This 13th edition has been thoroughly updated to reflect recent business developments, as well as changes in accounting standards and regulatory requirements. This comprehensive textbook addresses the practical financial reporting problems encountered in consolidated financial statements, goodwill, other intangible assets, and derivative securities.

As auditors, we are trained to investigate beyond appearances to determine the underlying facts—in other words, to look beneath the surface. From the Enron and WorldCom scandals of the early 2000s to the financial crisis of 2007–2008 to present-day issues and challenges related to significant estimation uncertainty, understanding the auditor's responsibility related to fraud, maintaining a clear perspective, probing for details, and understanding the big picture are indispensable to effective auditing. With the availability of greater levels of qualitative and quantitative information ("big data"), the need for technical skills and challenges facing today's auditor is greater than ever. The author team of Louwers, Blay, Sinason, Strawser, and Thibodeau has dedicated years of experience in the auditing field to this new edition of Auditing & Assurance Services, supplying the necessary investigative tools for future auditors.

"Thank you for considering the thirteenth edition of Essentials of Accounting for Governmental and Not-for-Profit Organizations. I have used the text with traditional three-semester-hour classes, with half-semester GNP courses, and as a module in advanced accounting classes. It is appropriate for accounting majors or as part of a public administration program. The Excel-based problems were developed to facilitate delivery through distance learning formats. The focus of the text is on the preparation of external financial statements. The coverage is effective in preparing candidates for the CPA examination"--
