakan metode ekuitas (equity method) berdasarkan SAK 15, maka setiap perubahan yang terjadi pada perusahaan anak yaitu laba atau rugi dan dividen yang diumumkan dan dibayarkan kepada pemegang saham sebagai penyesuaian terhadap nilai investasi saham

perusahaan anak. Maka dalam laporan keuangan konsolidasi akan timbul akun timbal balik antara perusahaan induk dan perusahaan anak maka harus dieliminasi, oleh karena itu diperlukan kertas kerja laporan keuangan konsolidasi. Selanjutnya dalam perjalanan proses bisnis akan terjadi

transaksi antara perusahaan induk dan perusahaan anak yang berkaitan dengan (down stream or up stream): Persediaan (inventory), Aktiva tetap yang tidak dapat disusutkan (land) dan yang dapat disusutkan (plant assets) serta obligasi (bond) yang diterbitkan apakah Induk yang menjual atau menerbitkan

kemudian dimiliki oleh perusahaan anak atau sebaliknya maka pada kertas kerja laporan keuangan konsolidasi harus dilakukan penyesuaian (adjustment) terhadap akun-akun tersebut. Hal tersebut akan dibahas secara detail pada buku ini. Buku persembahkan penerbit ByPass
